

Oh! Je viens
d'avoir une idée

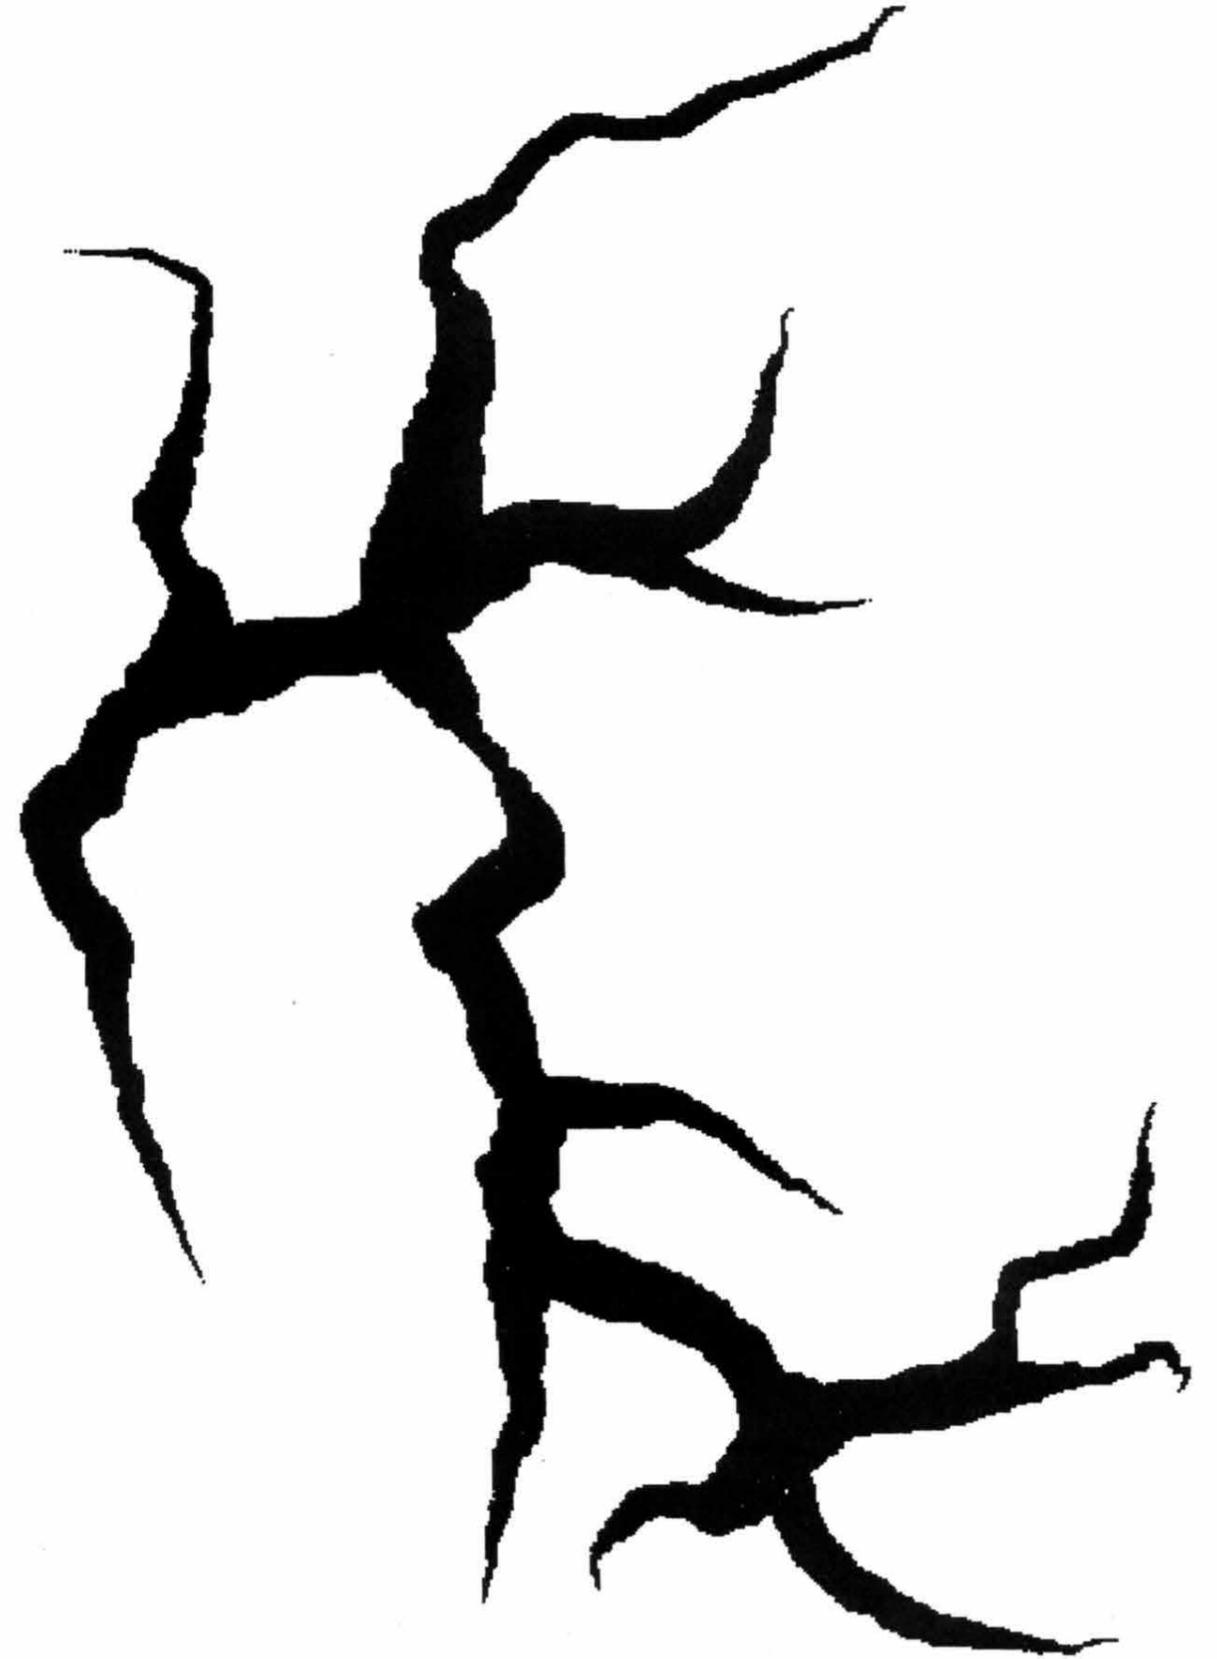

GEORGIK

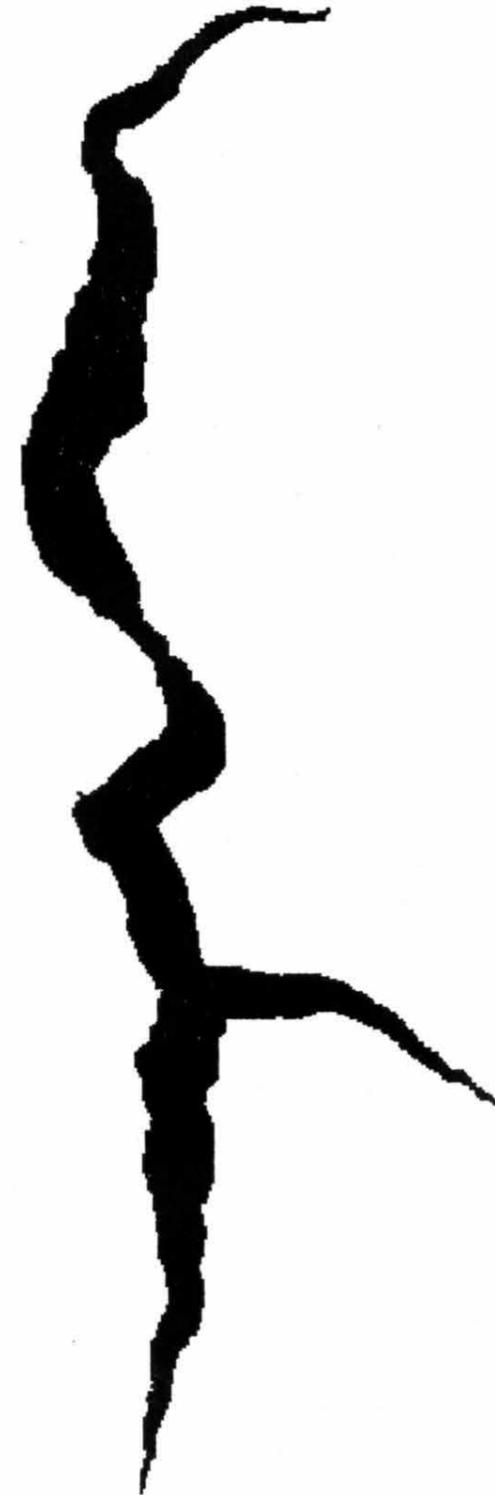

Oh!
Je viens d'avoir une idée.

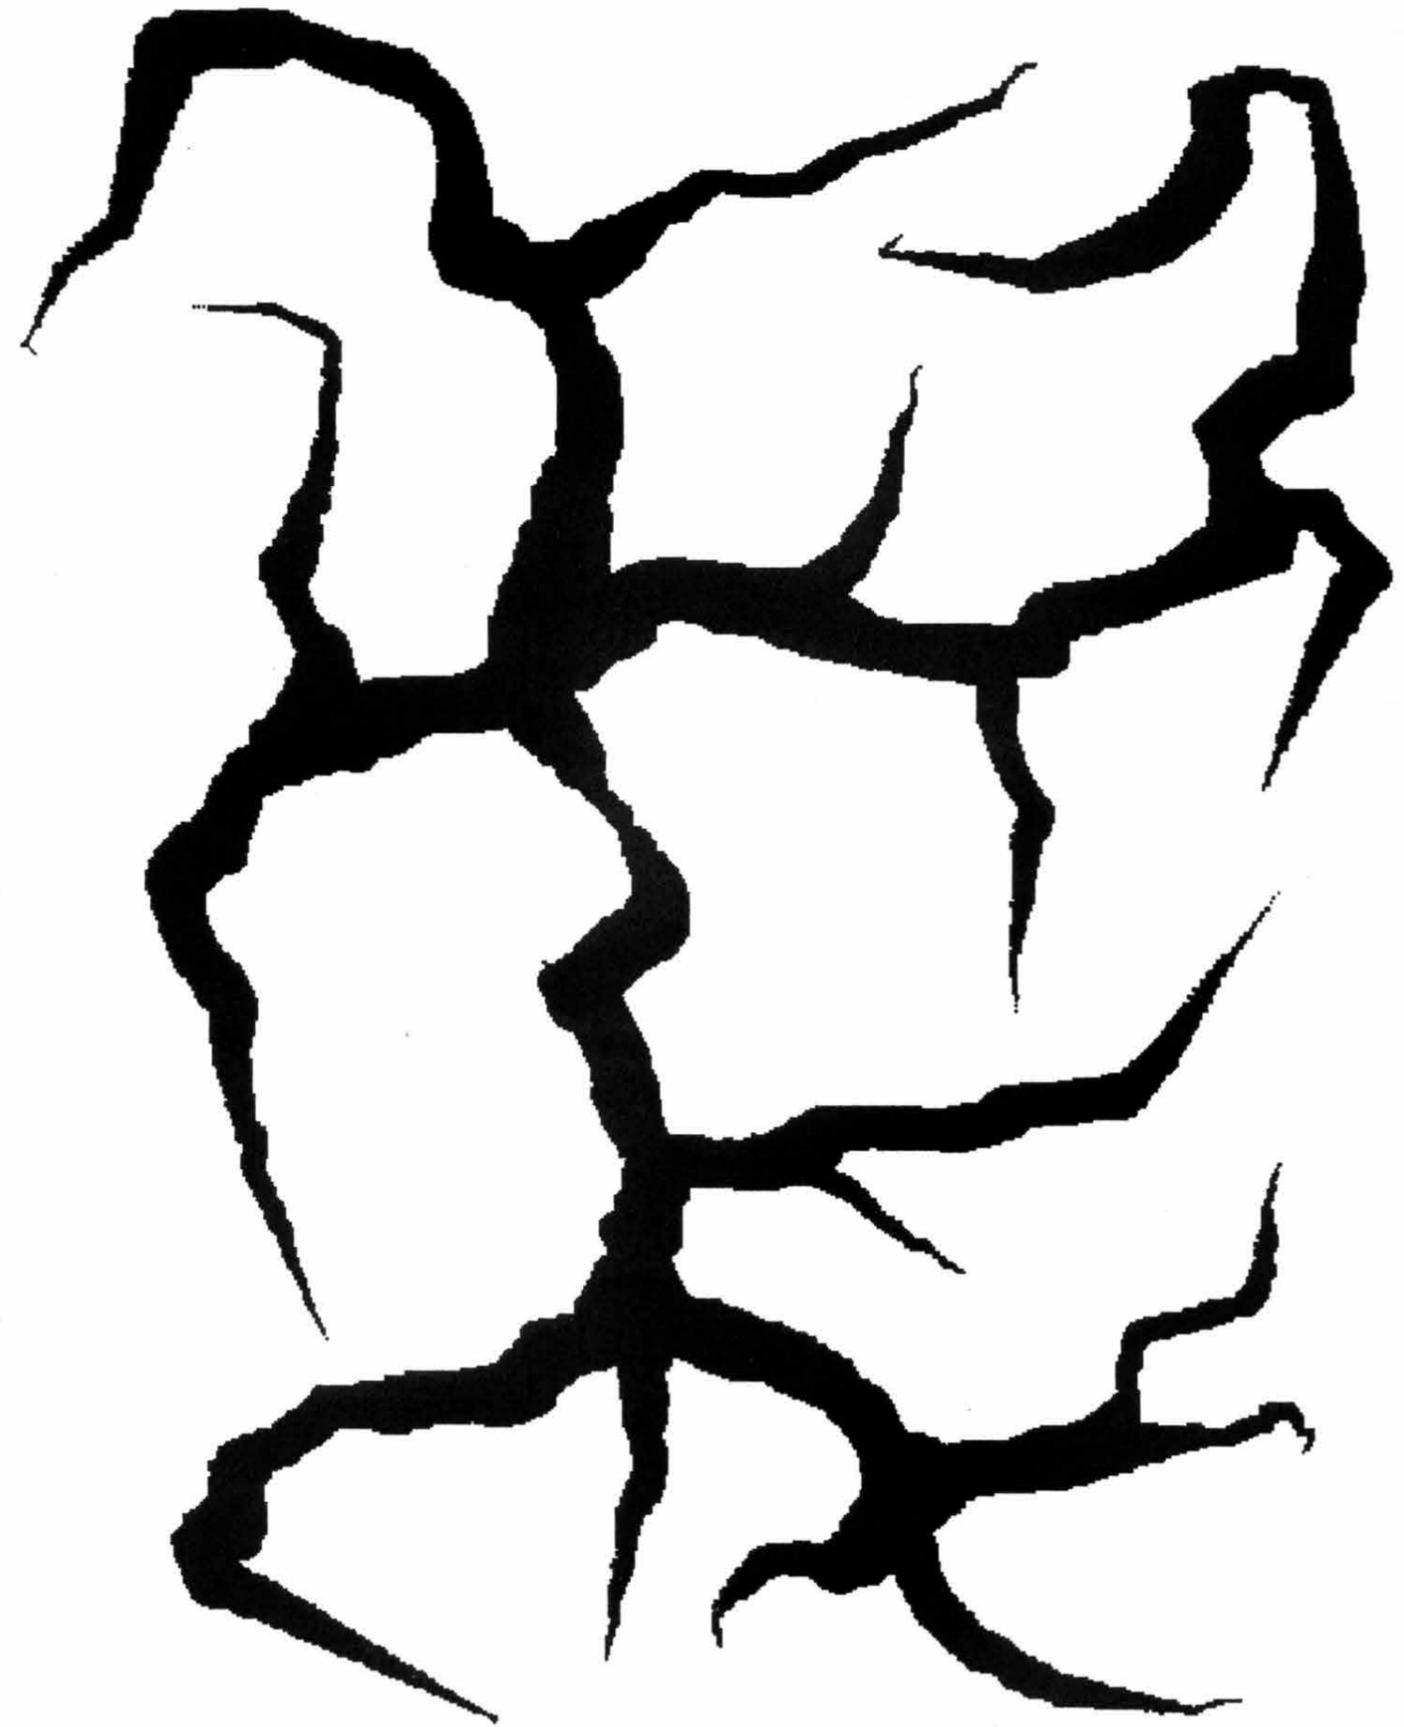

A peine une pensée.

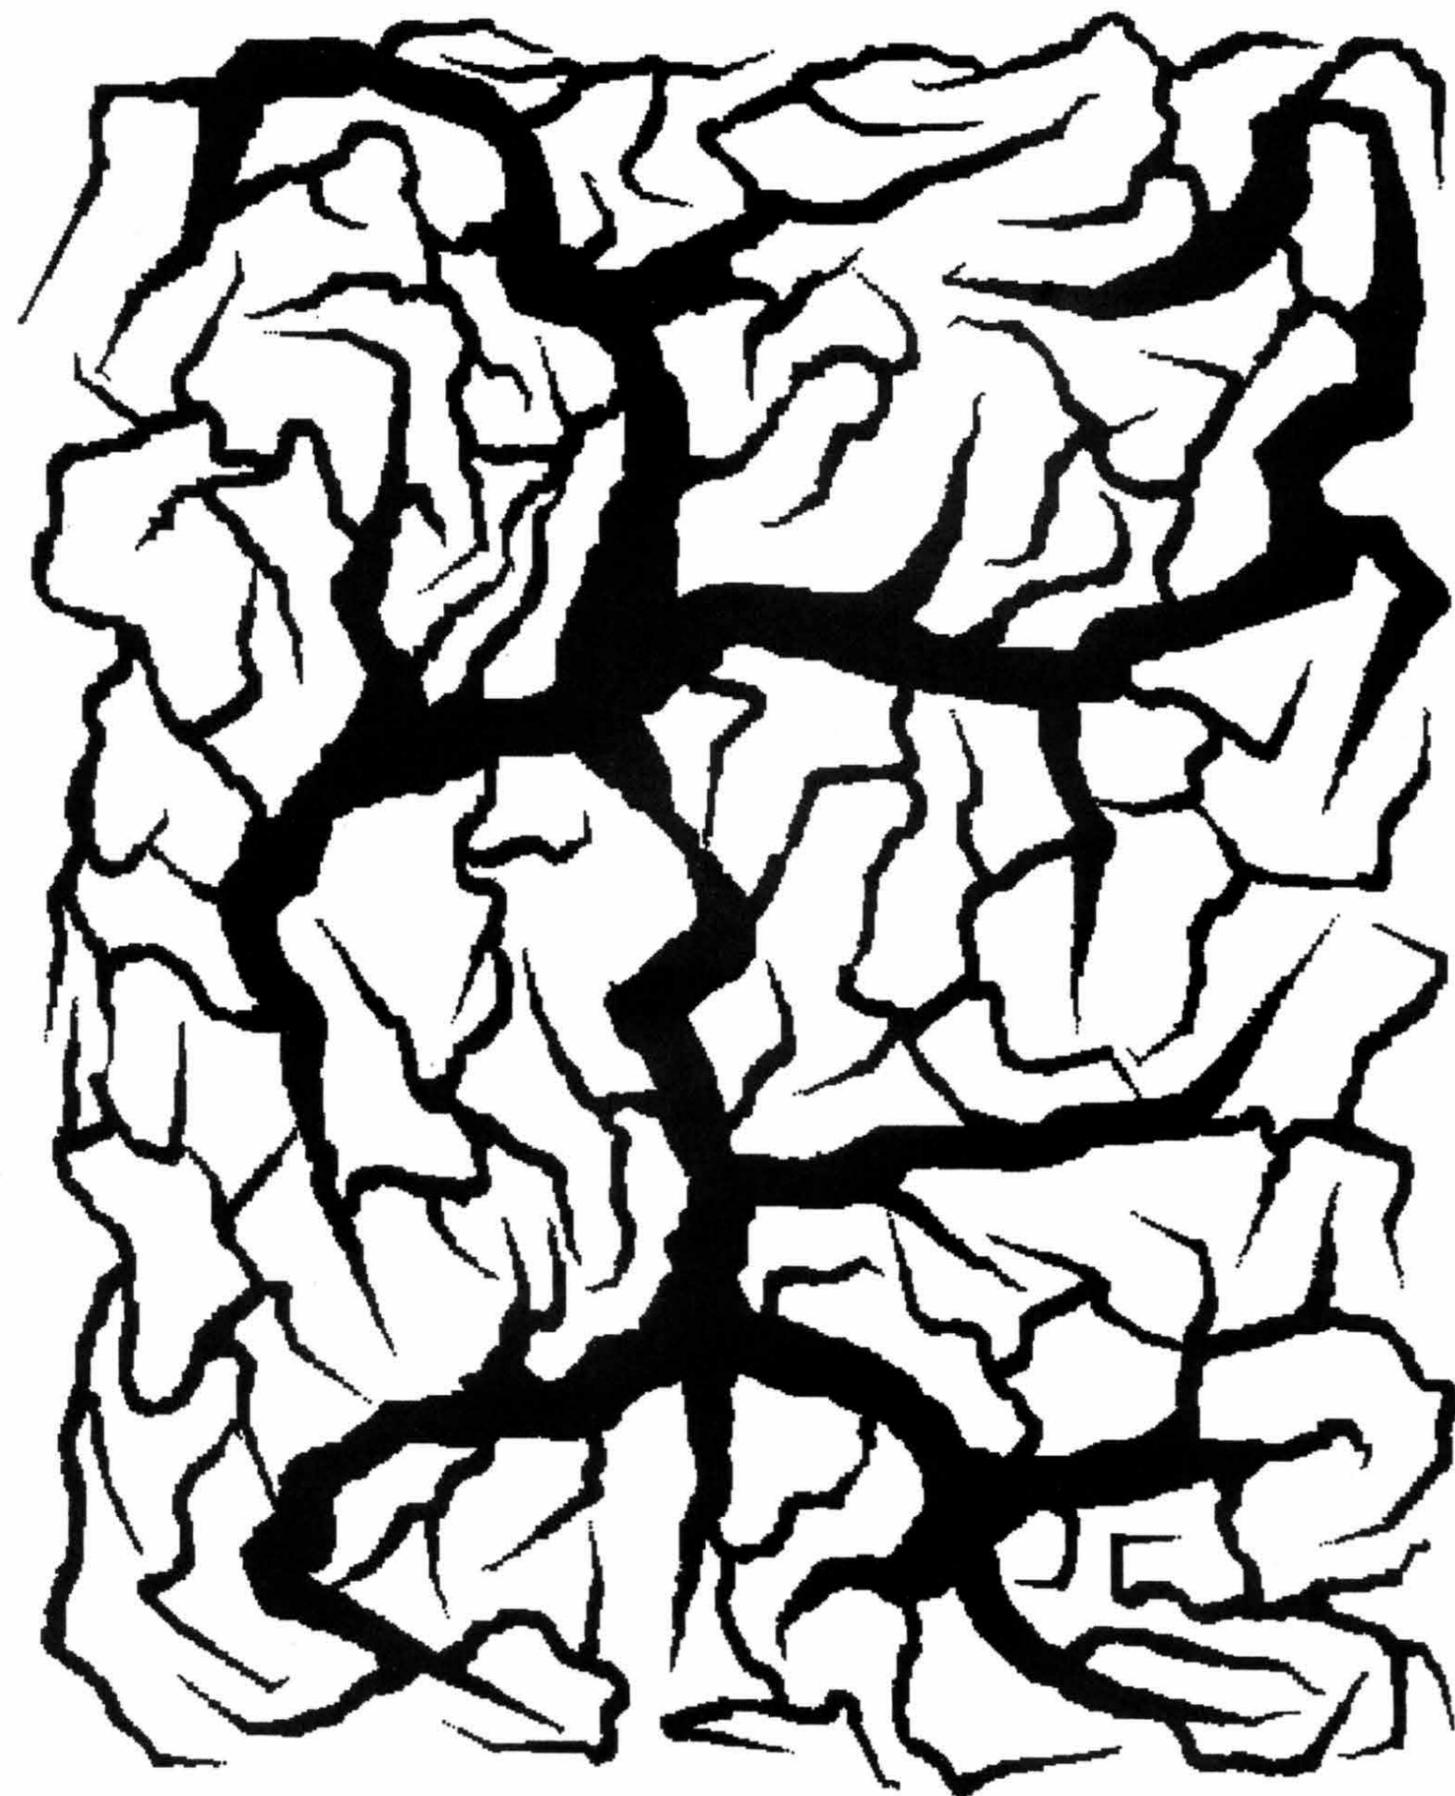

Une idée toute simple,
qu'il me suffirait d'écouter.

Mais les idées simples
souvent se compliquent,

s'encombrent de sentiments
superflus,

de corrélations inutiles,

de nuances néfastes,

qui les vident
de leurs sens.

Une idée simple,

suivie d'une seconde
idée simple,

complétée par
idées simples,

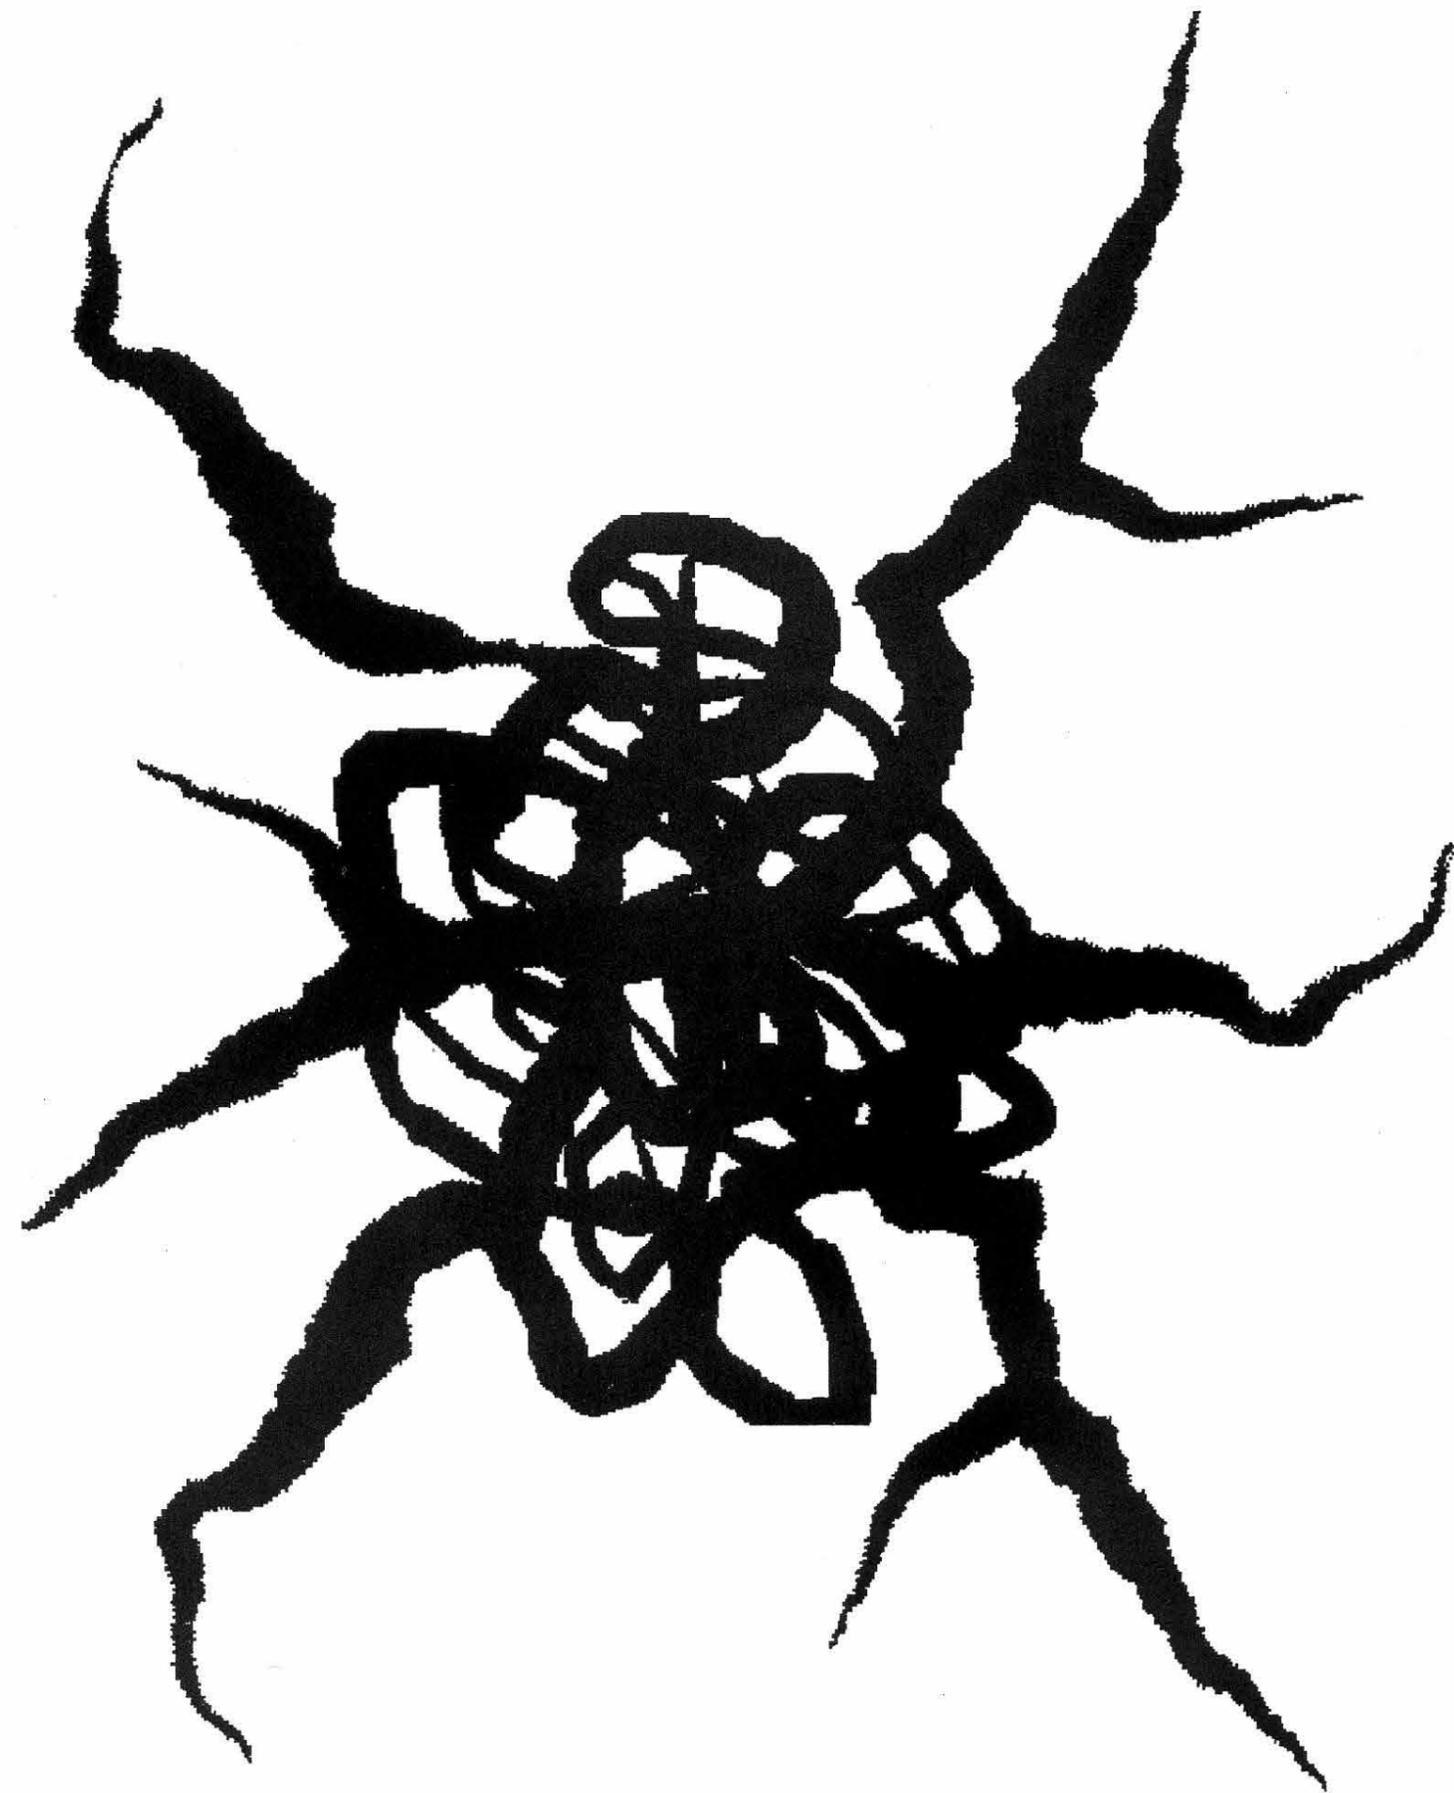

n'implique pas
une réflexion simpliste.

Une réflexion complexe permet
d'envisager plusieurs solutions

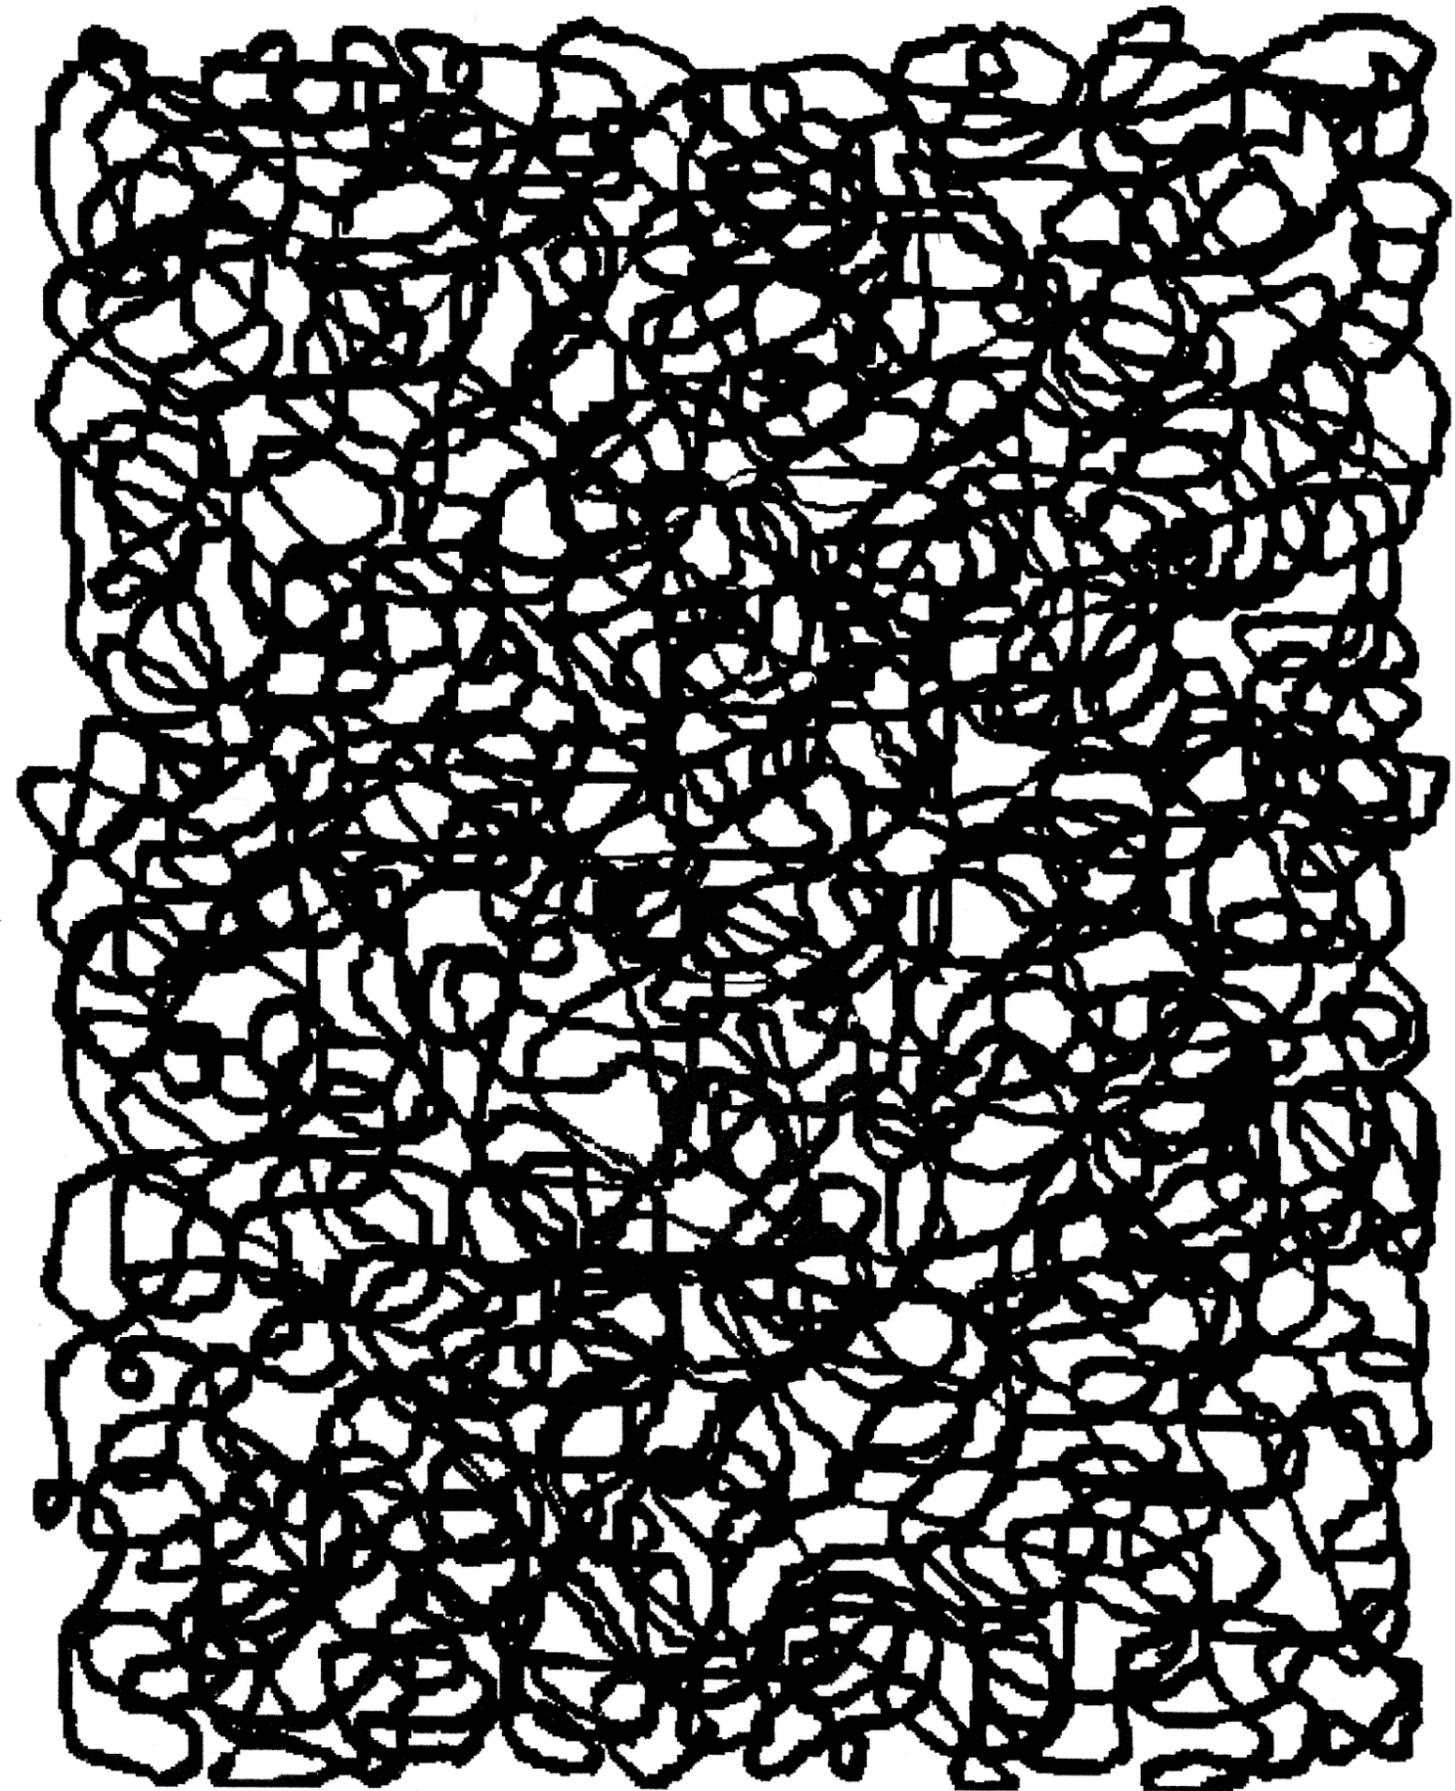

au problème.

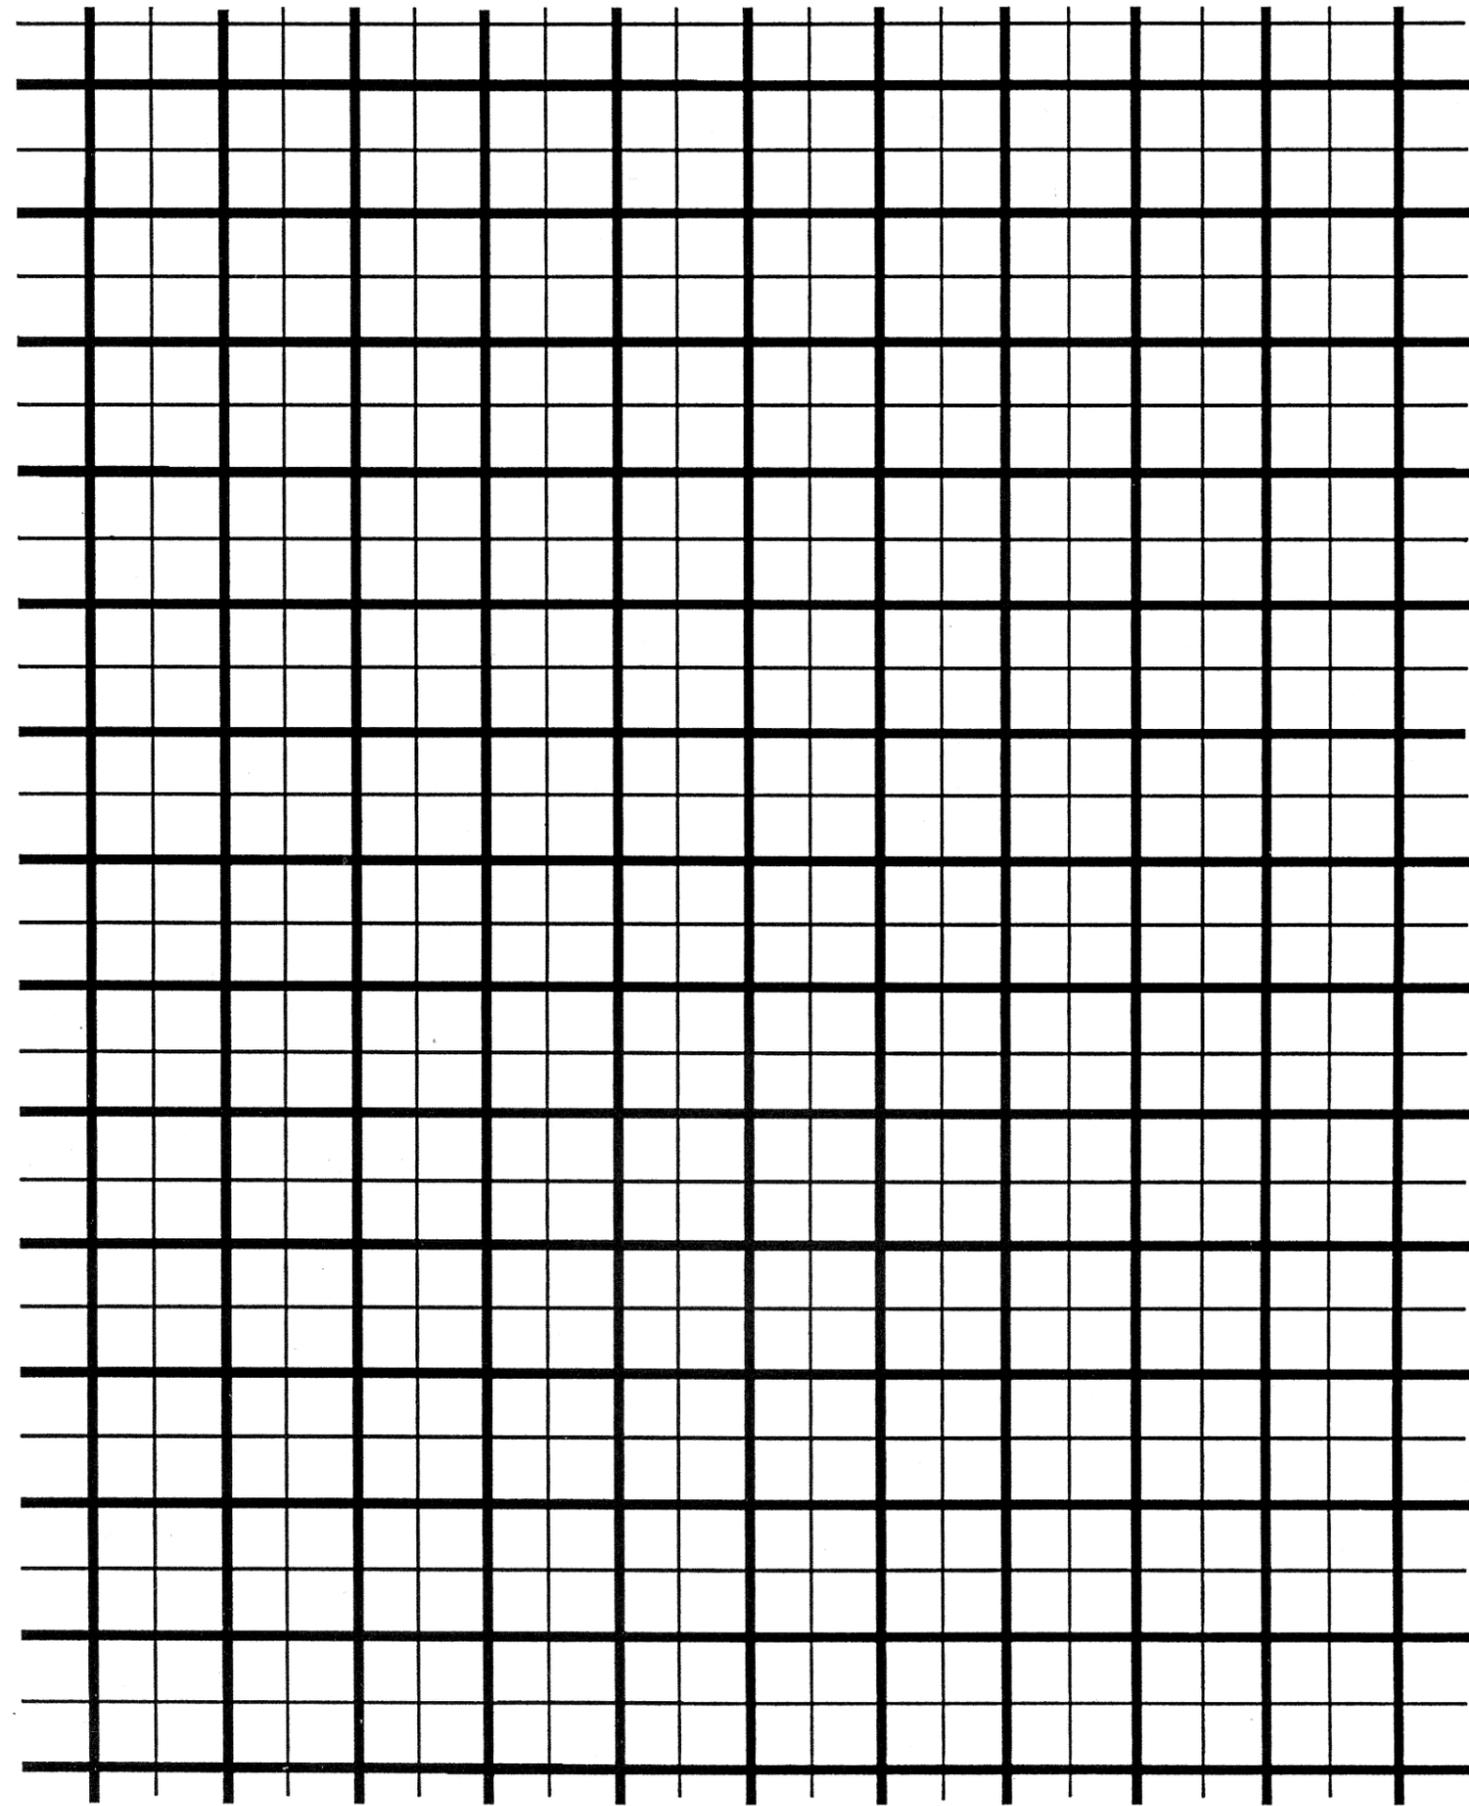

Un problème mal défini,

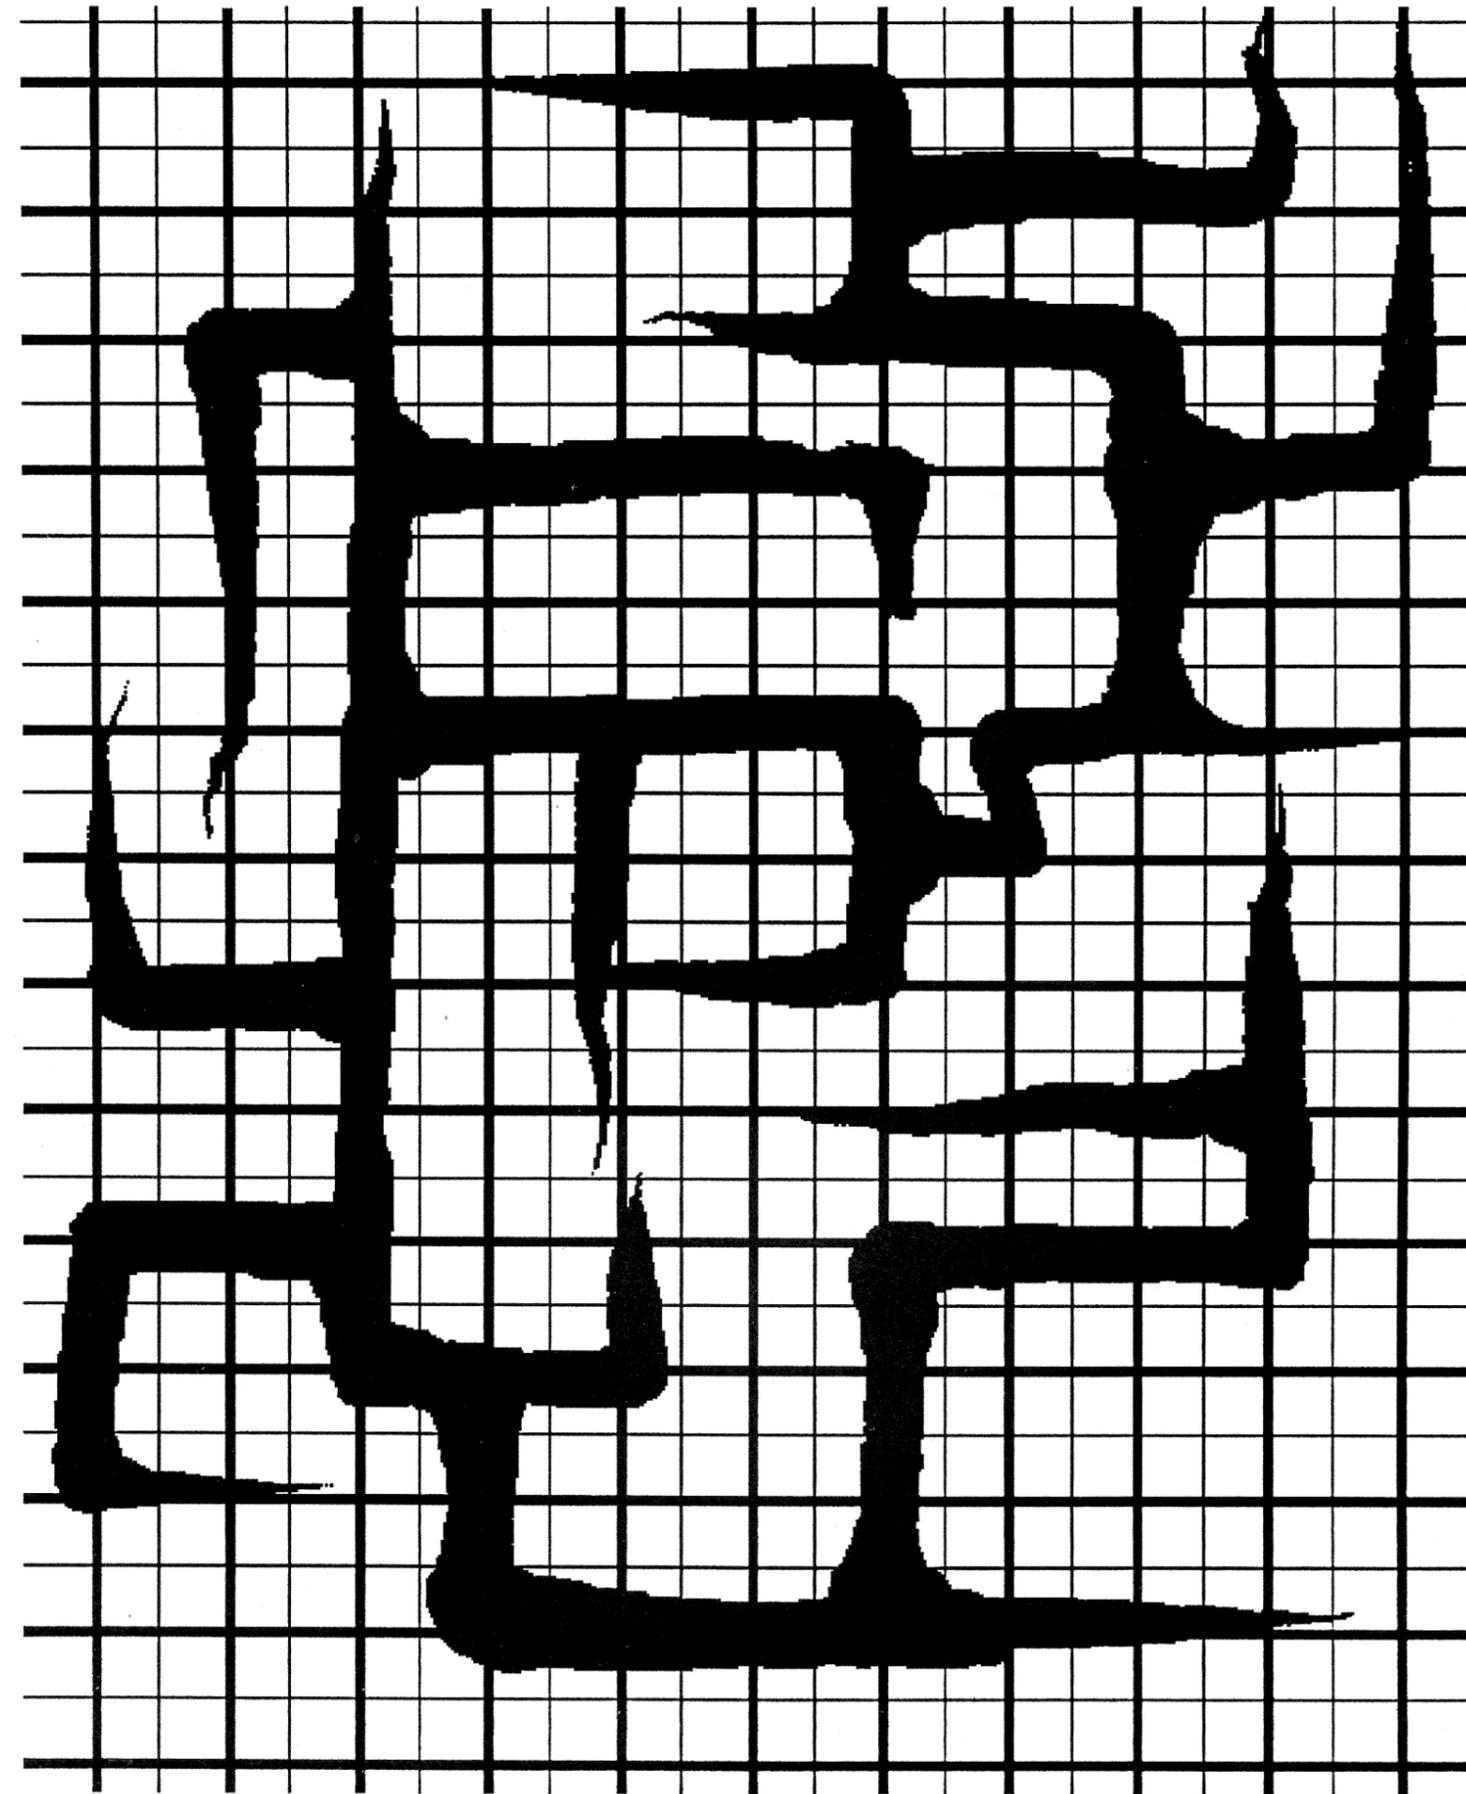

est insoluble.

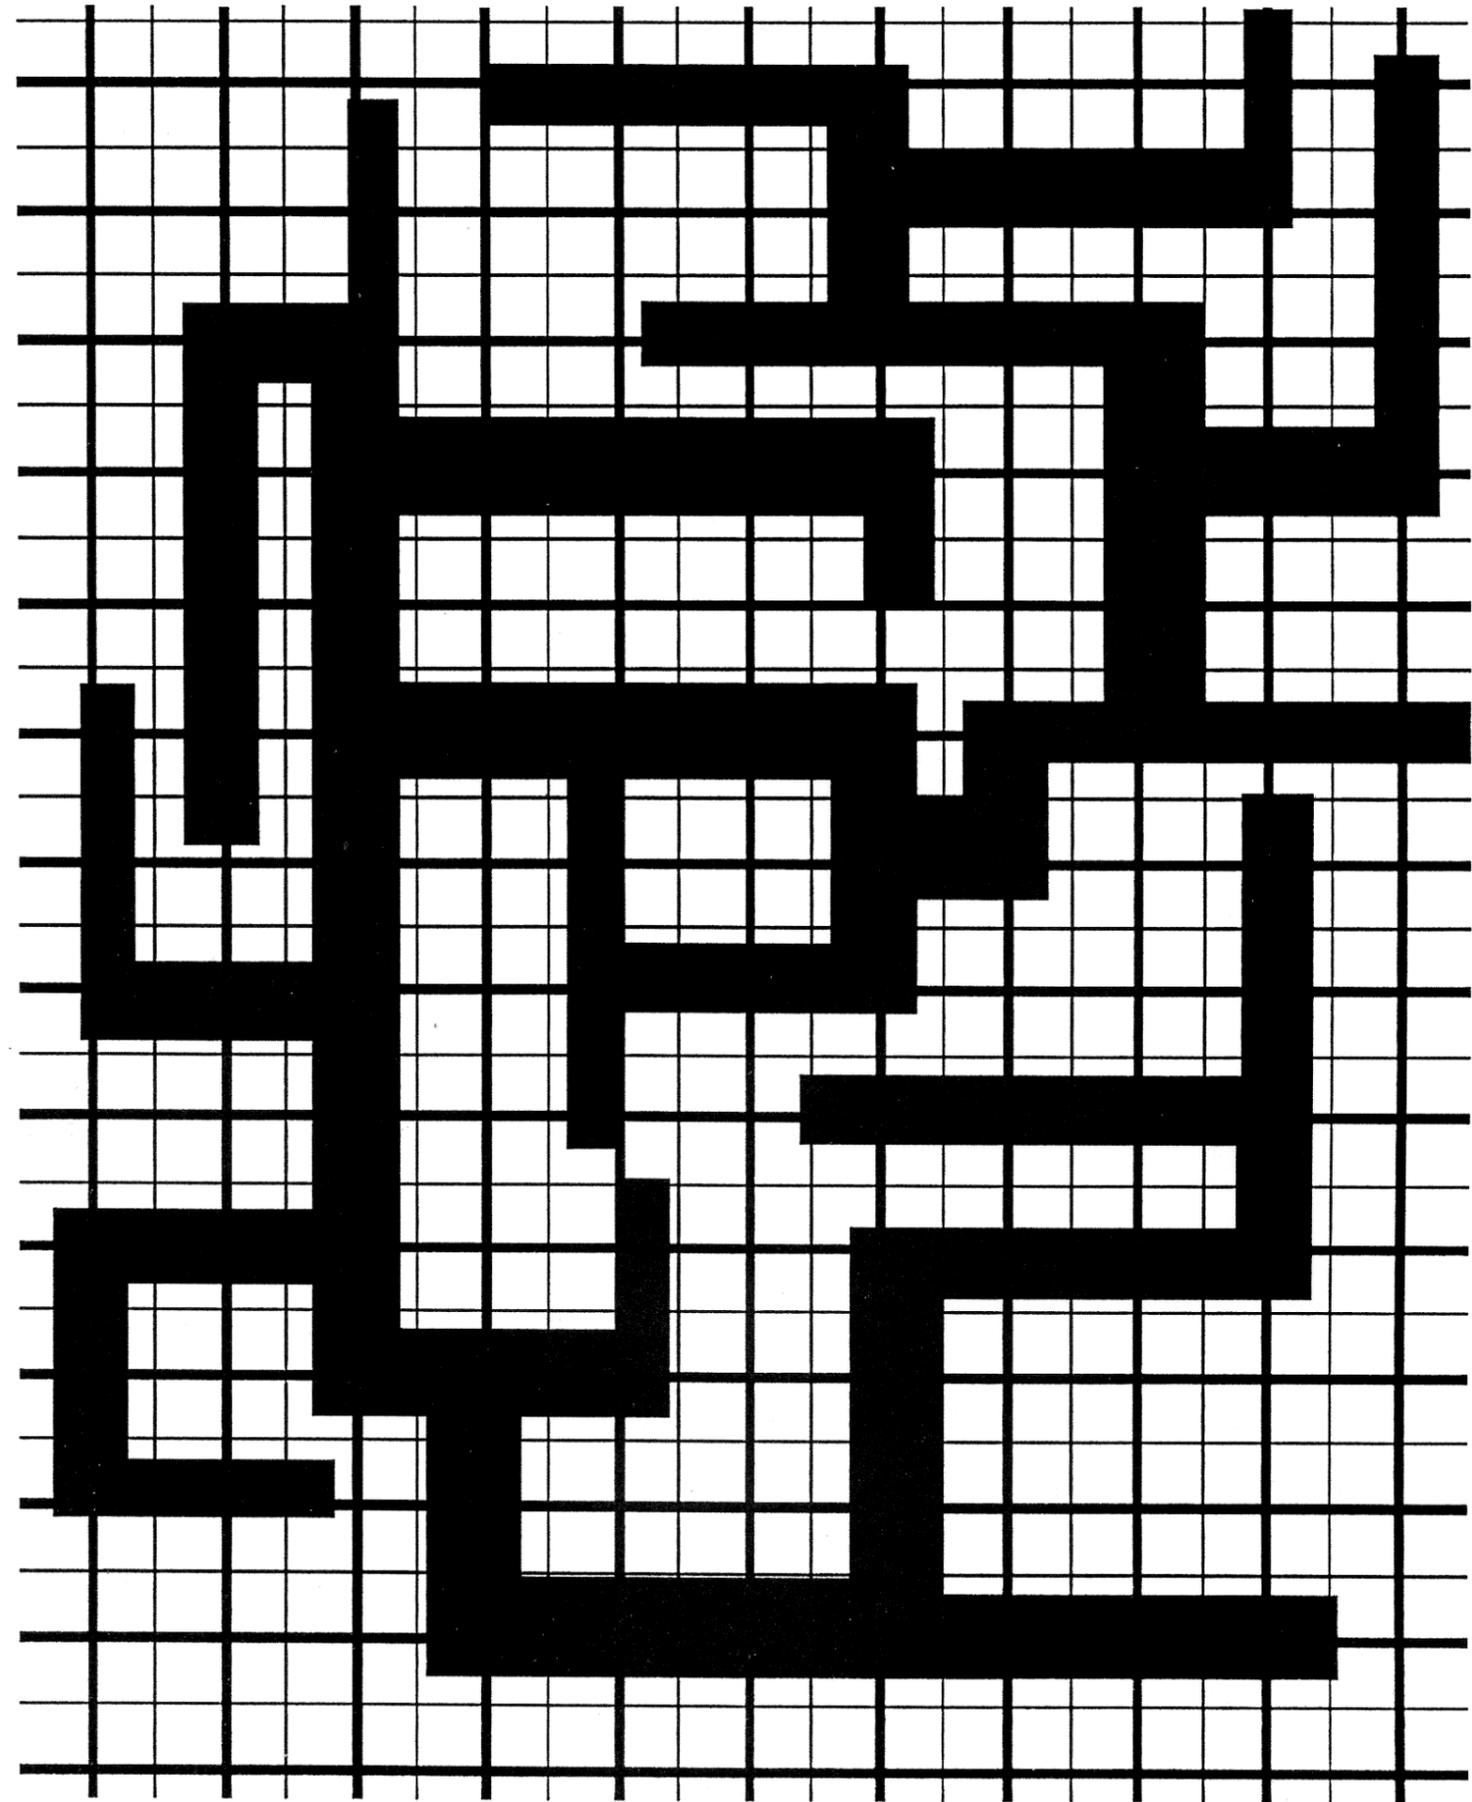

Un cerveau
bien structuré.

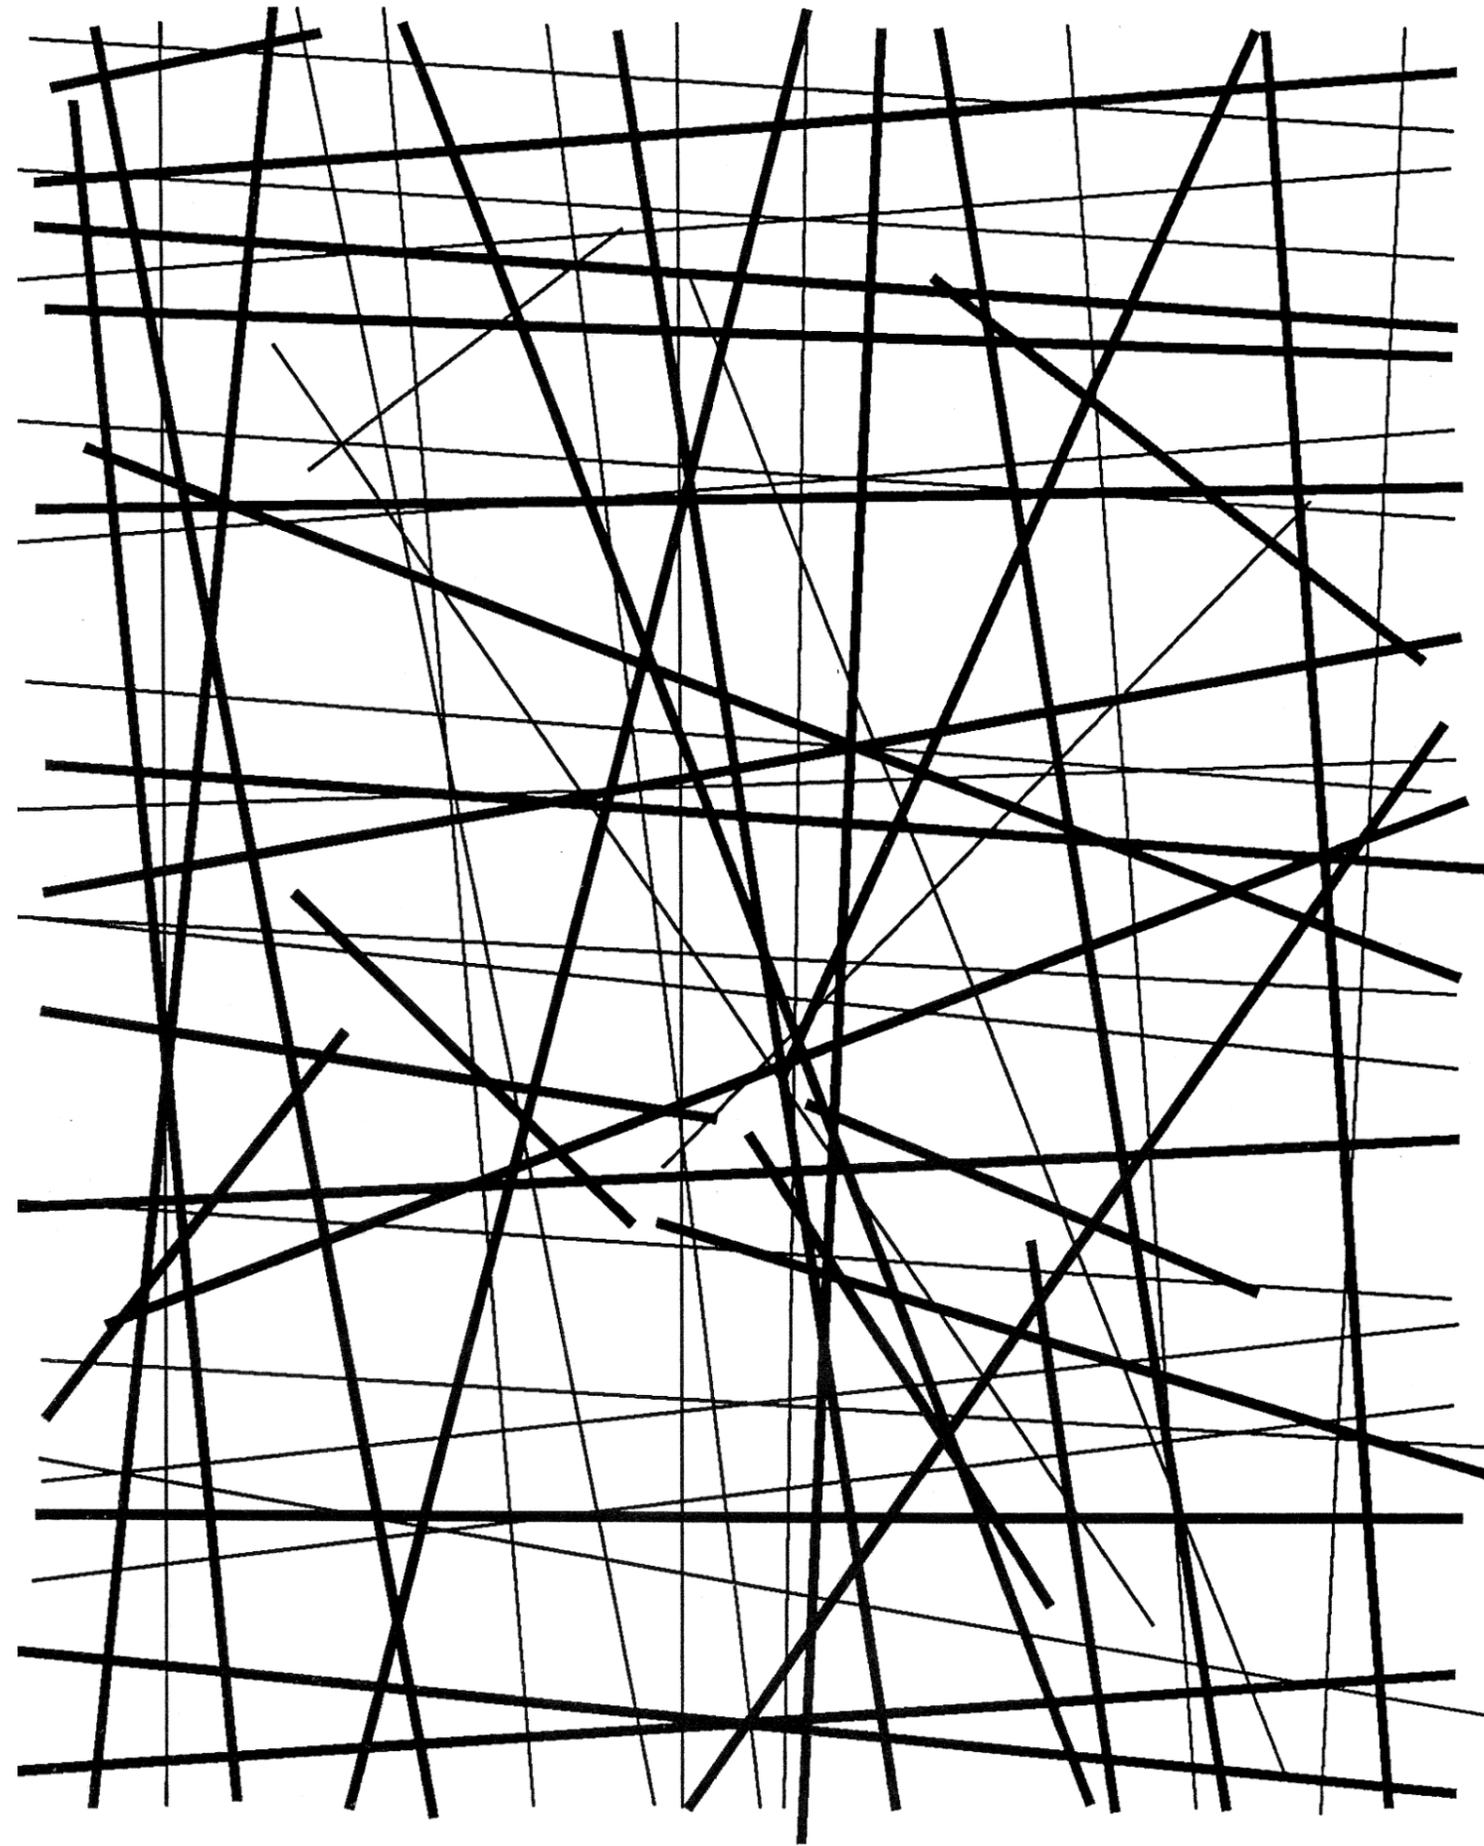

crée des pensées
bien structurées.

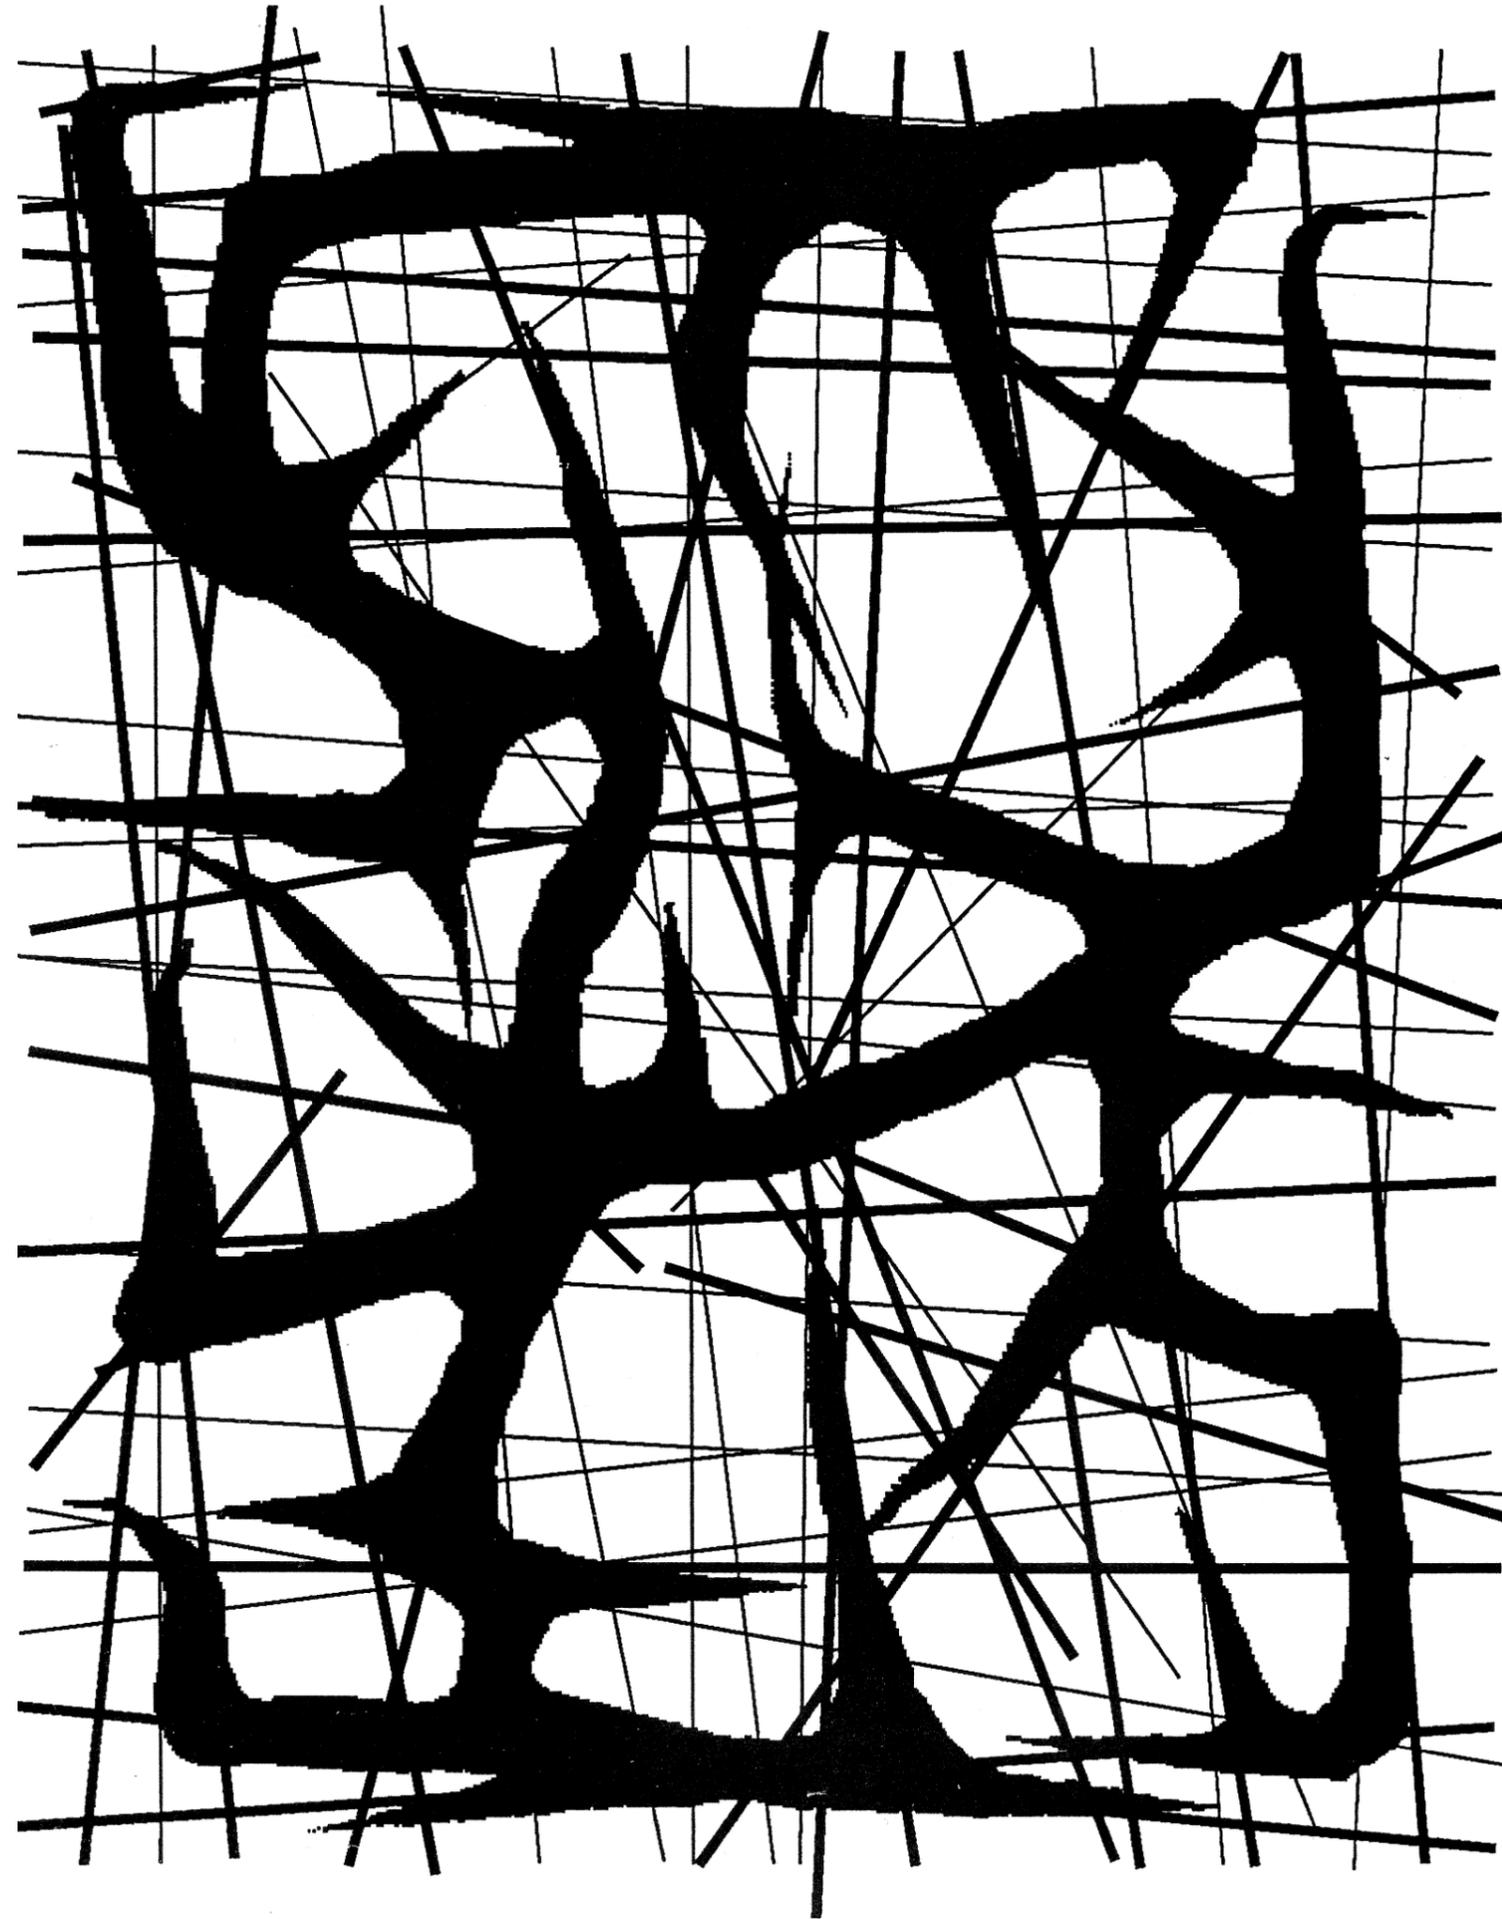

Les pensées bien structurées
sont souvent arides.

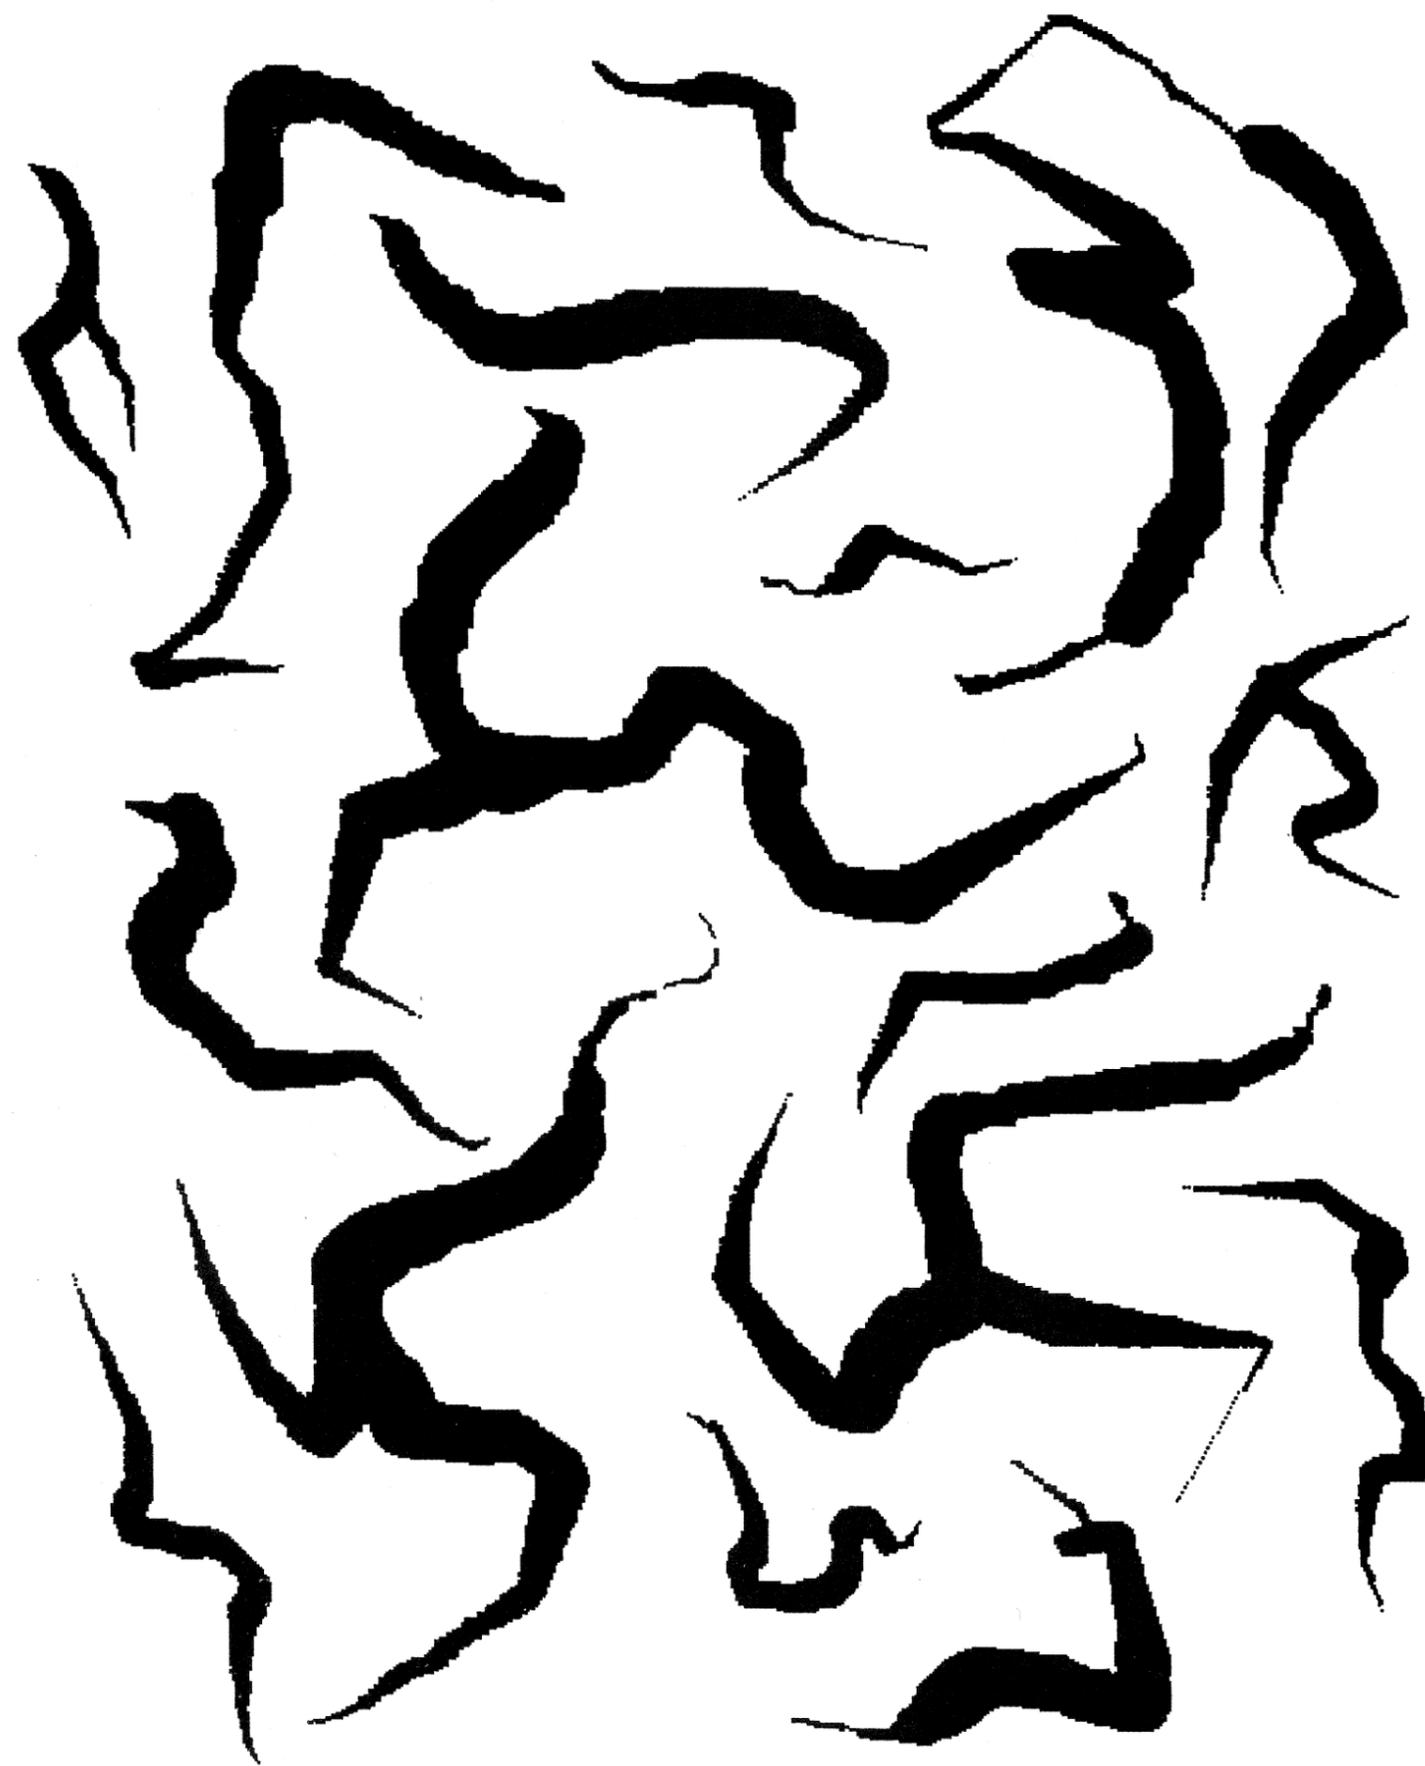

Un cerveau
mal structuré,

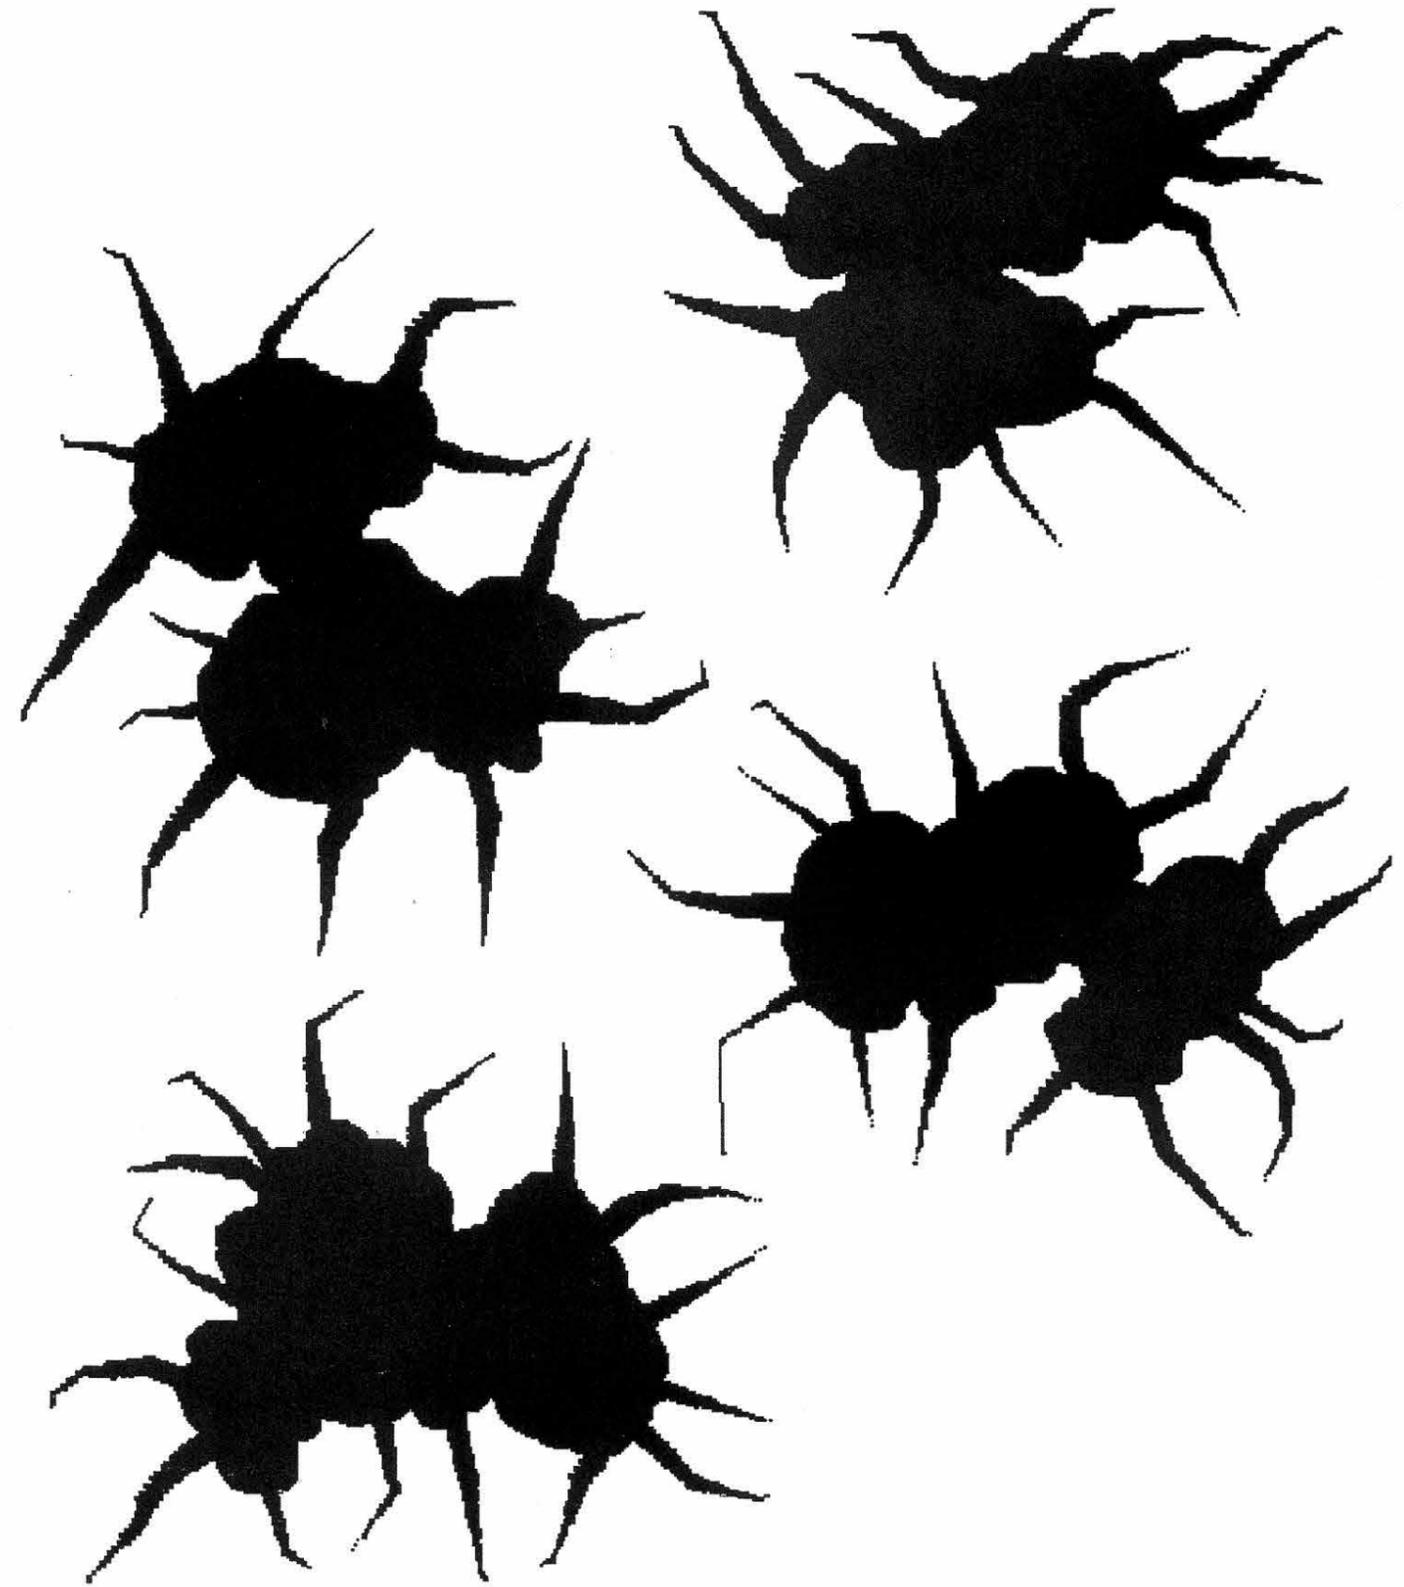

crée des pensées
mal structurées.

Les pensées mal structurées
souvent se dispersent.

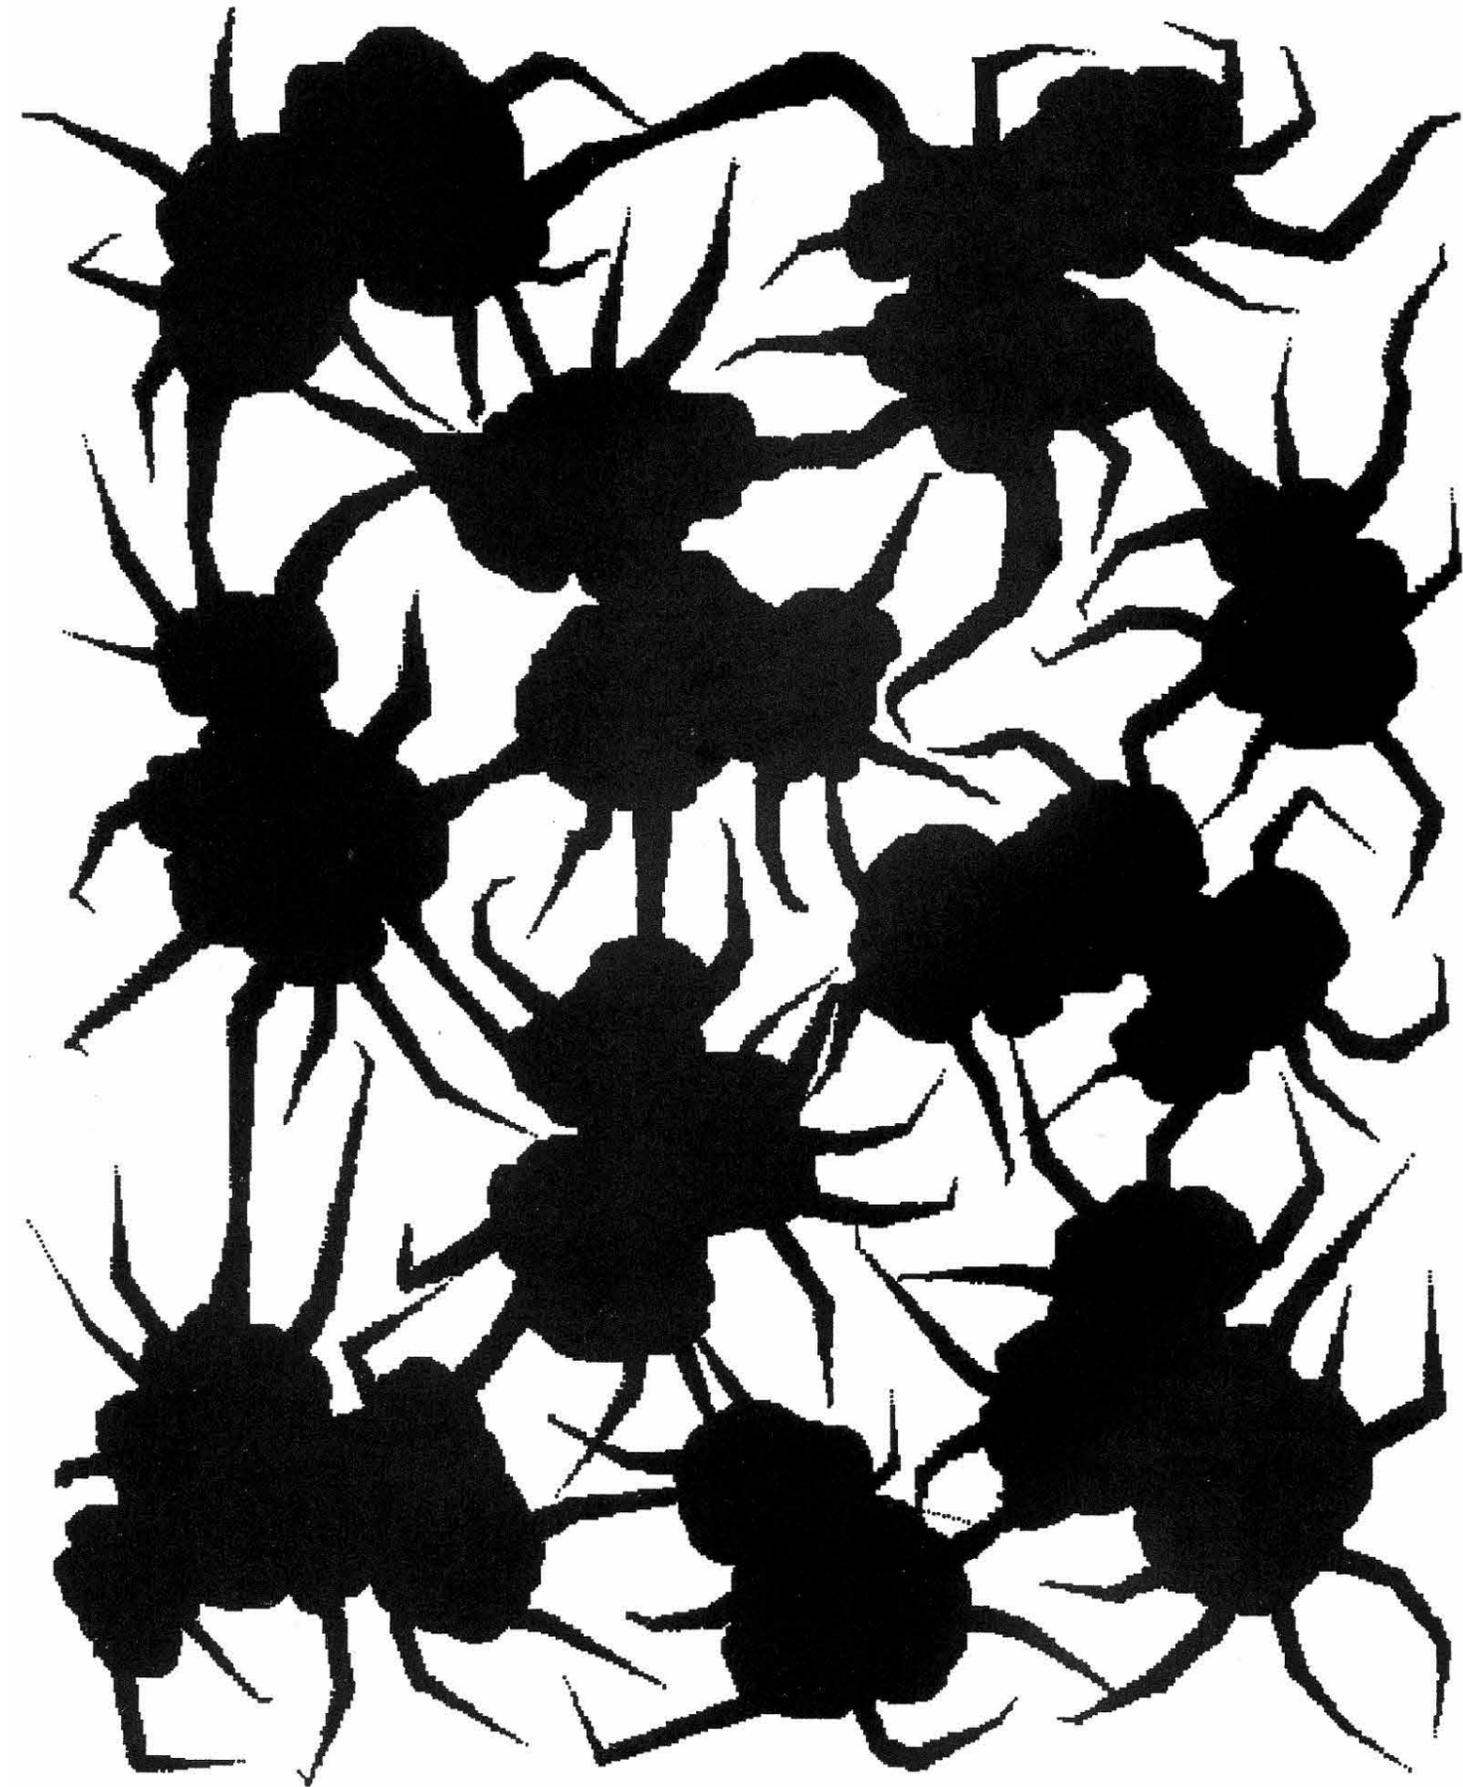

Les idées
comme de petites bêtes,

s'entre-dévorent

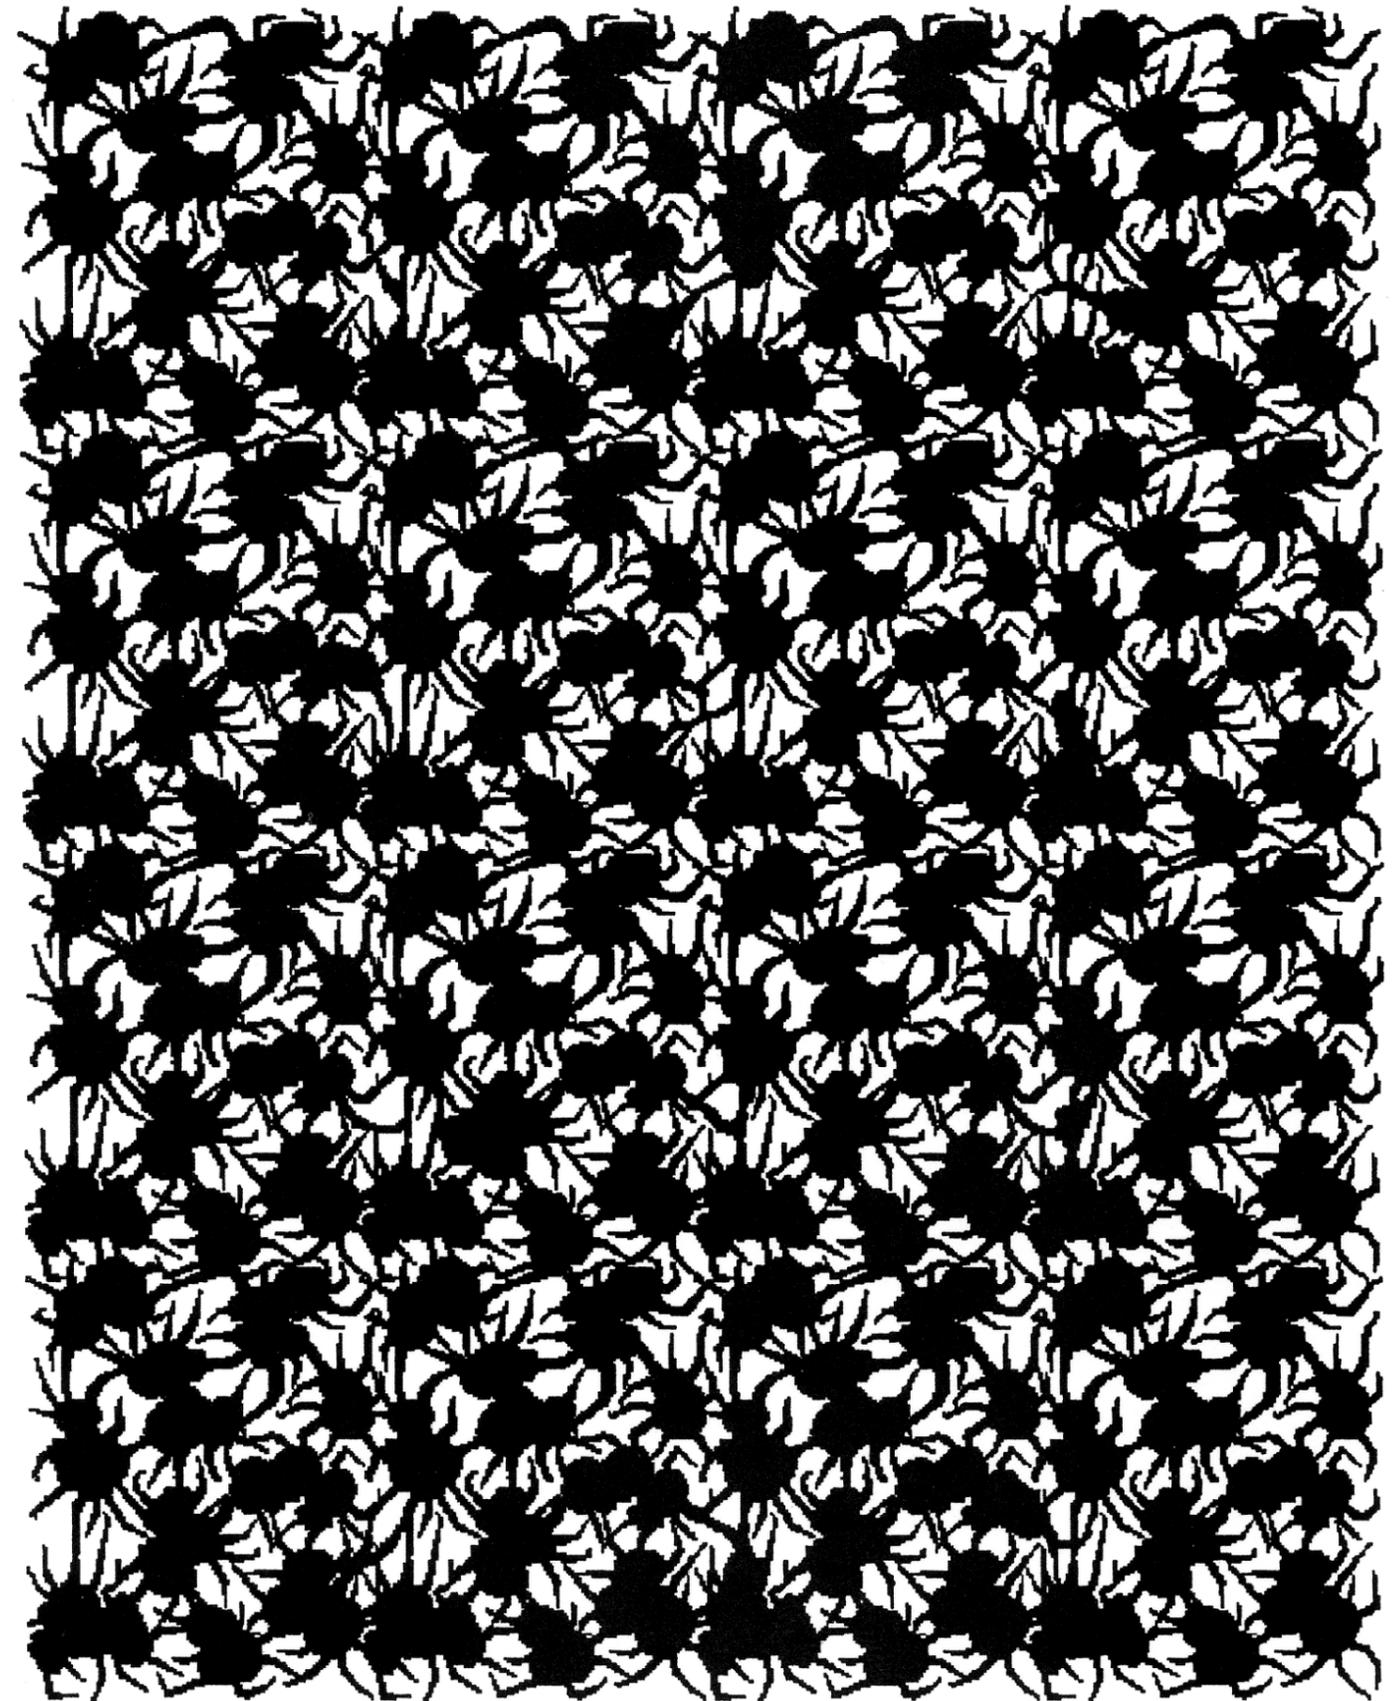

et se reproduisent.

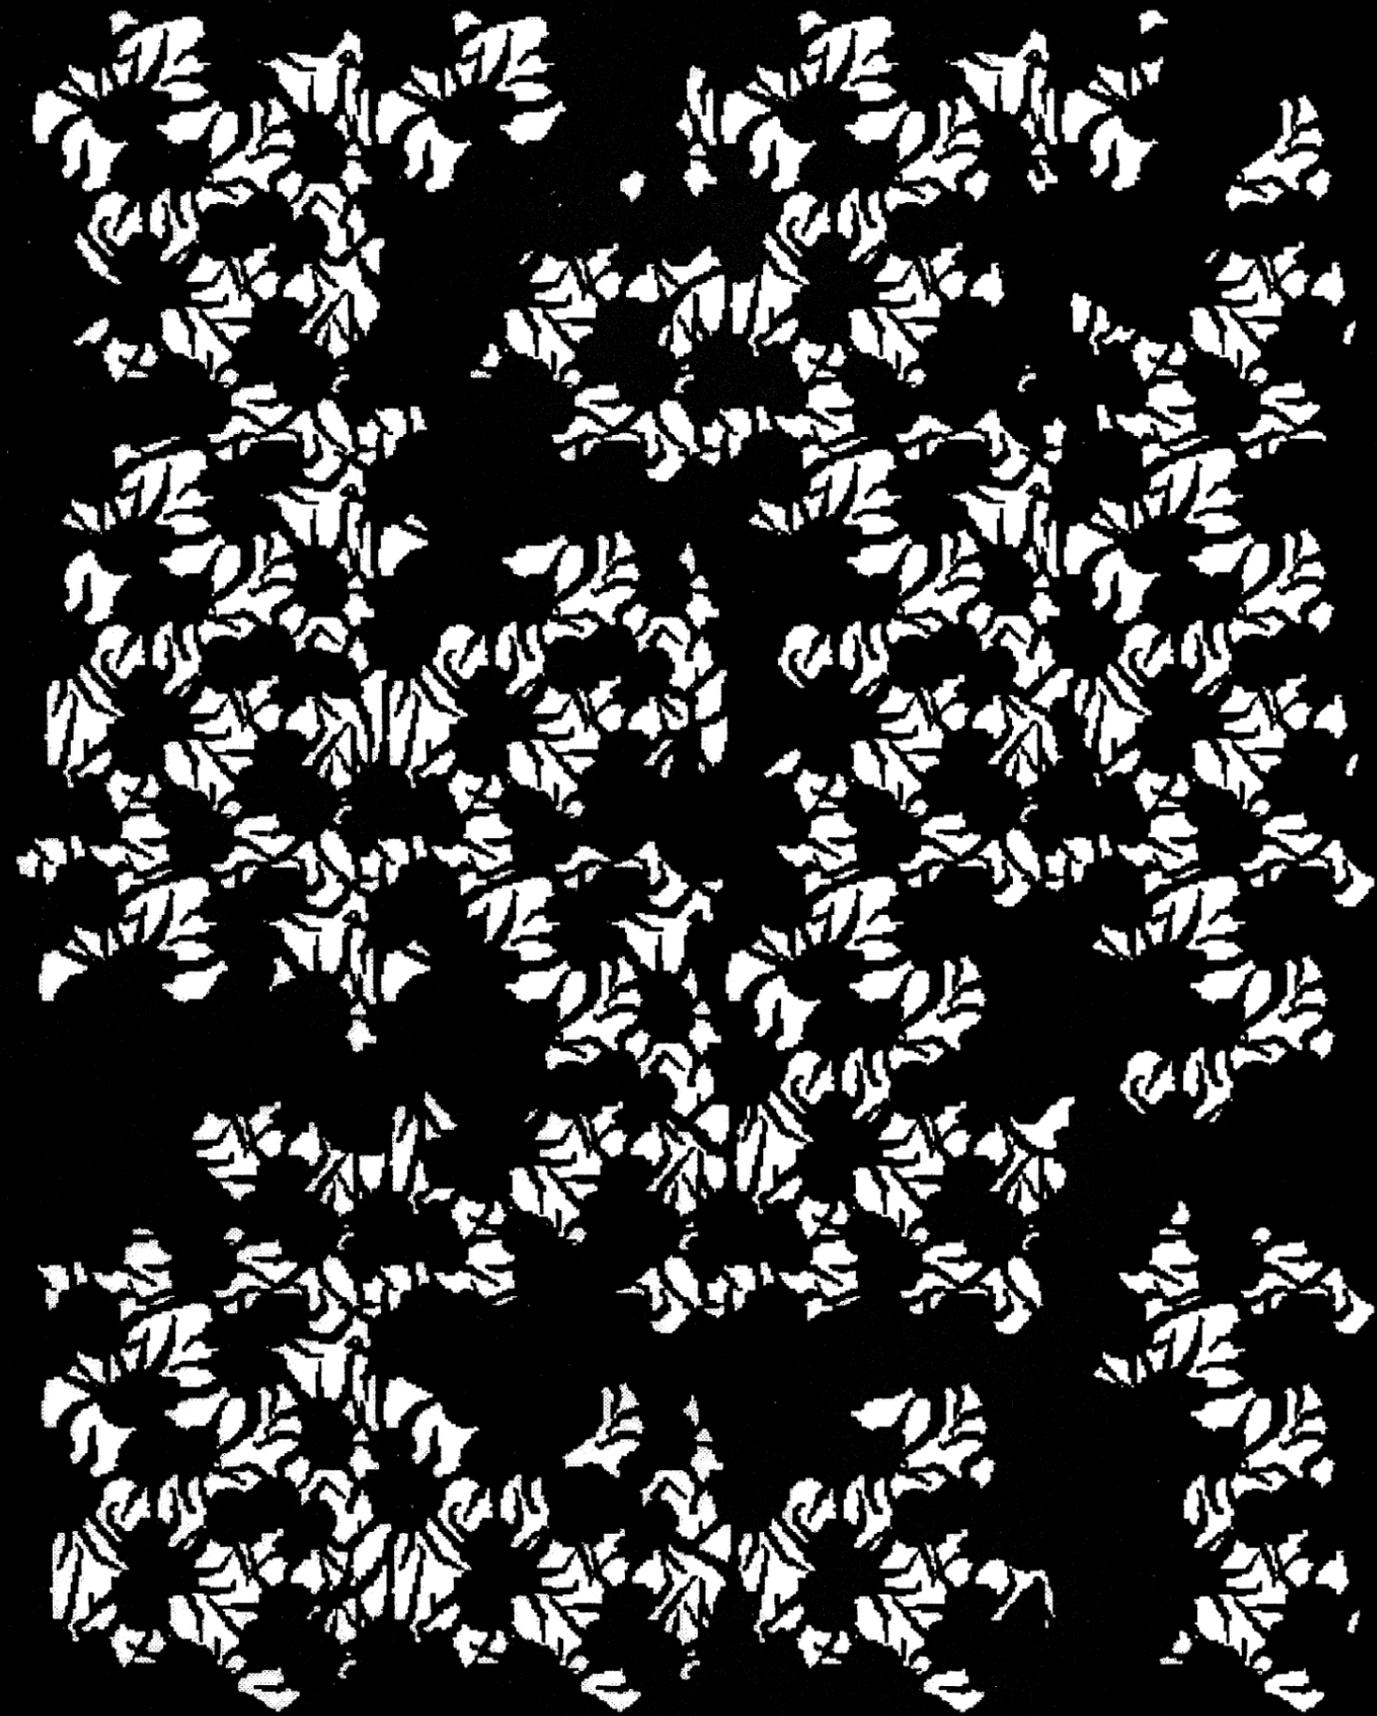

Avec trop ...

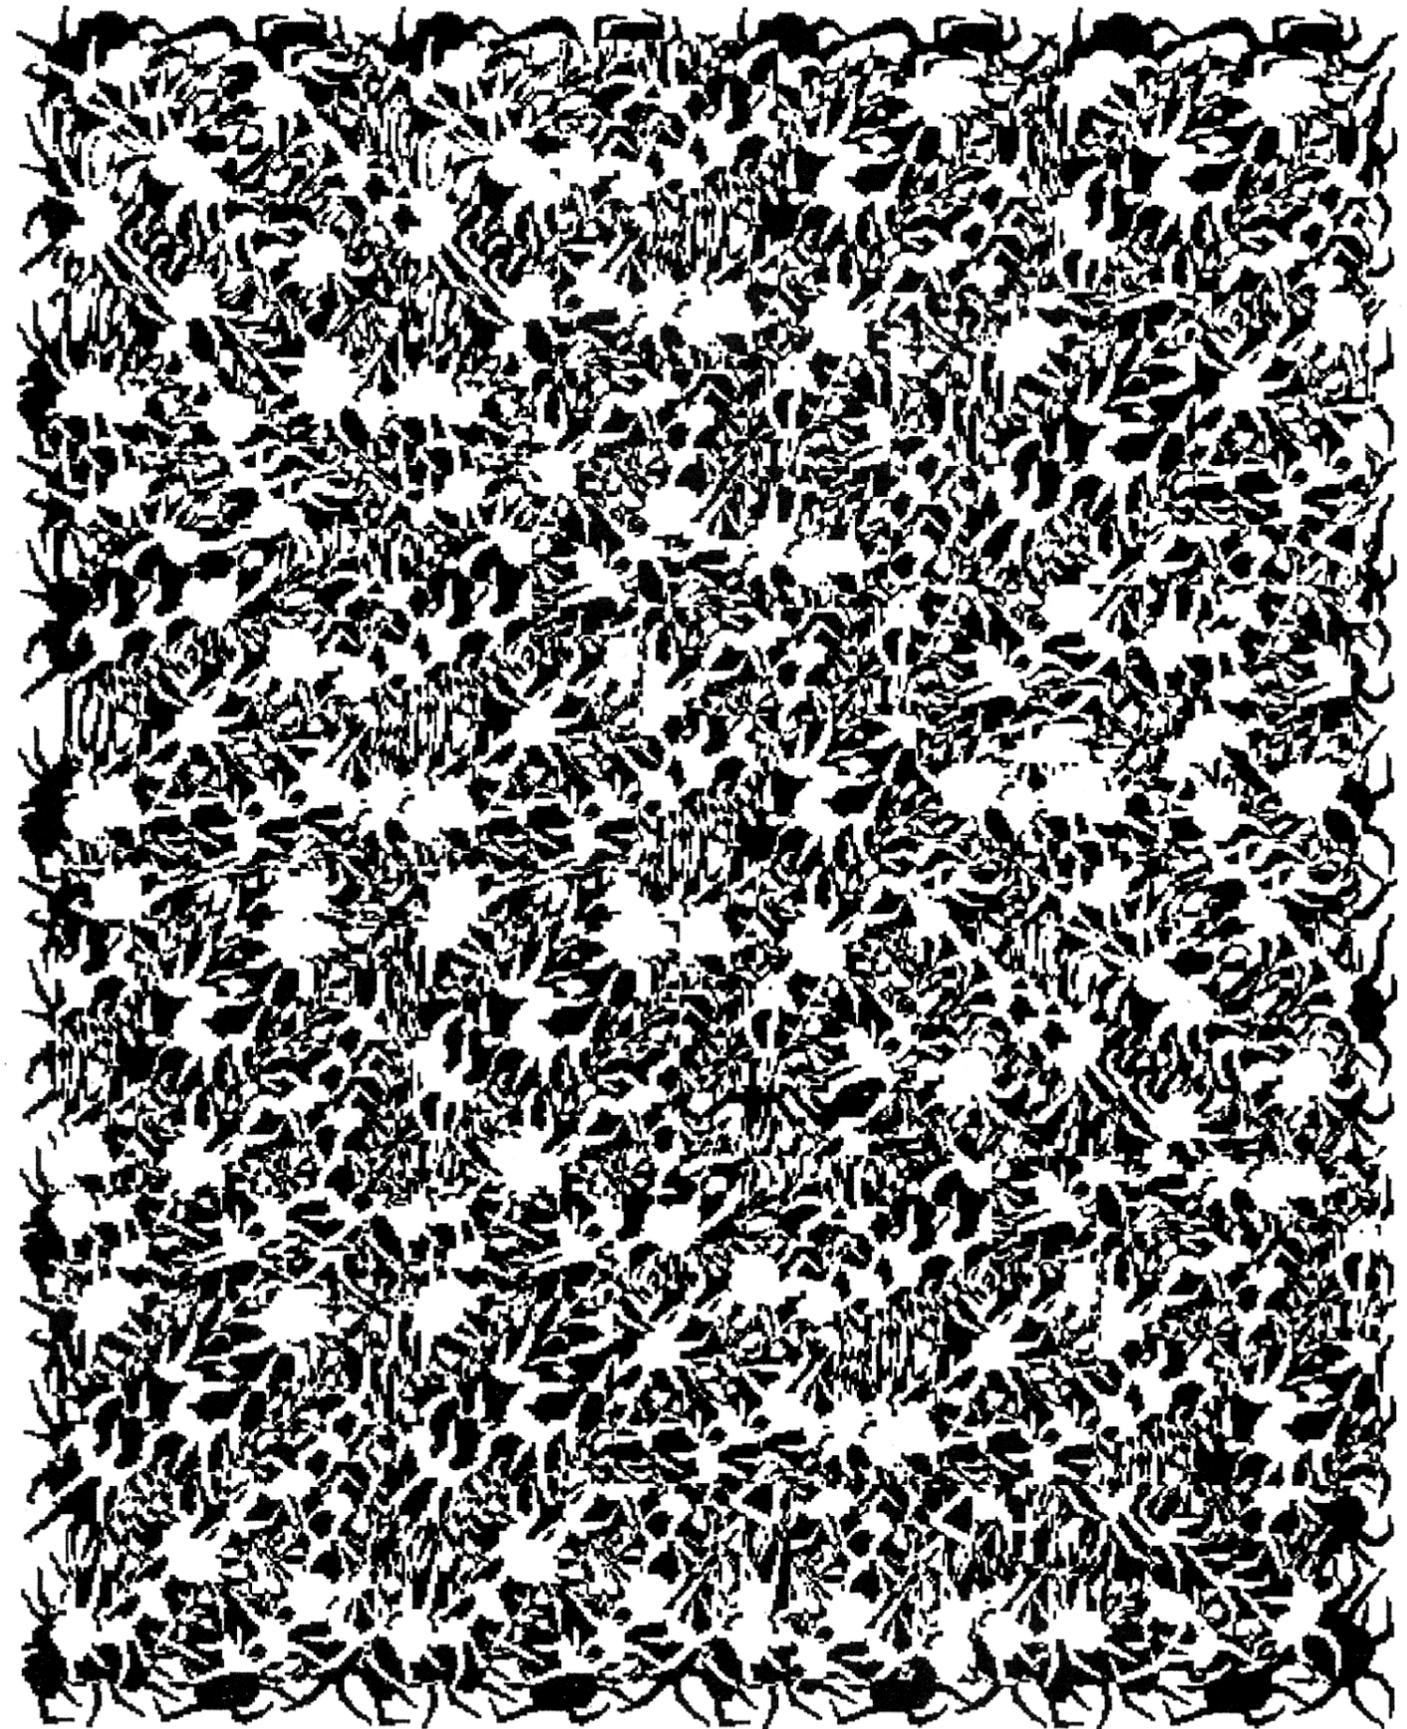

d'idées.

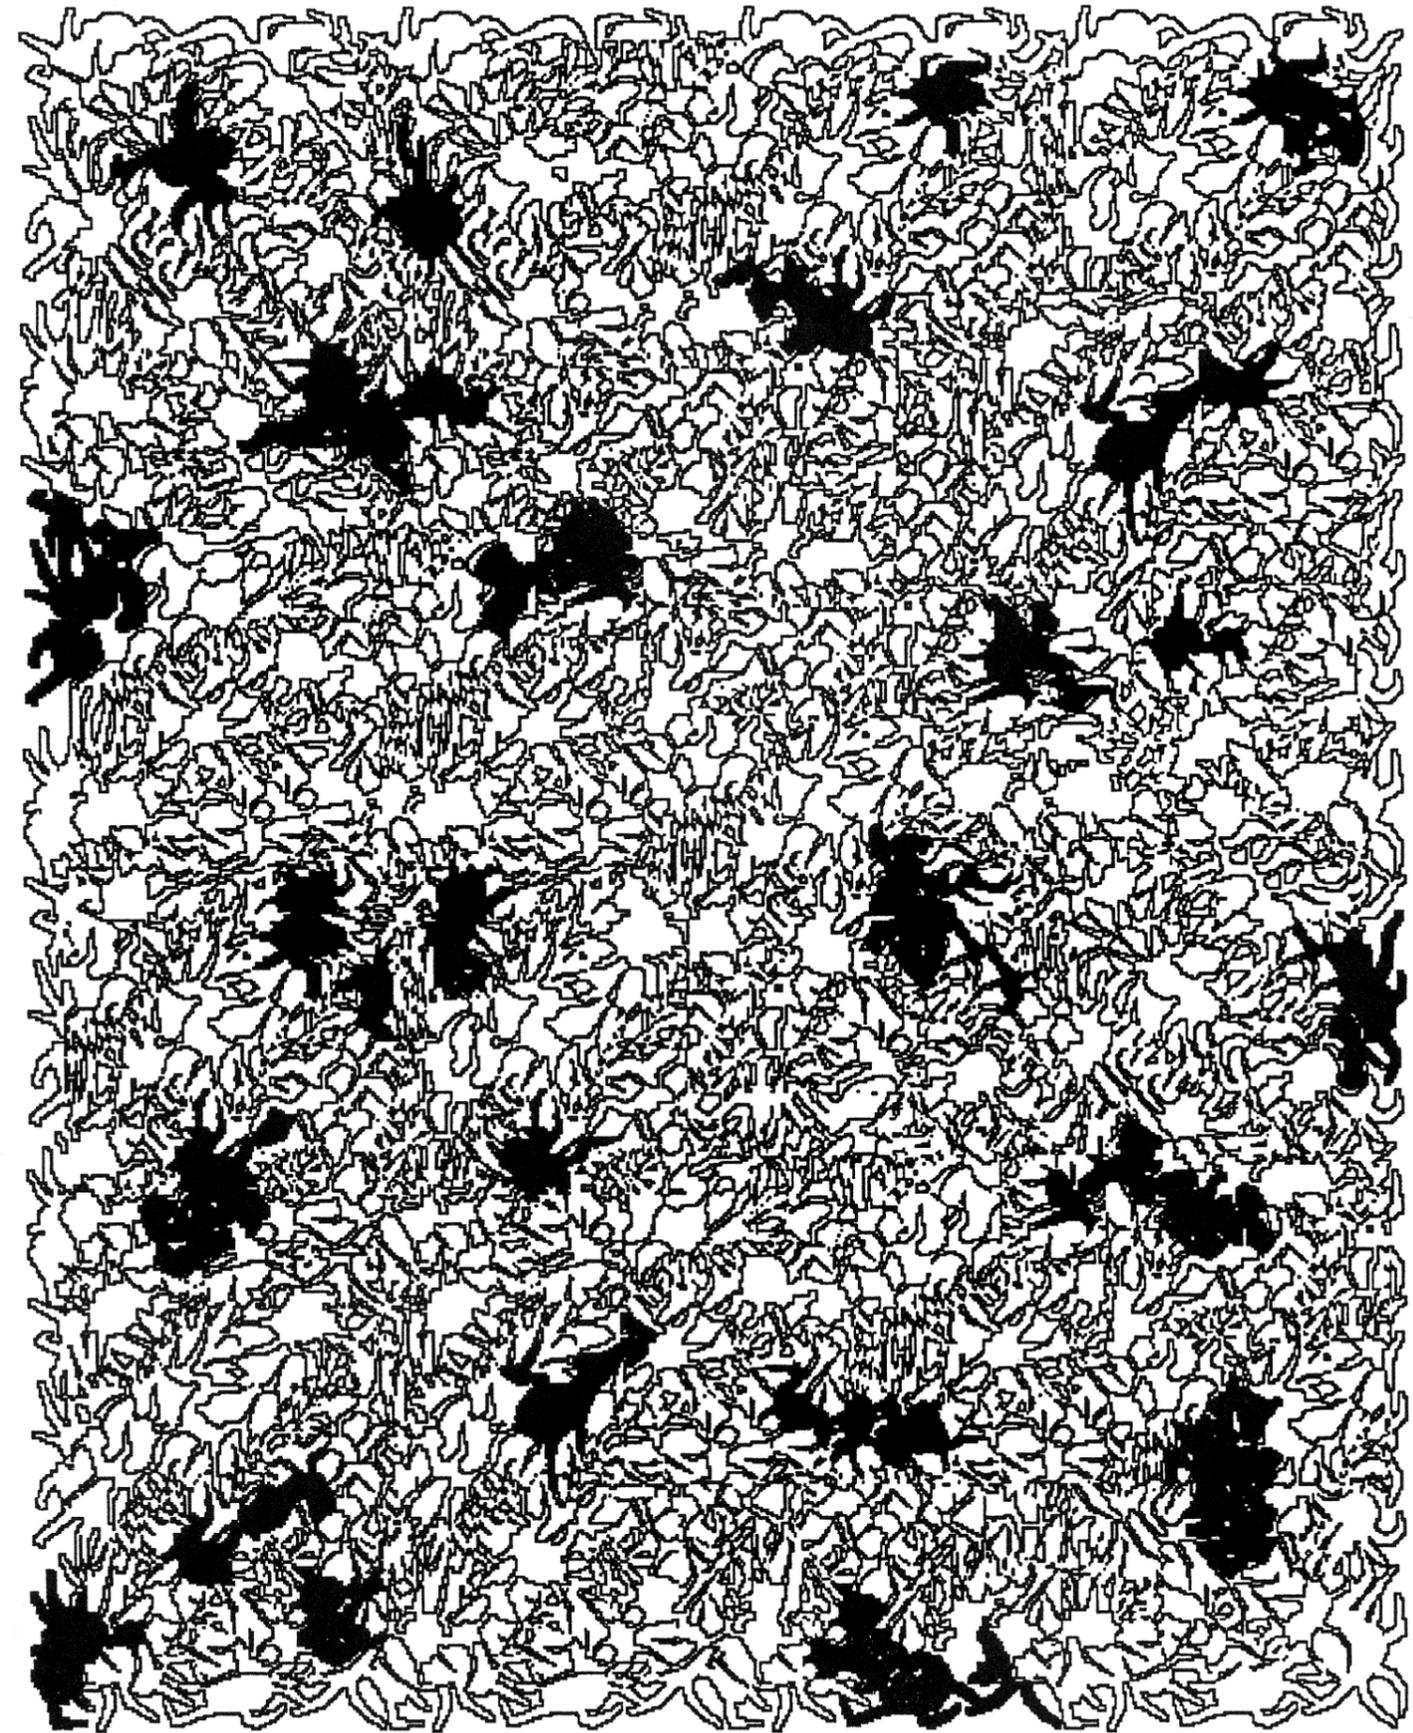

Je perd la tête,

je m'embrouille.

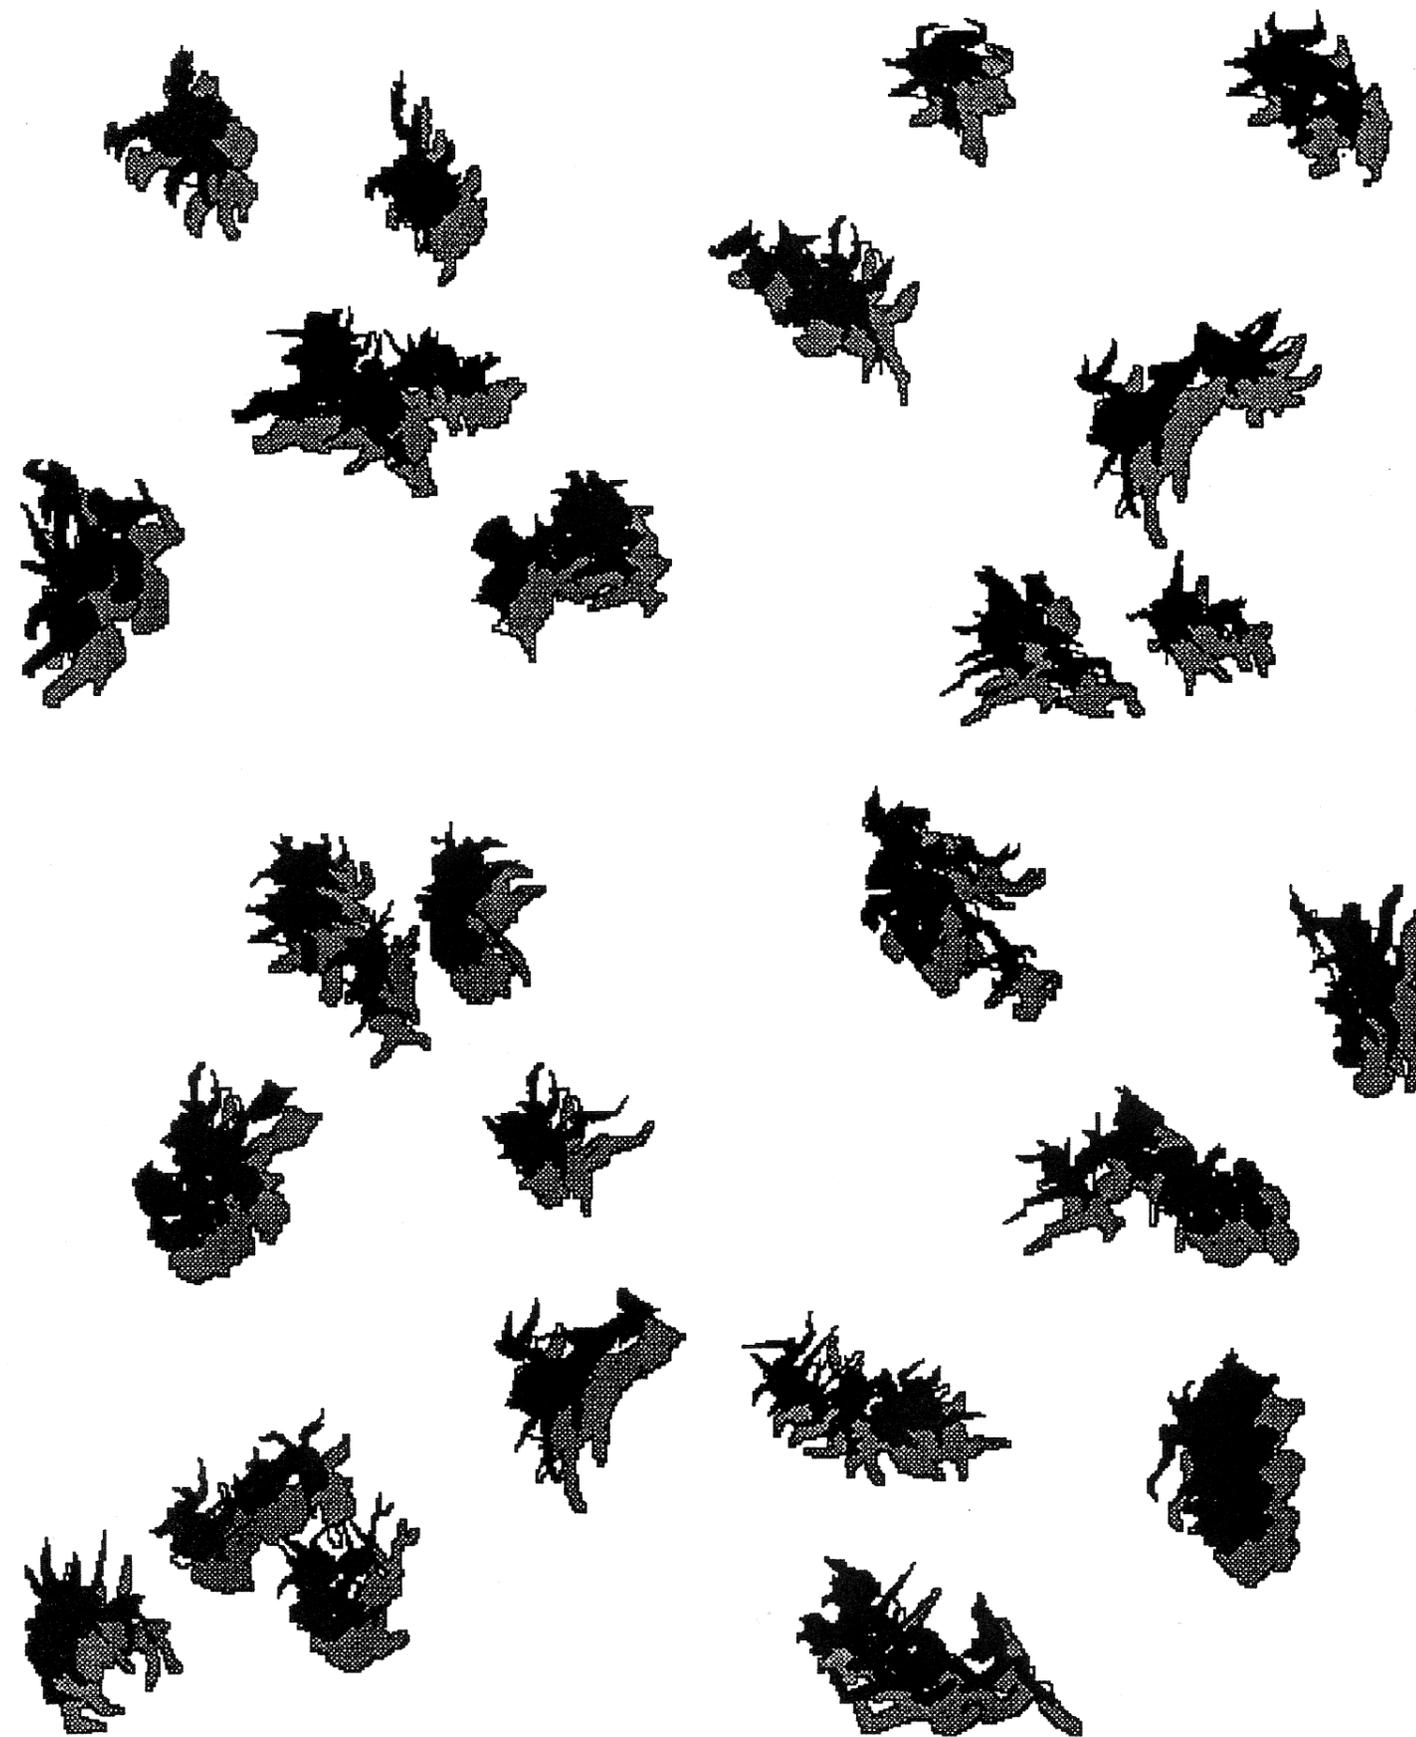

Il faut choisir,

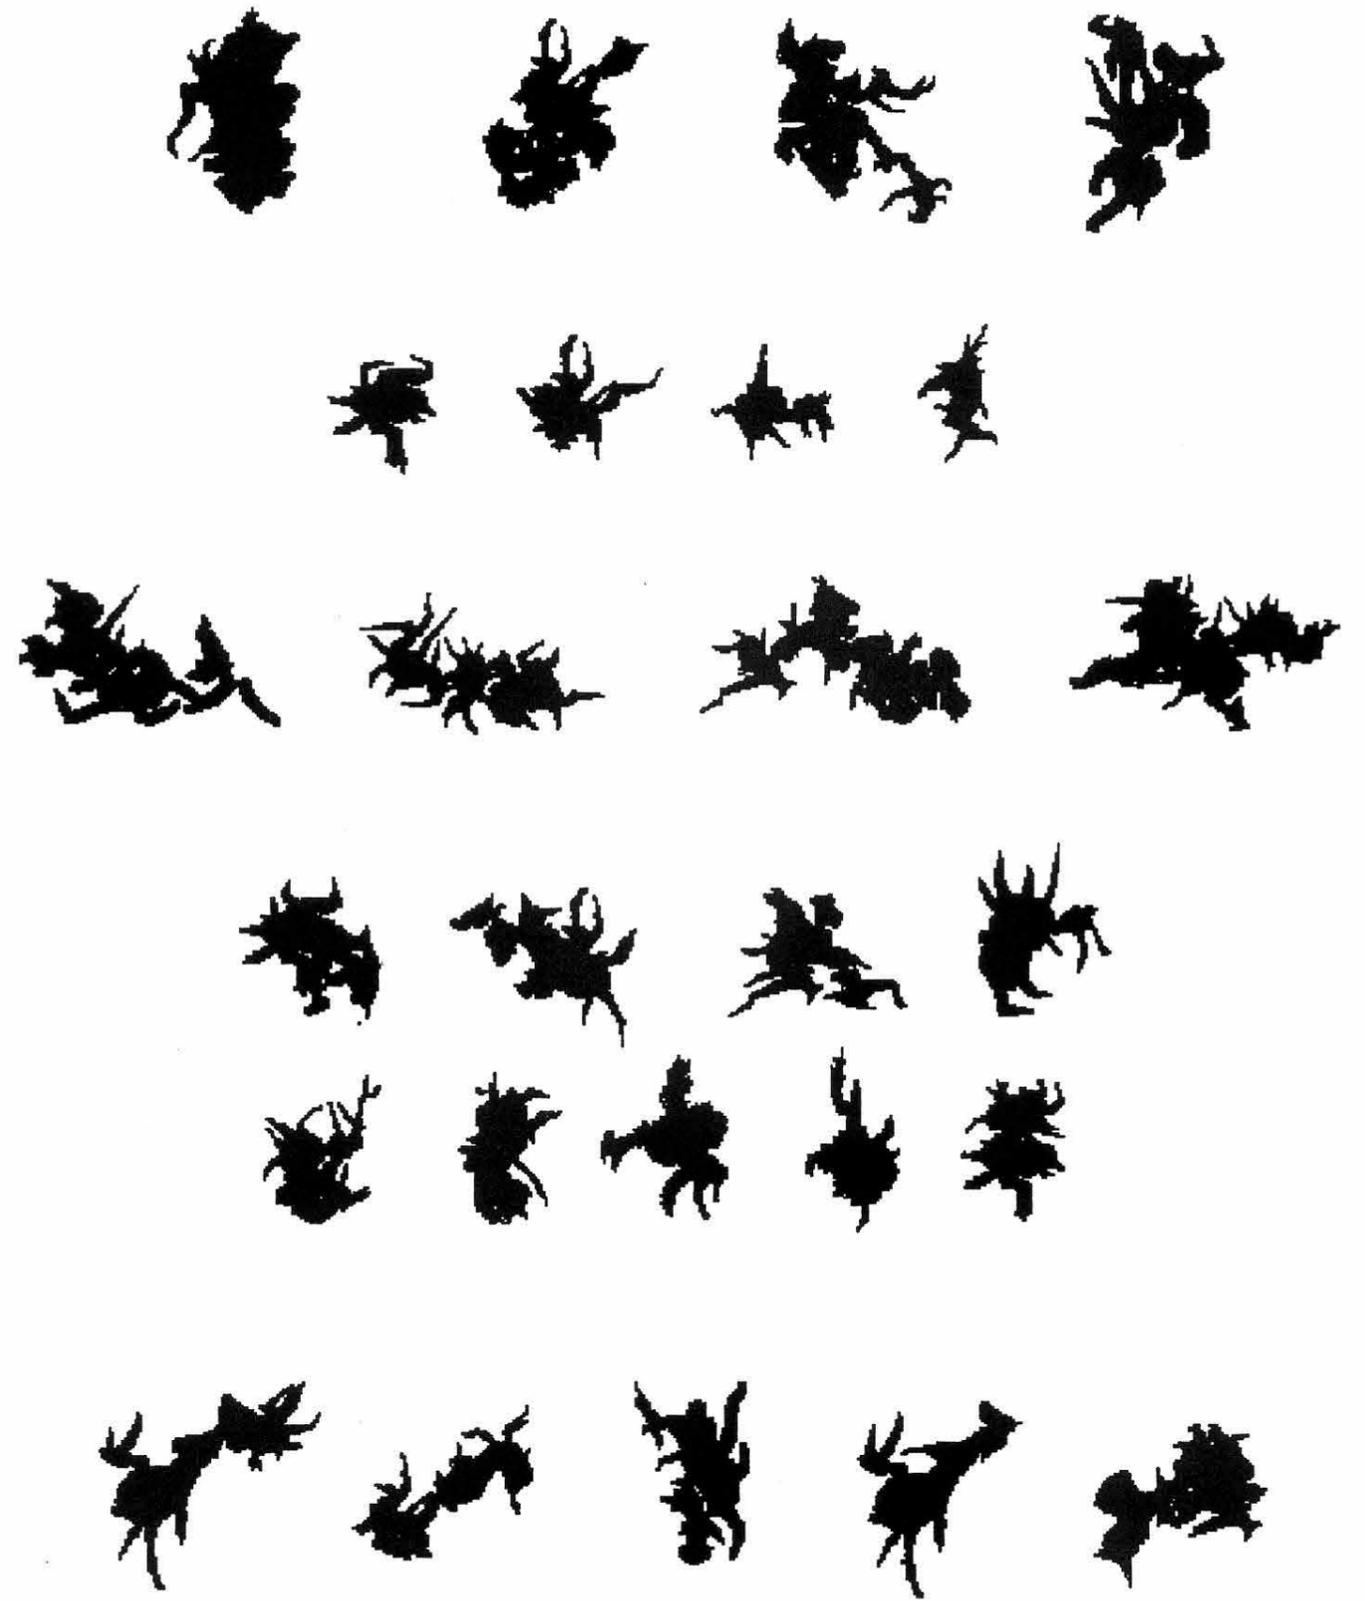

trier,

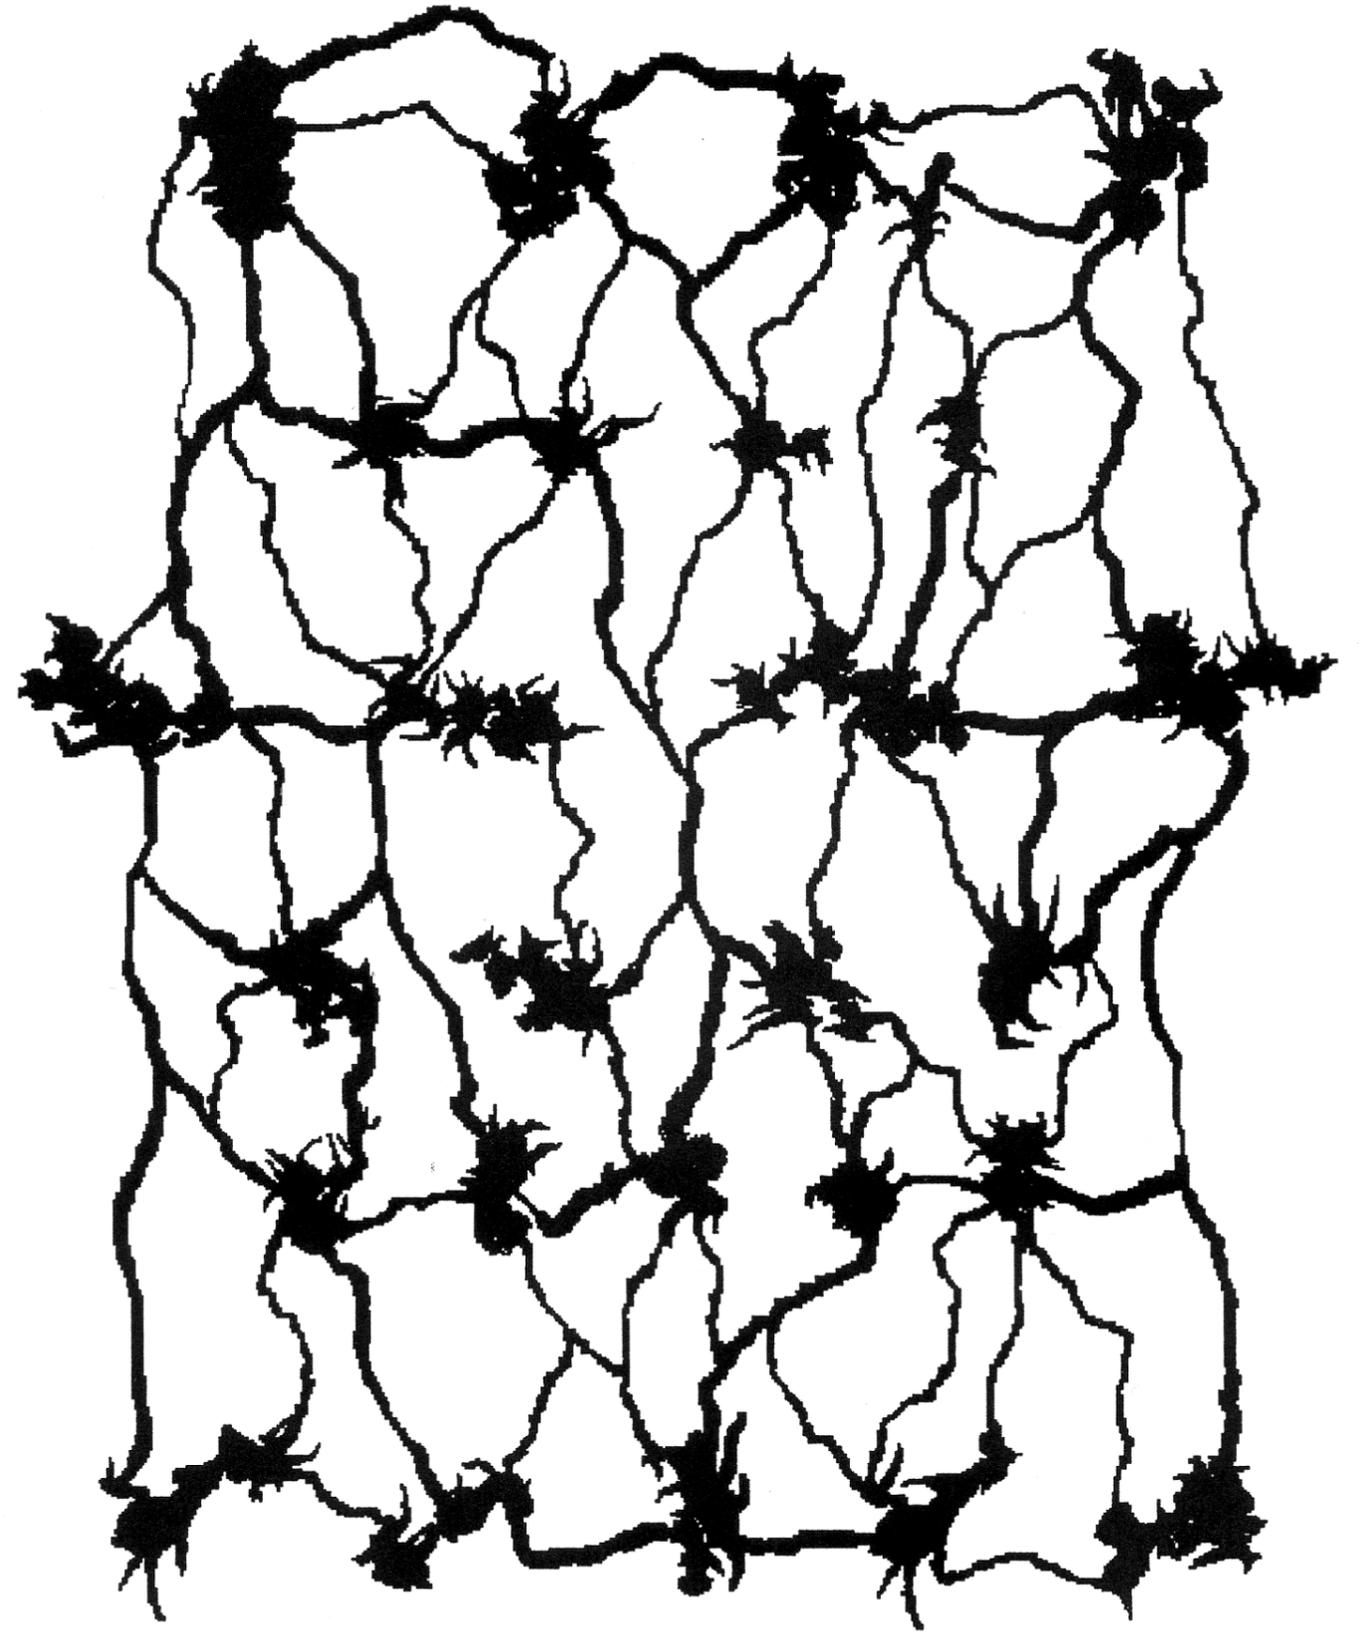

mémoriser,

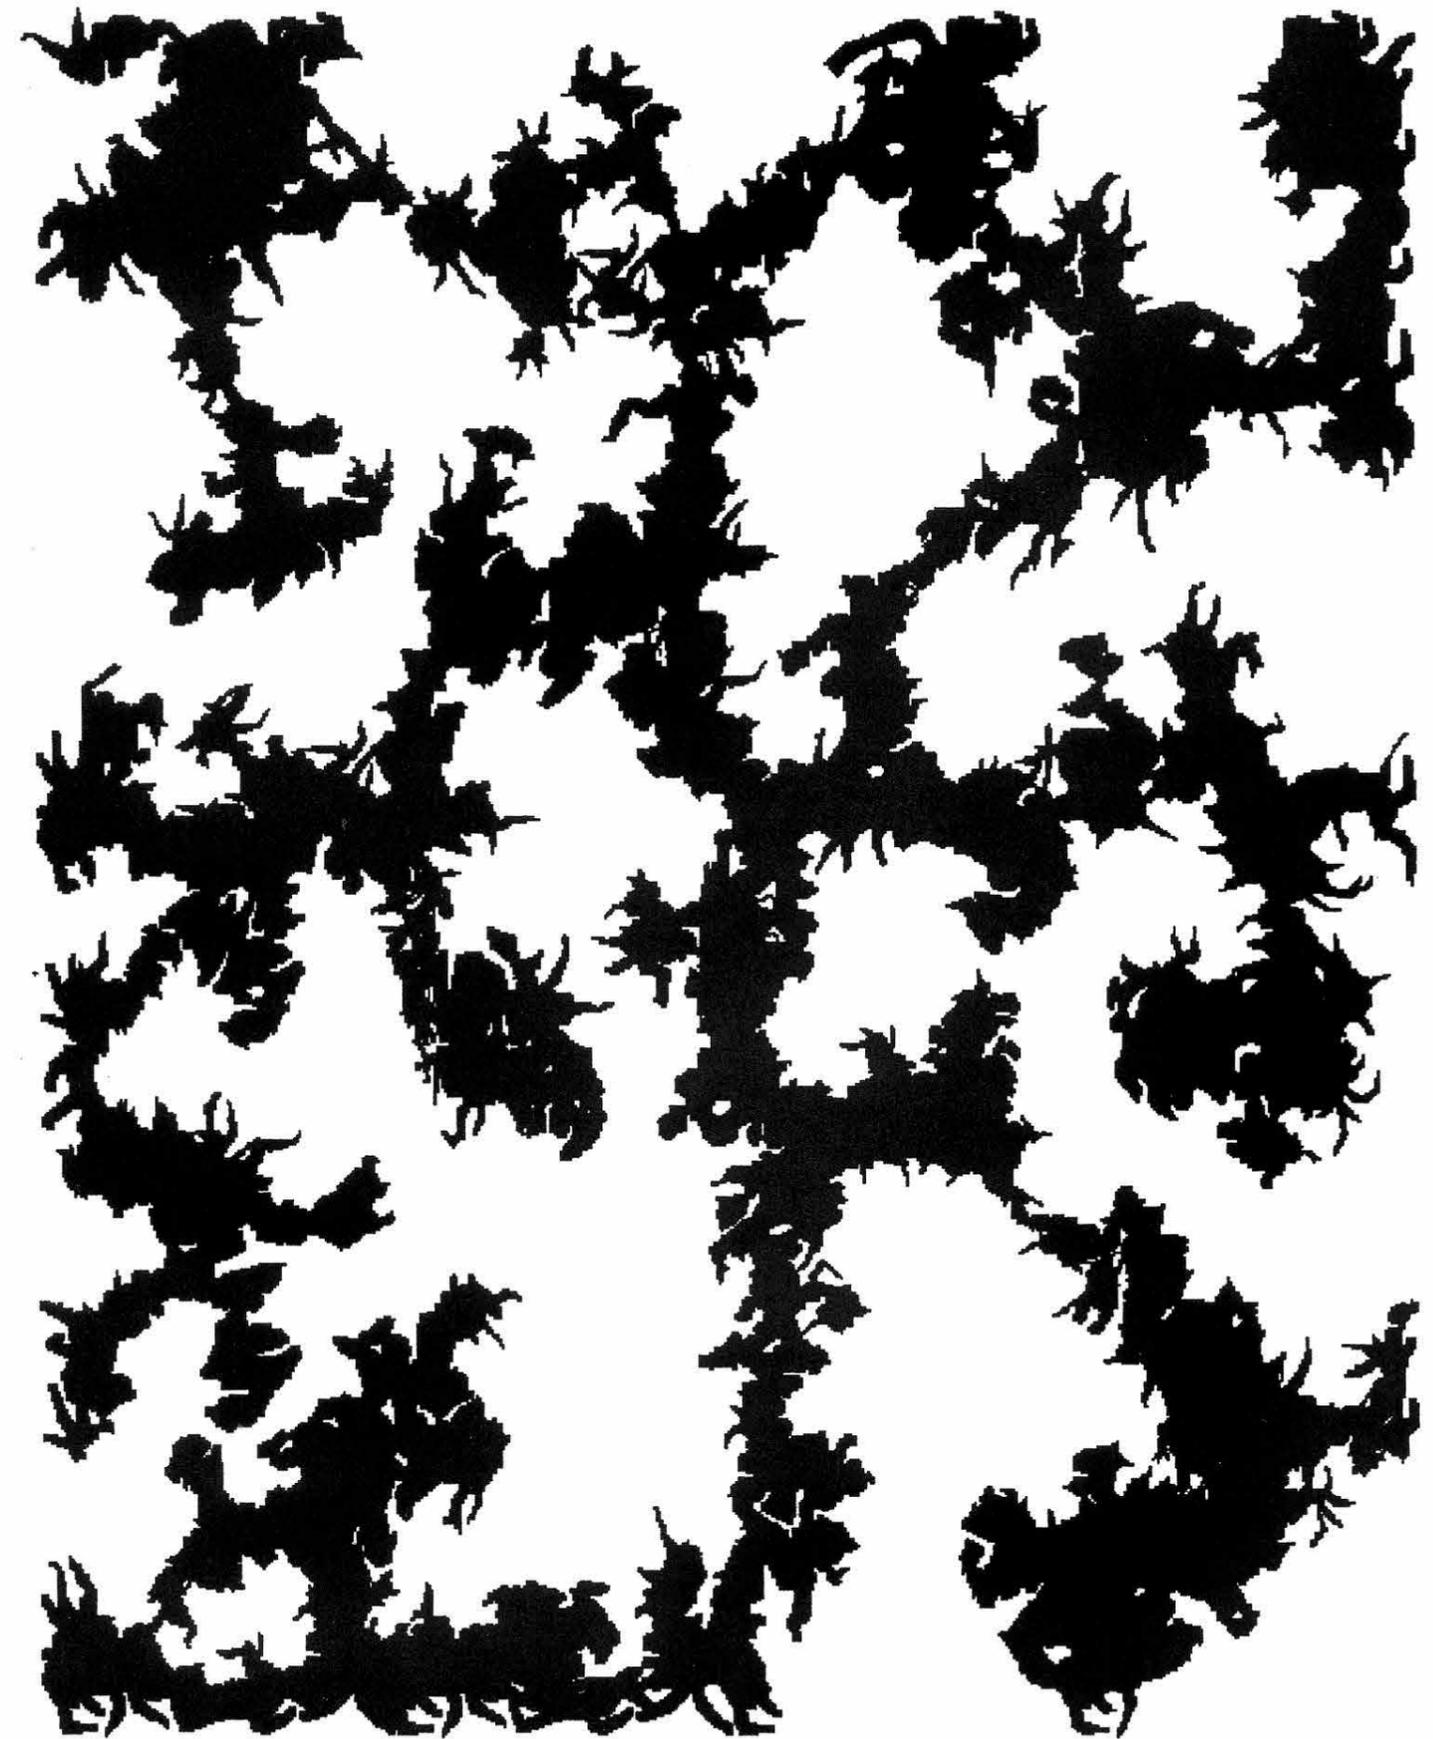

classer,

relier,

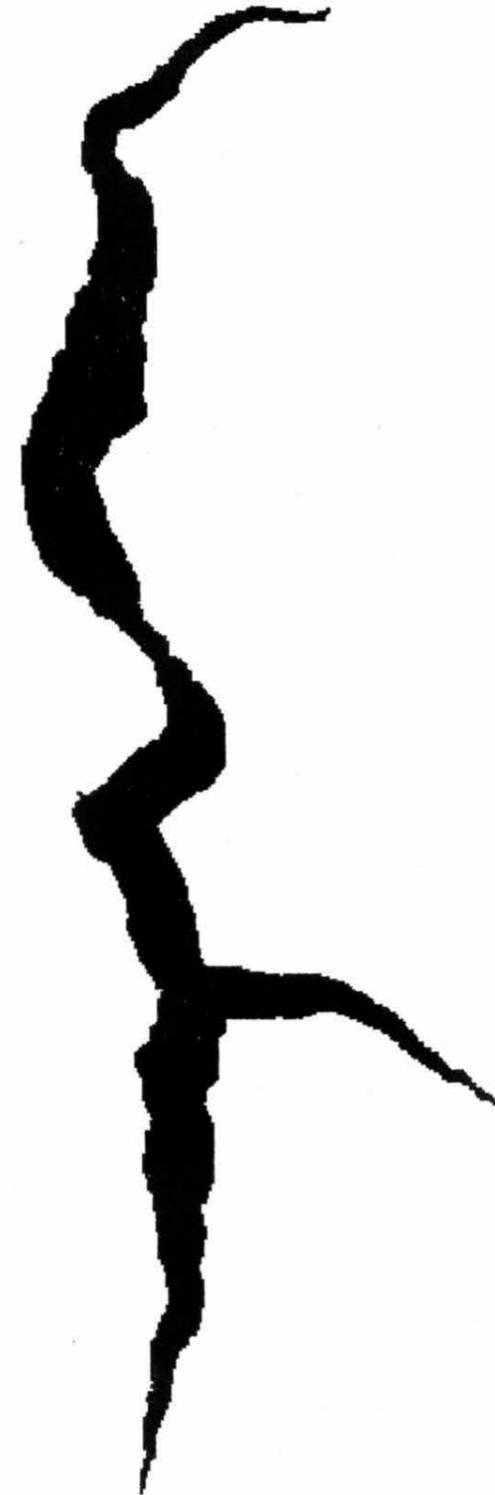

associer

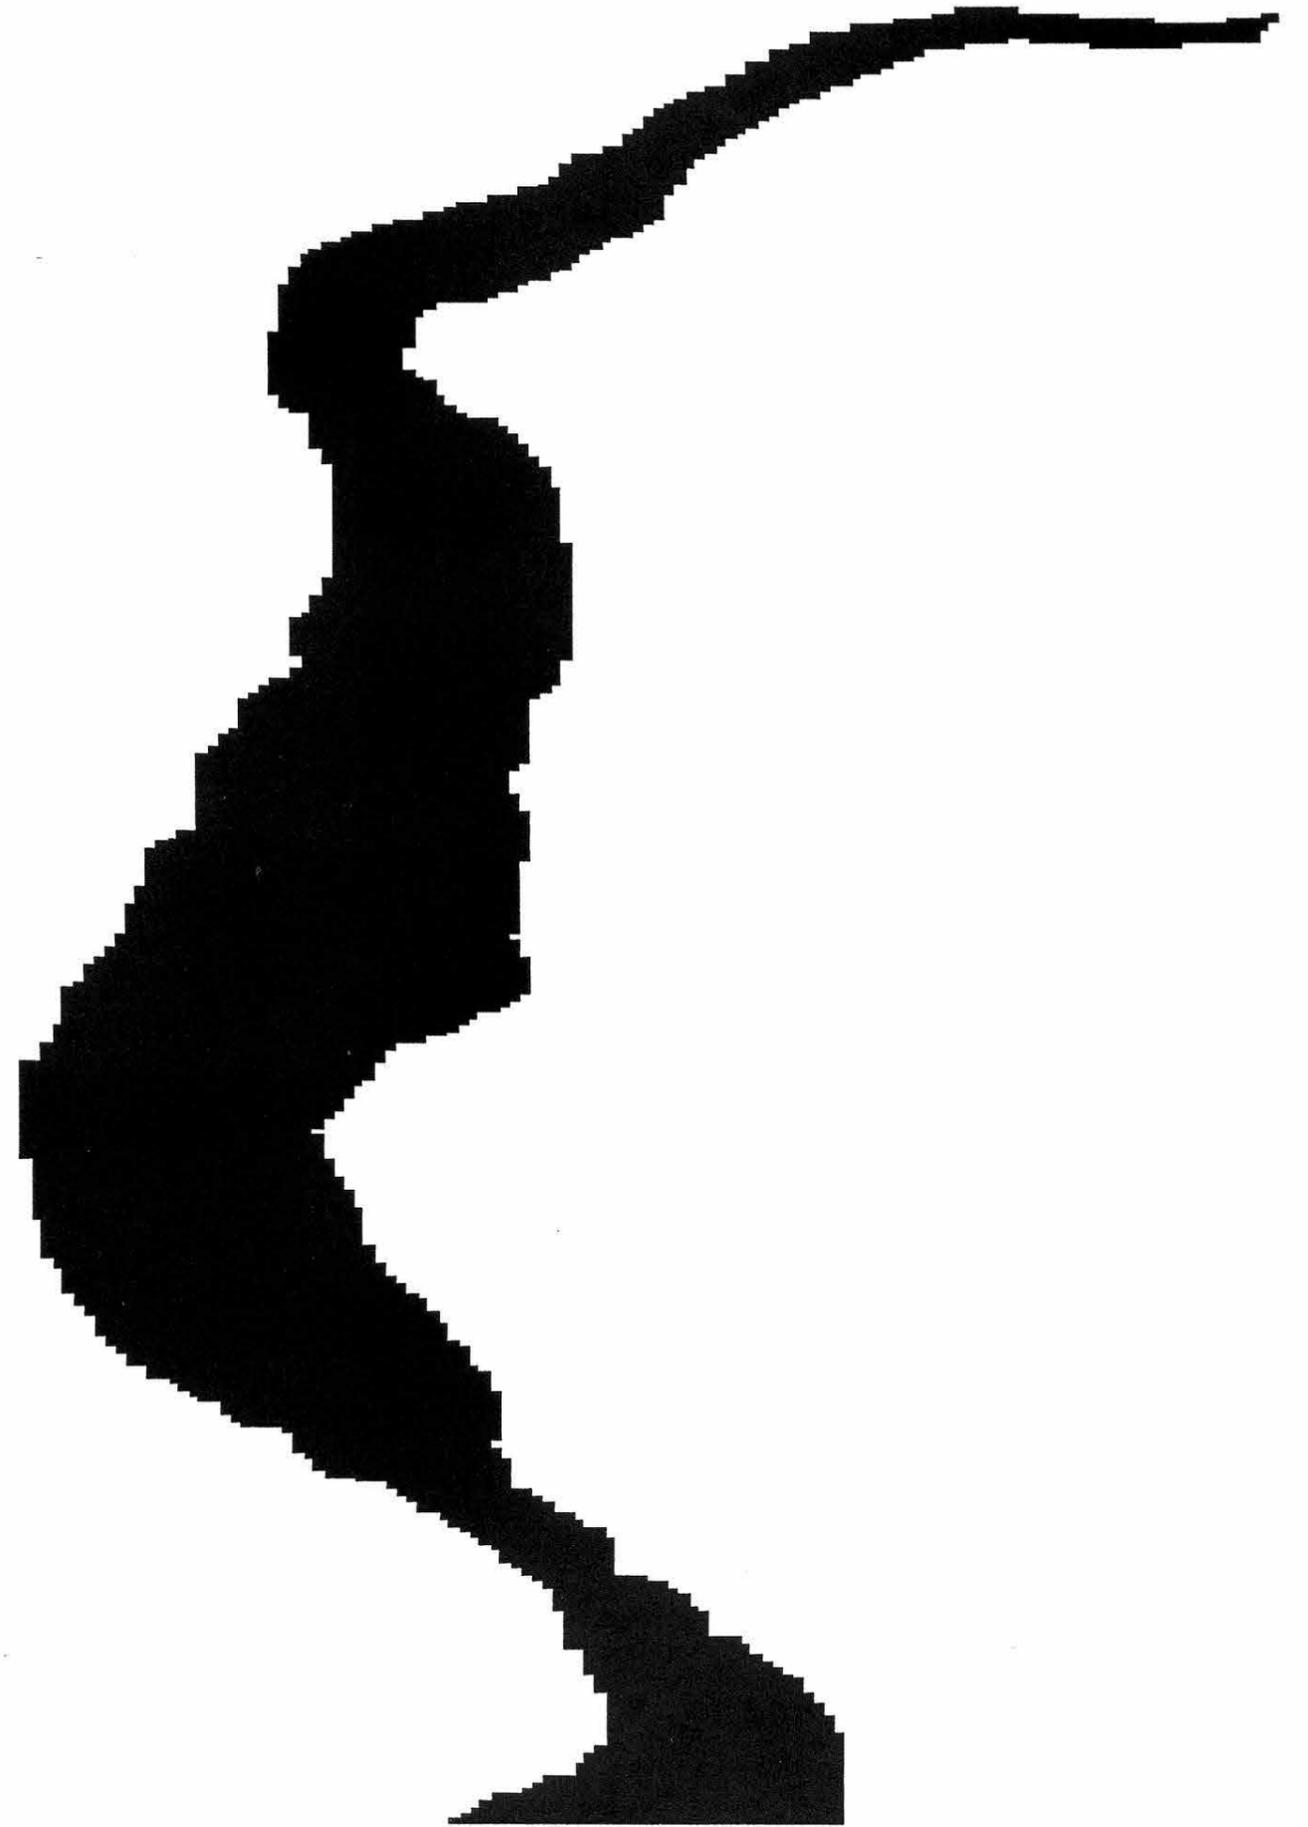

et simplifier,

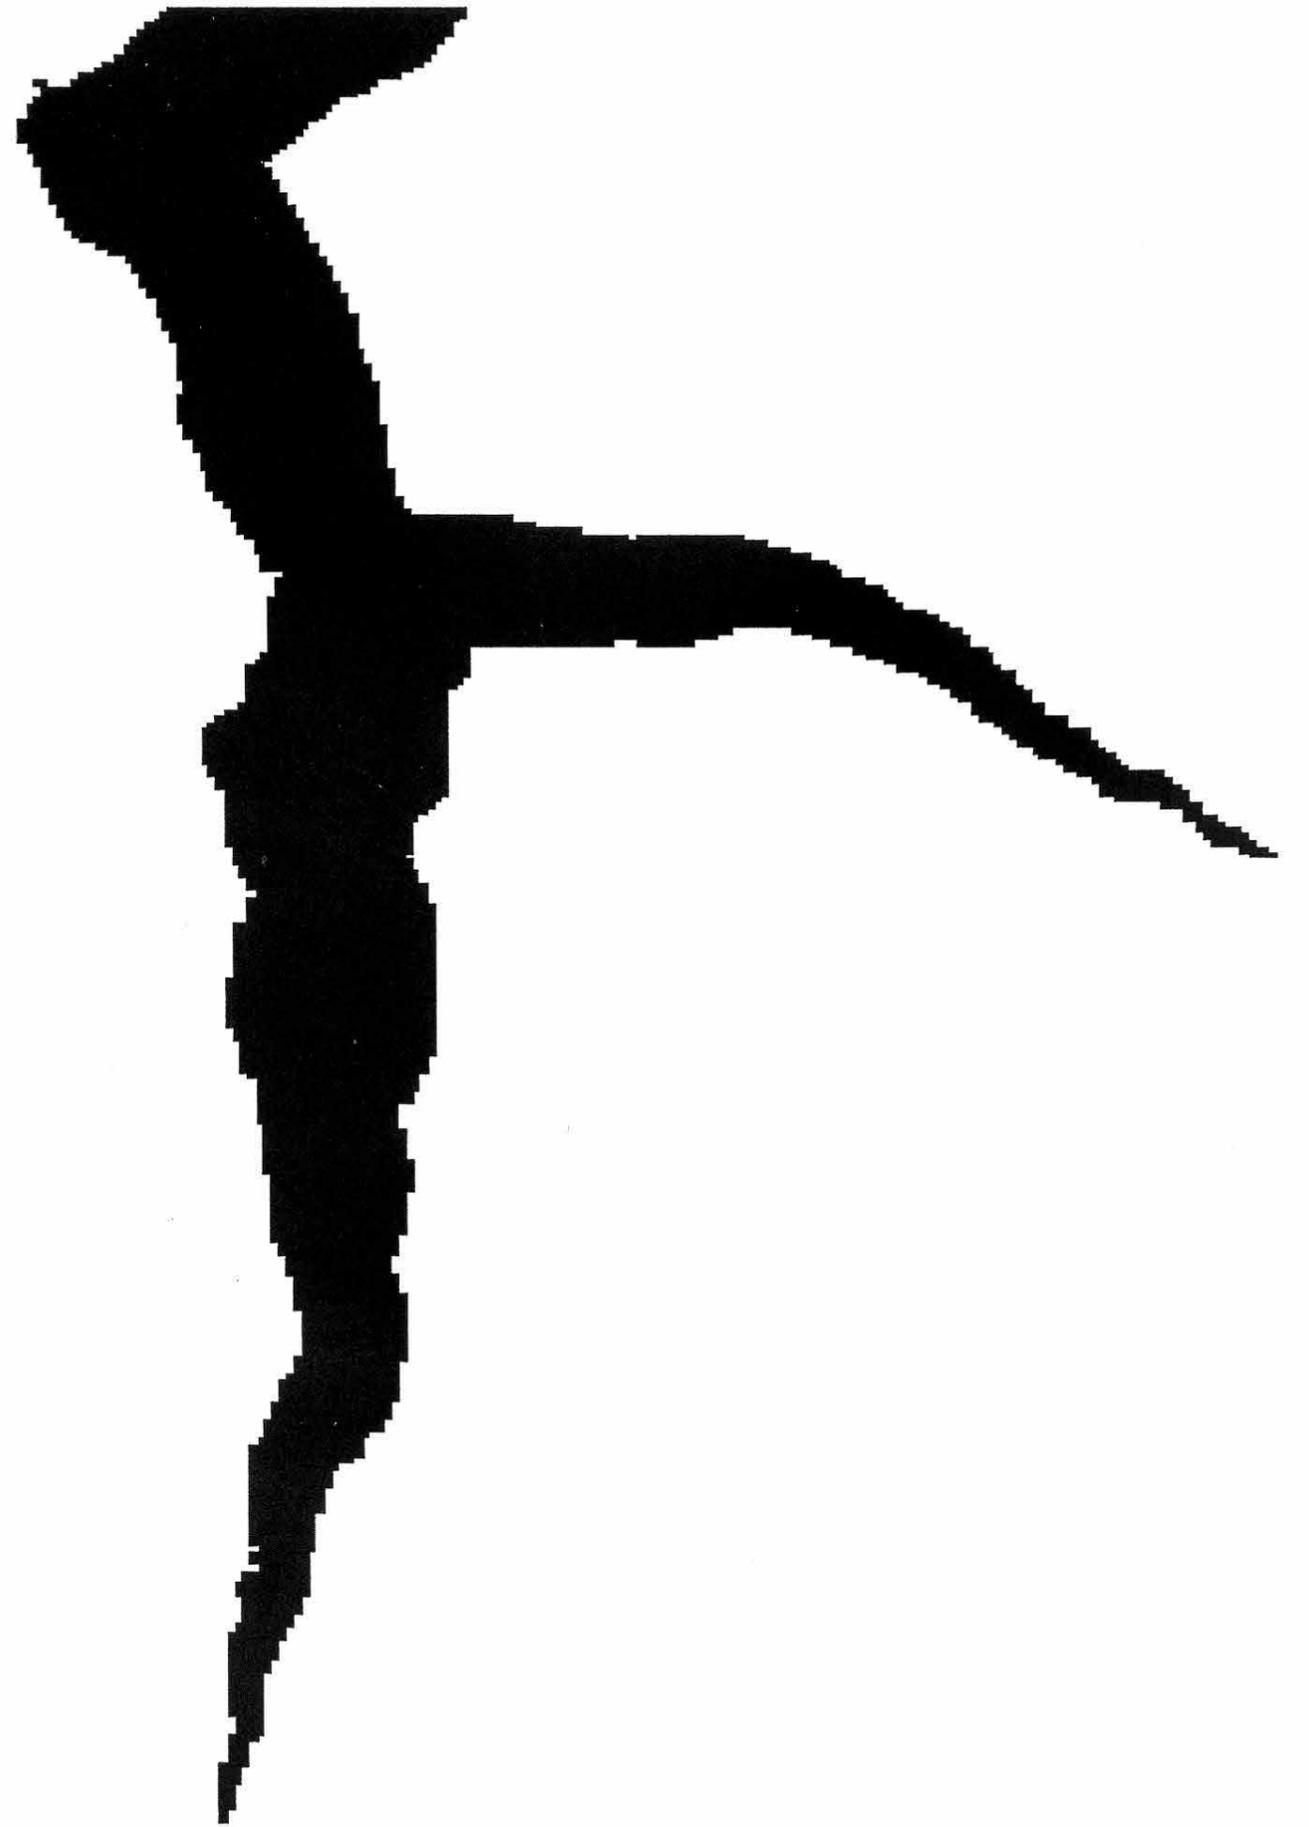

Oh!
Je viens d'avoir une idée.

Une grande

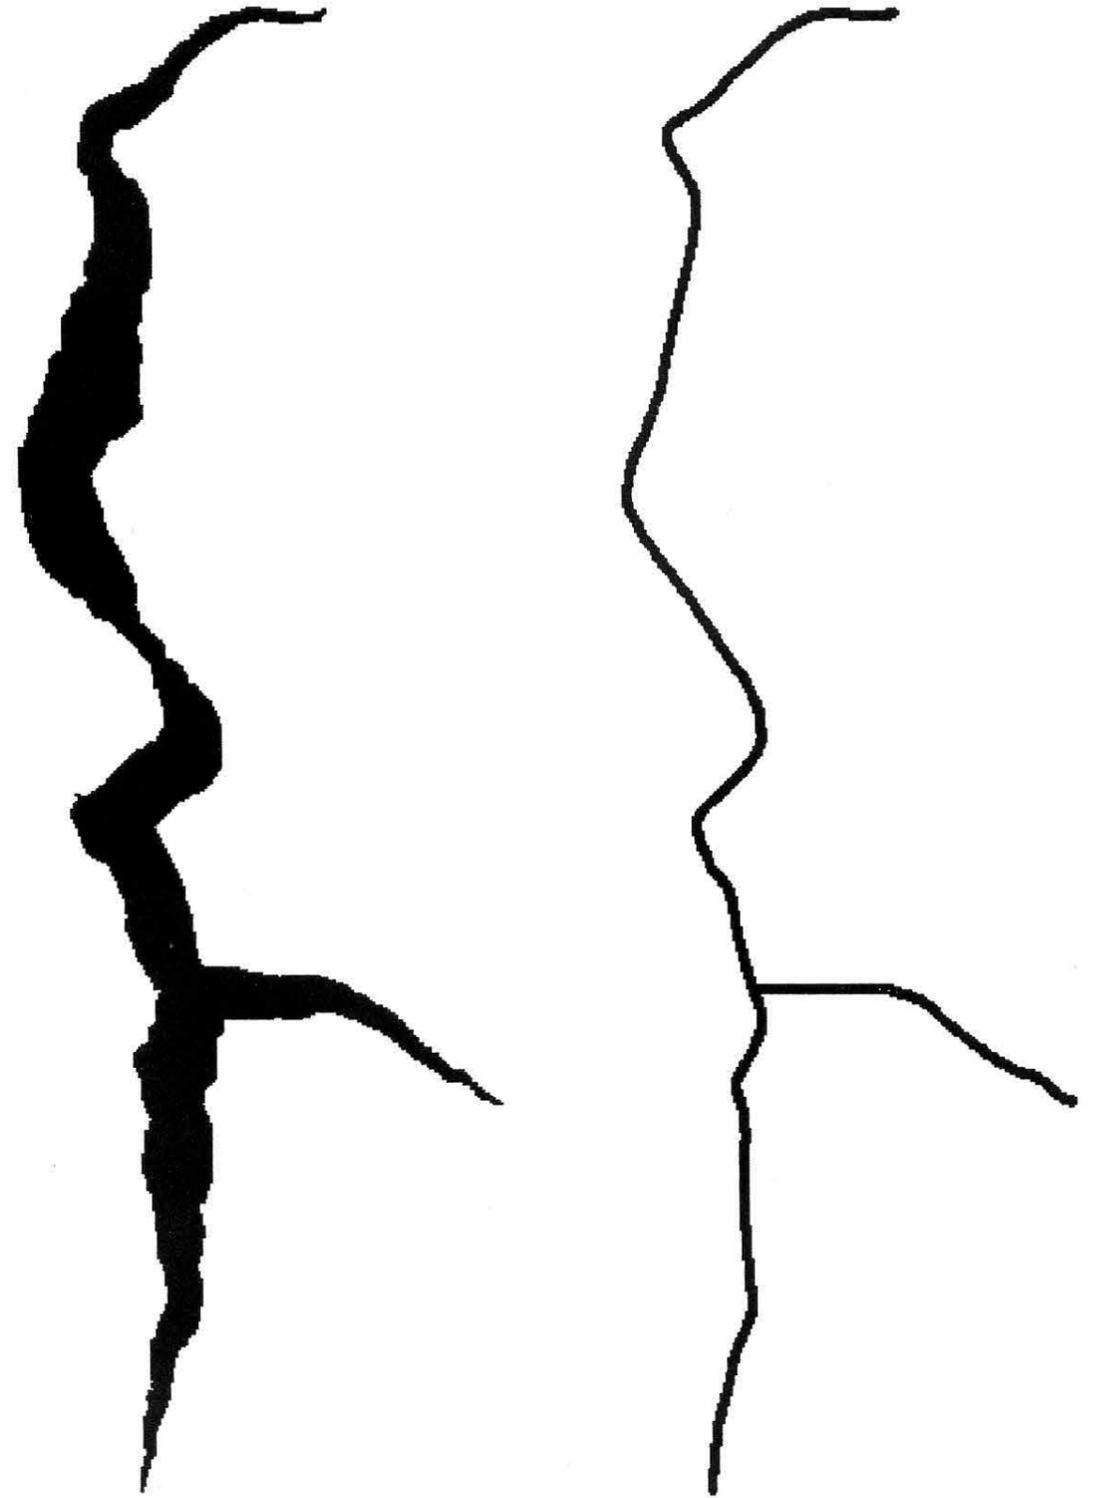

idée.

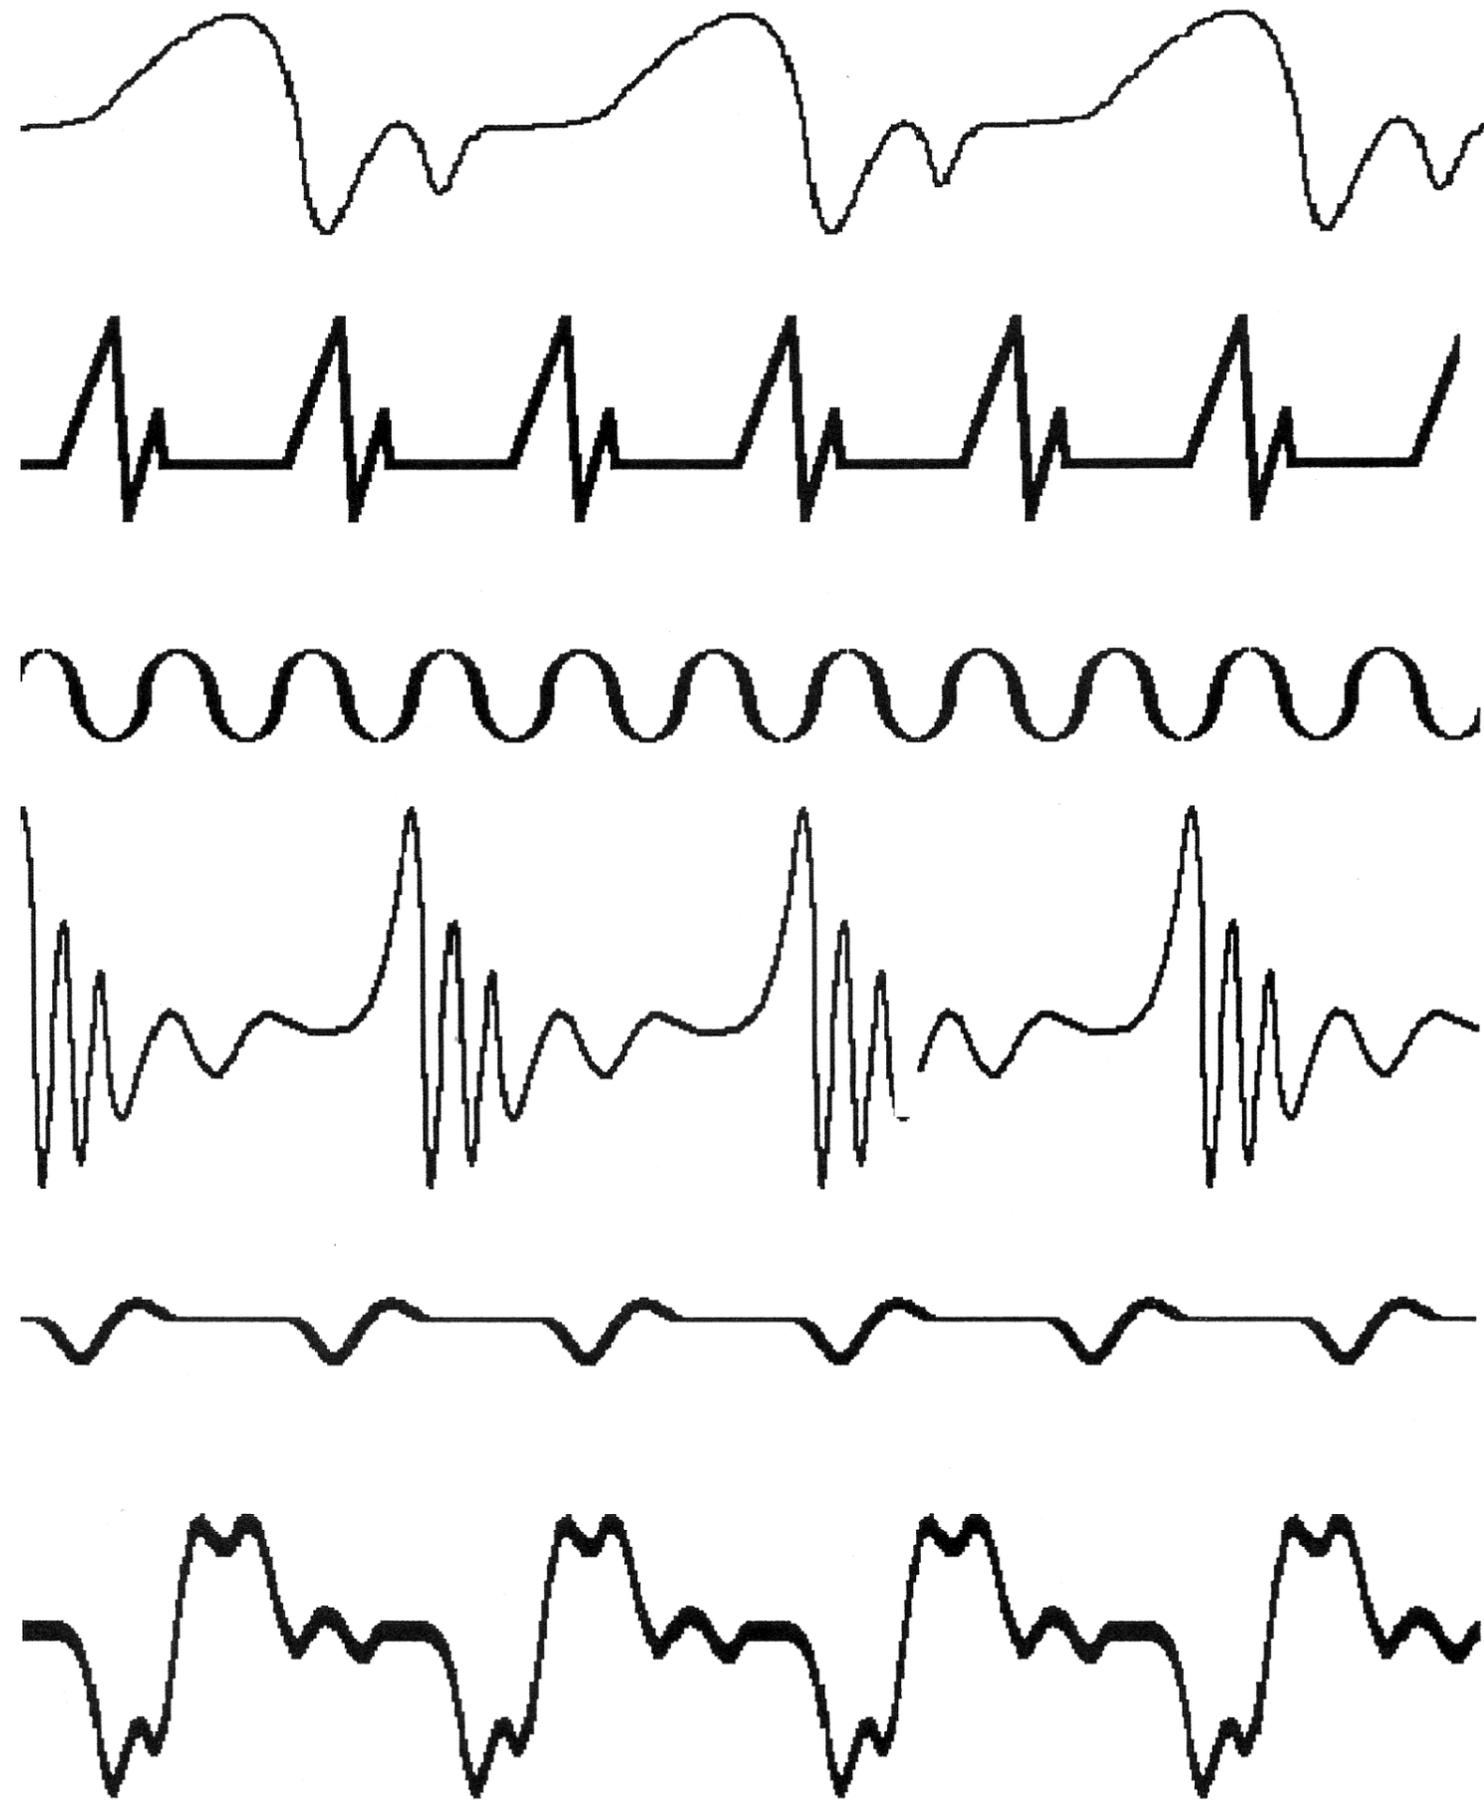

Donc une idée intelligente.

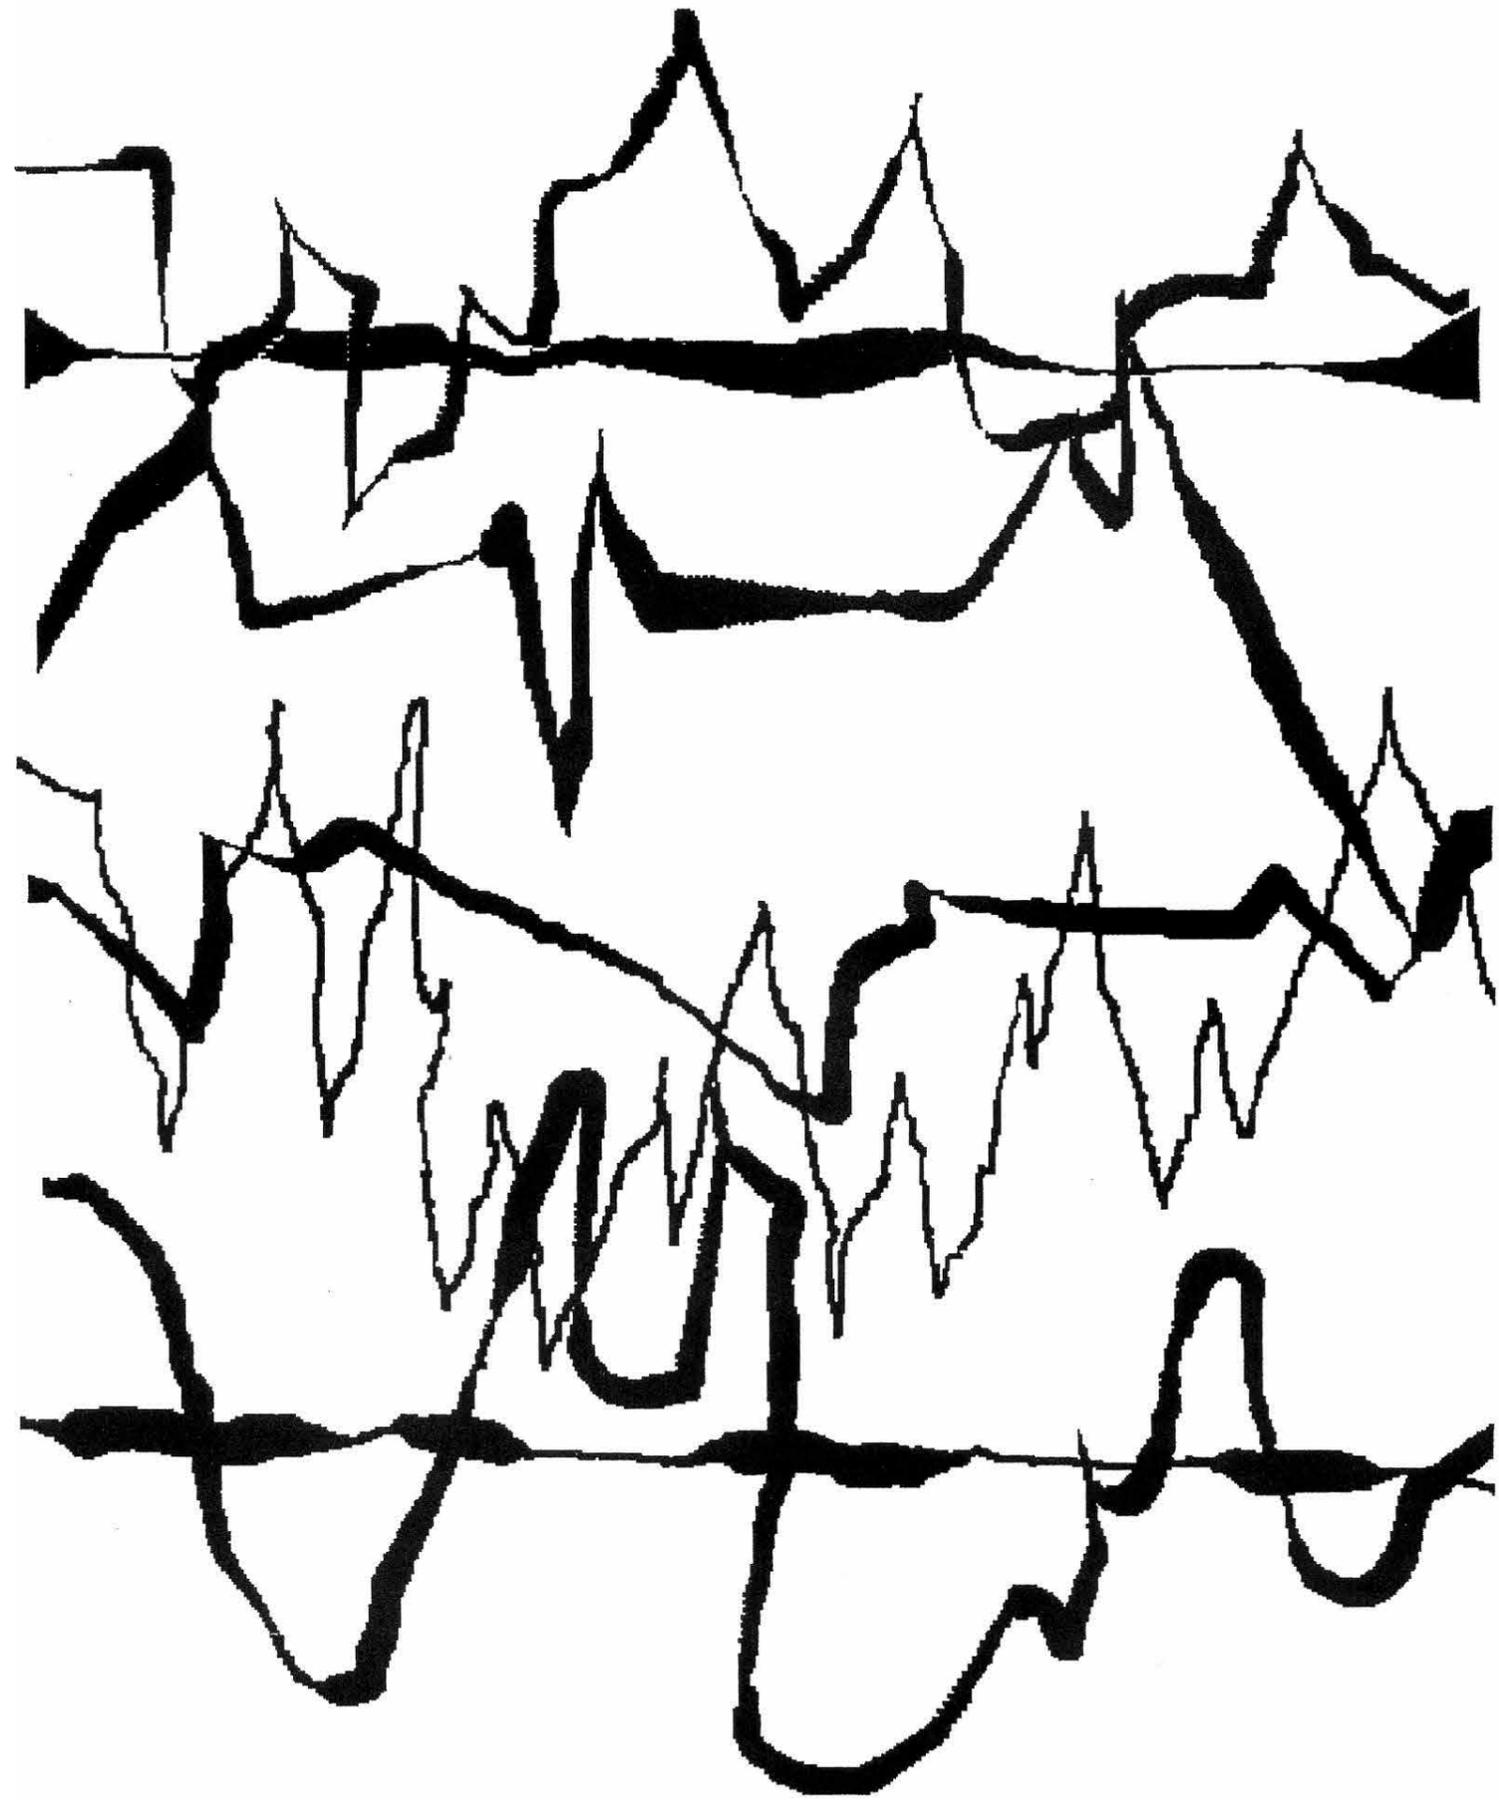

Qu'est-ce qui différencie une idée intelligente d'une idée idiote ?

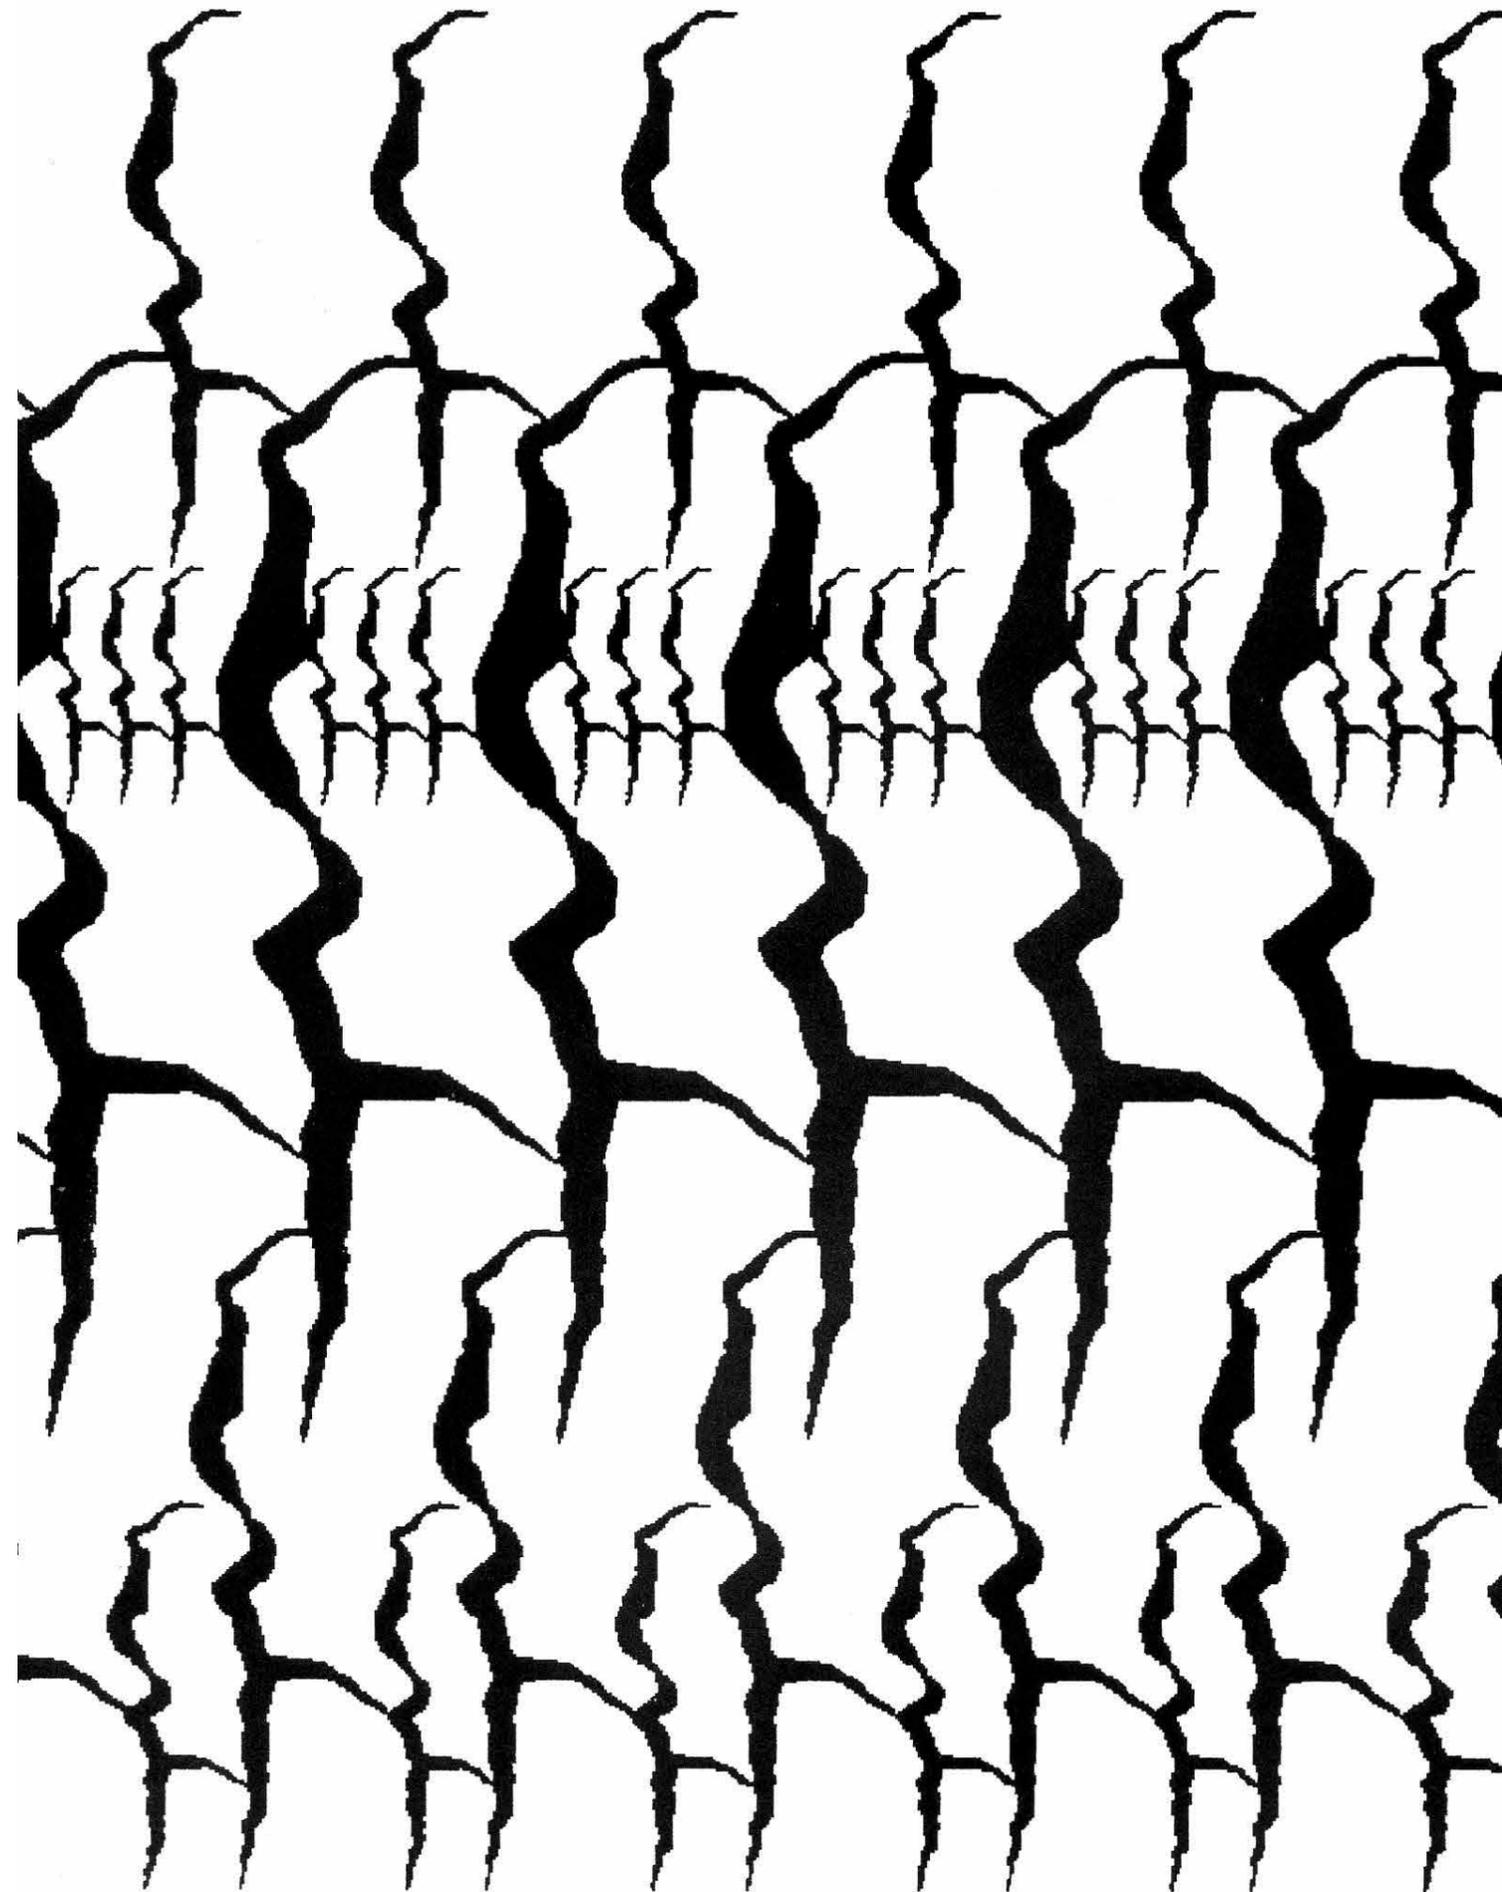

Analyse d'une idée idiote.

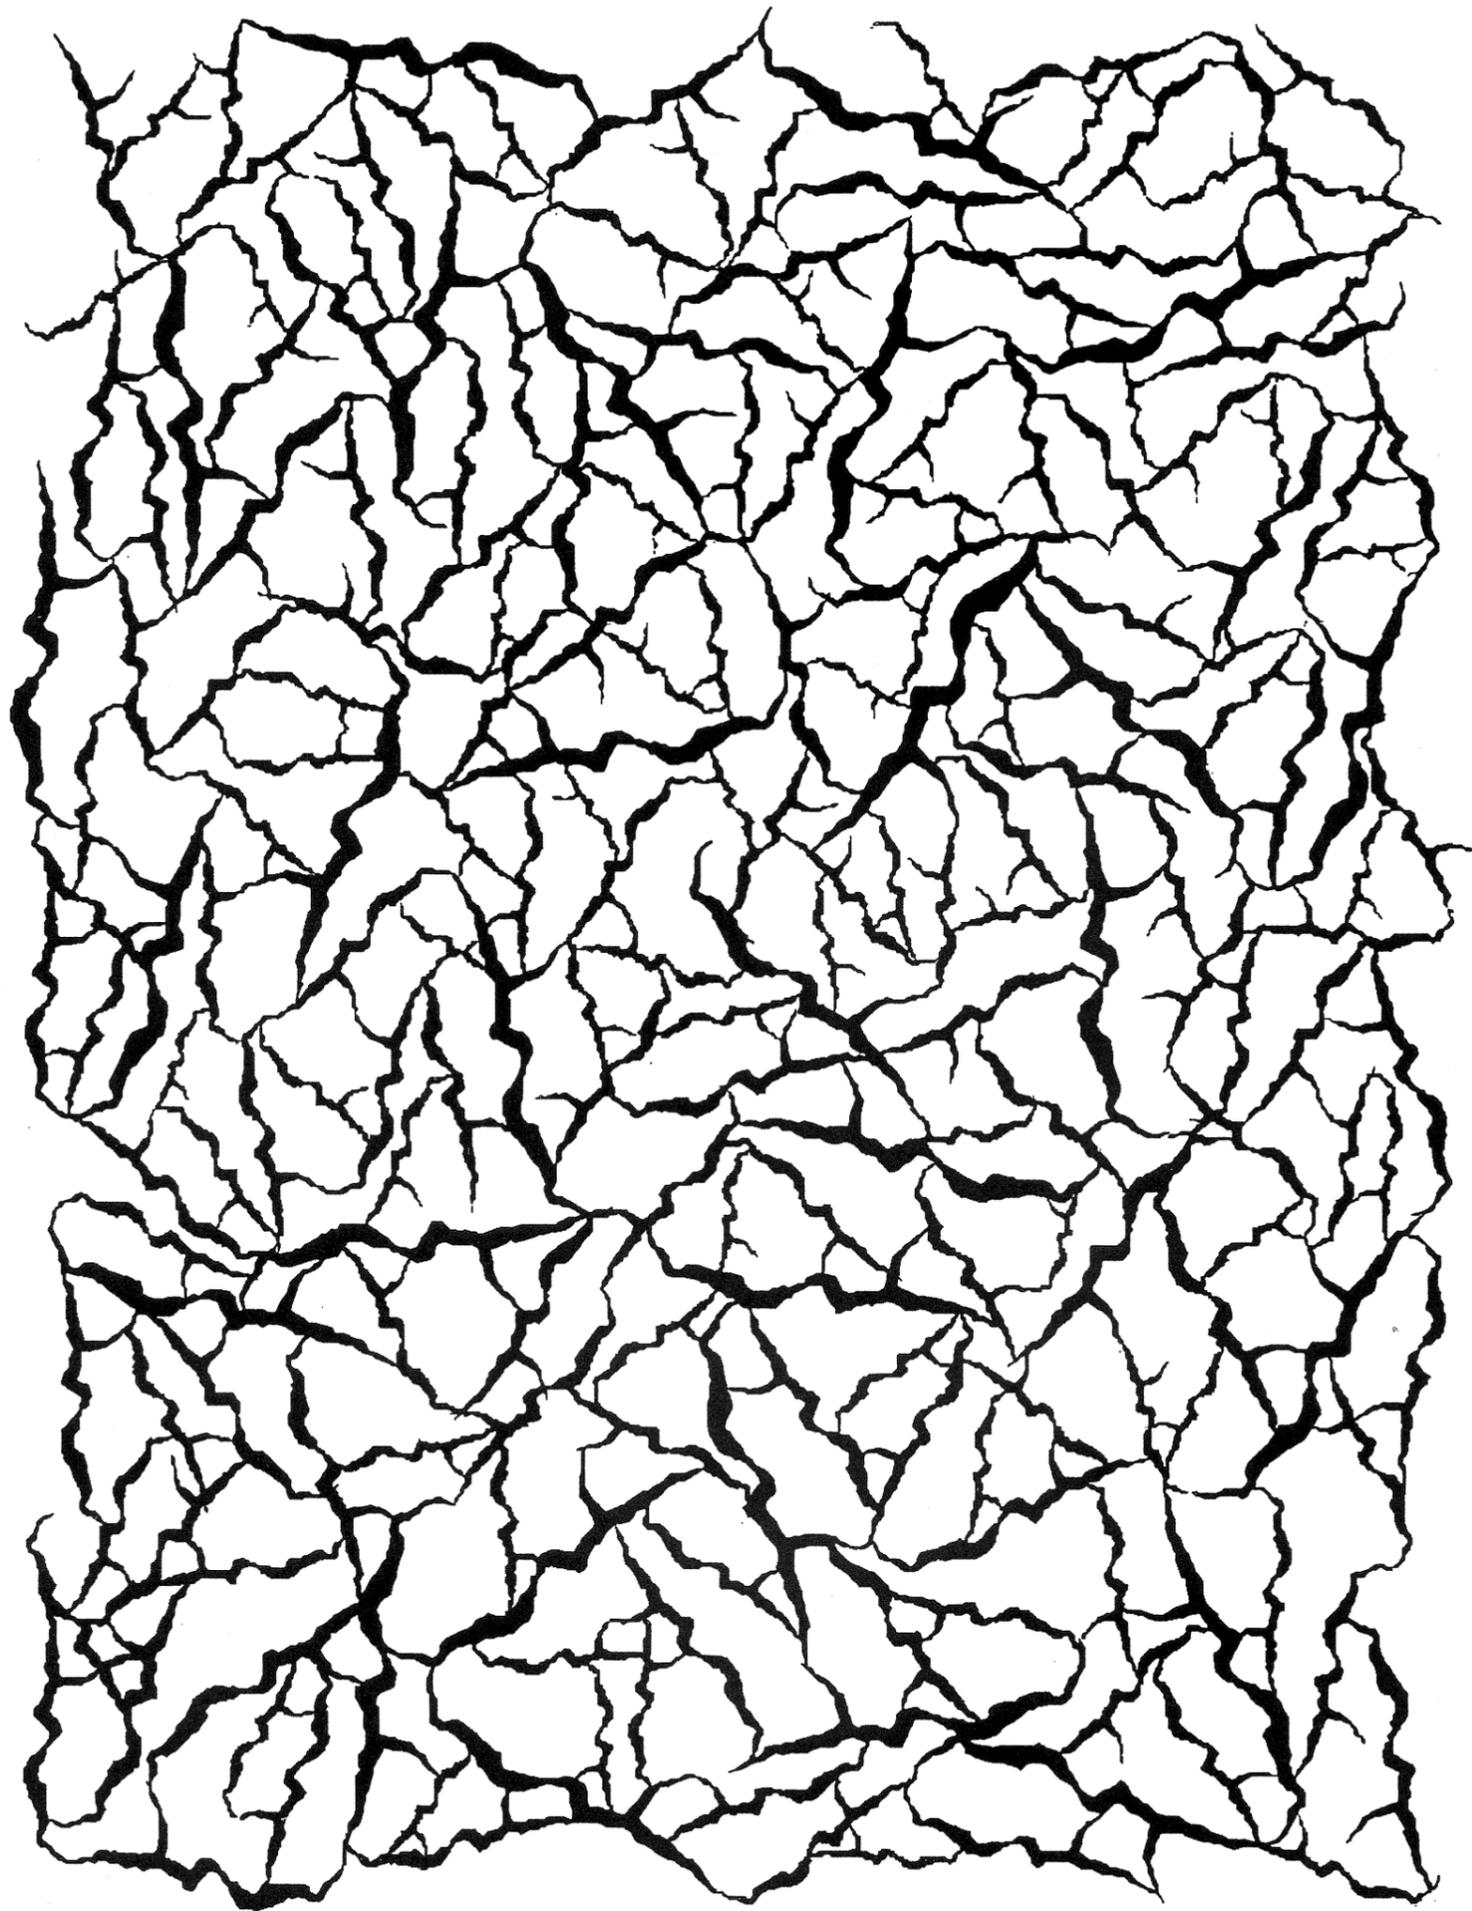

Analyse d'une idée intelligente.

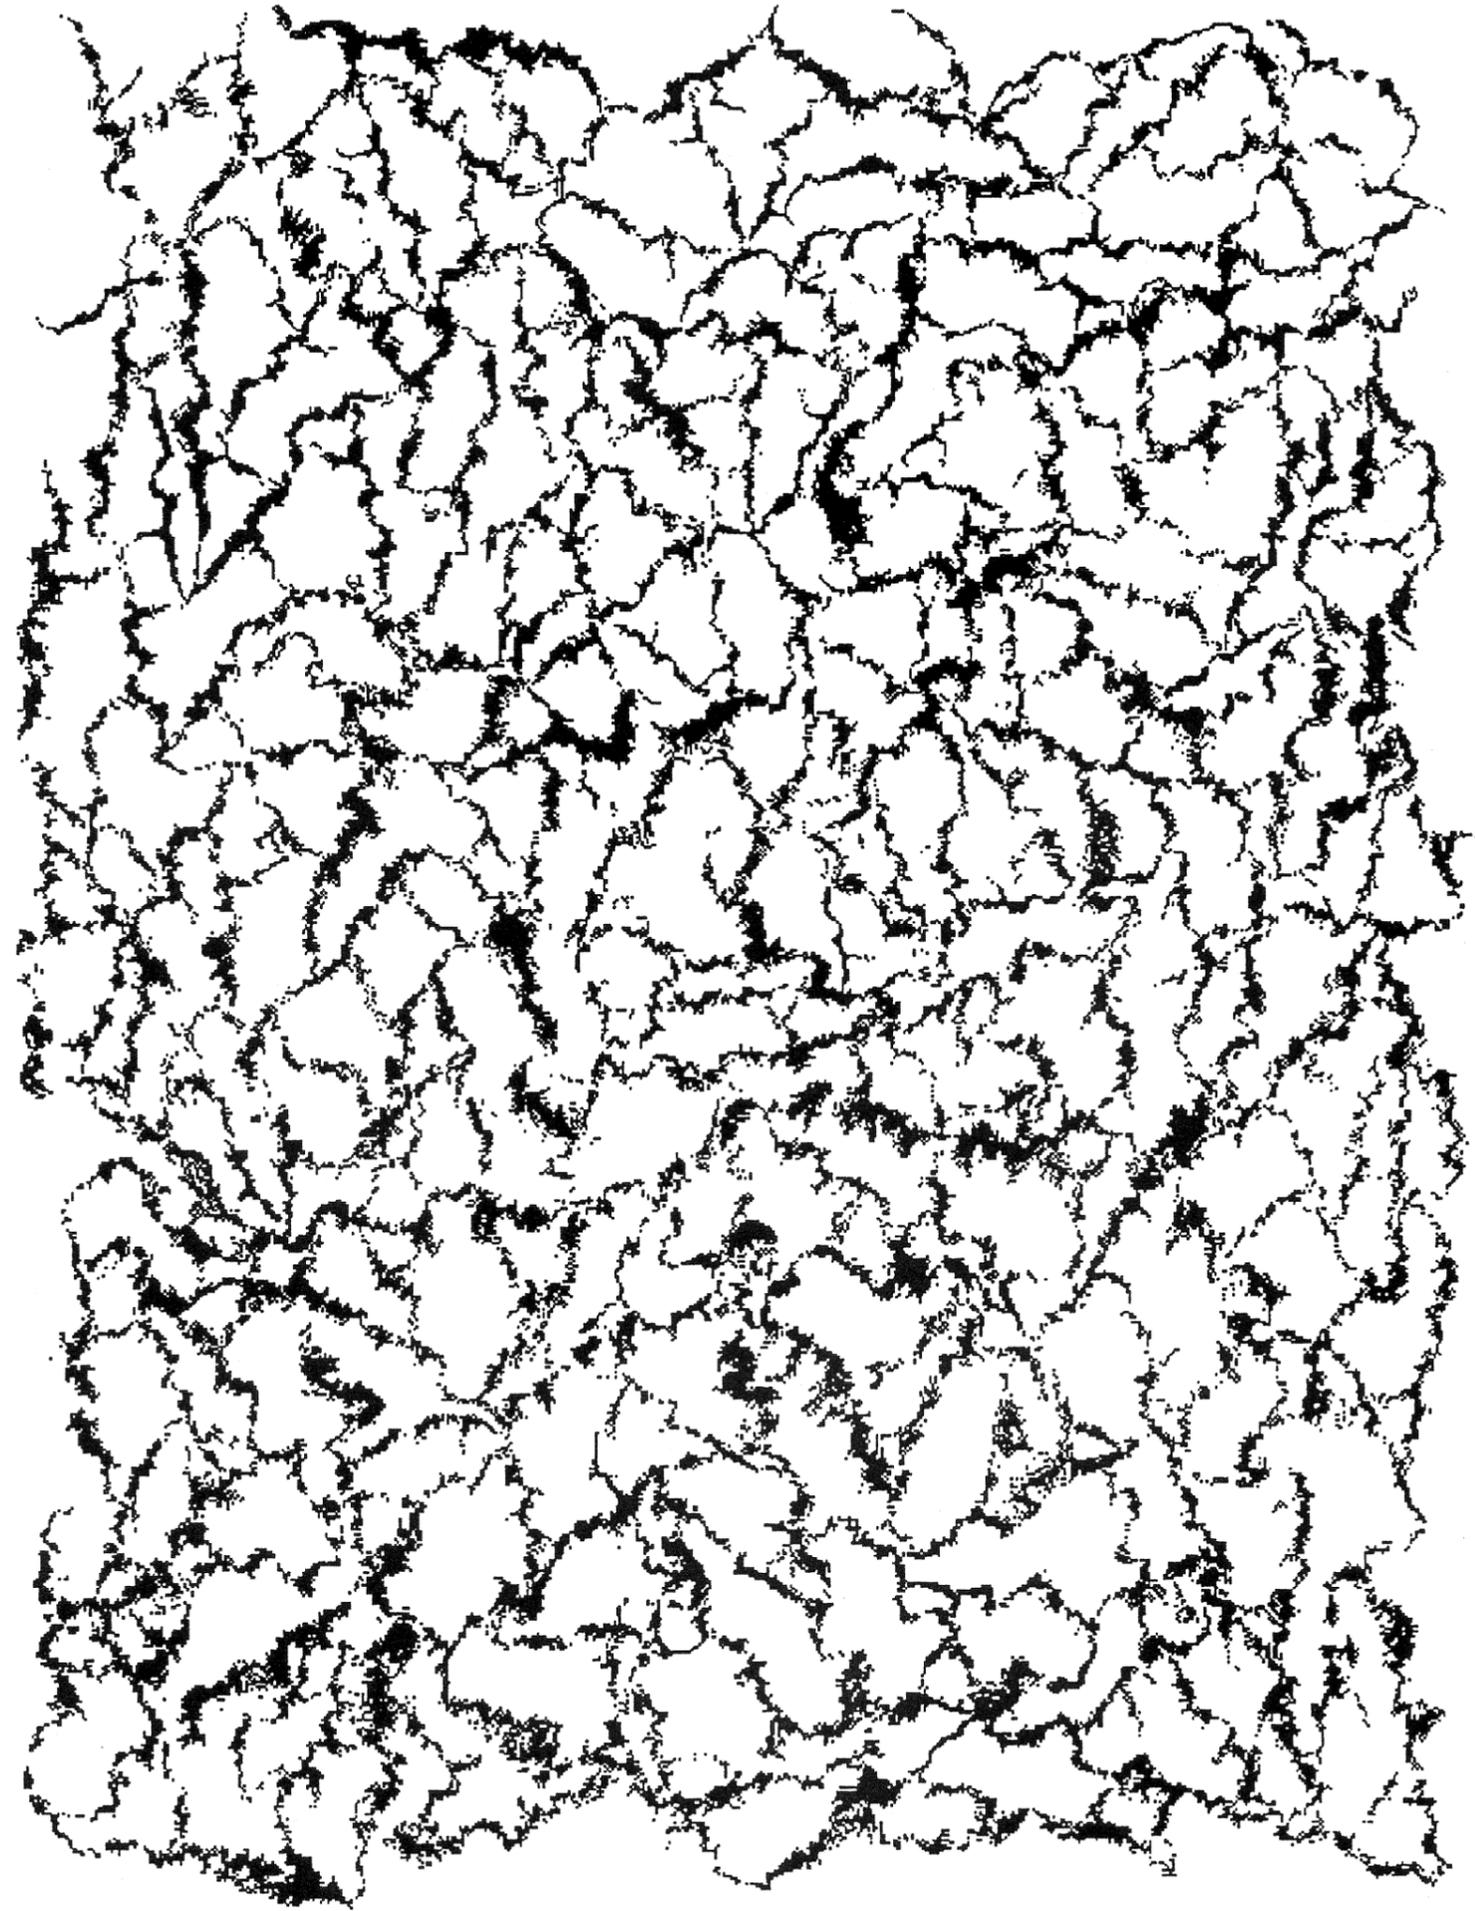

Analyse d'une obsession.

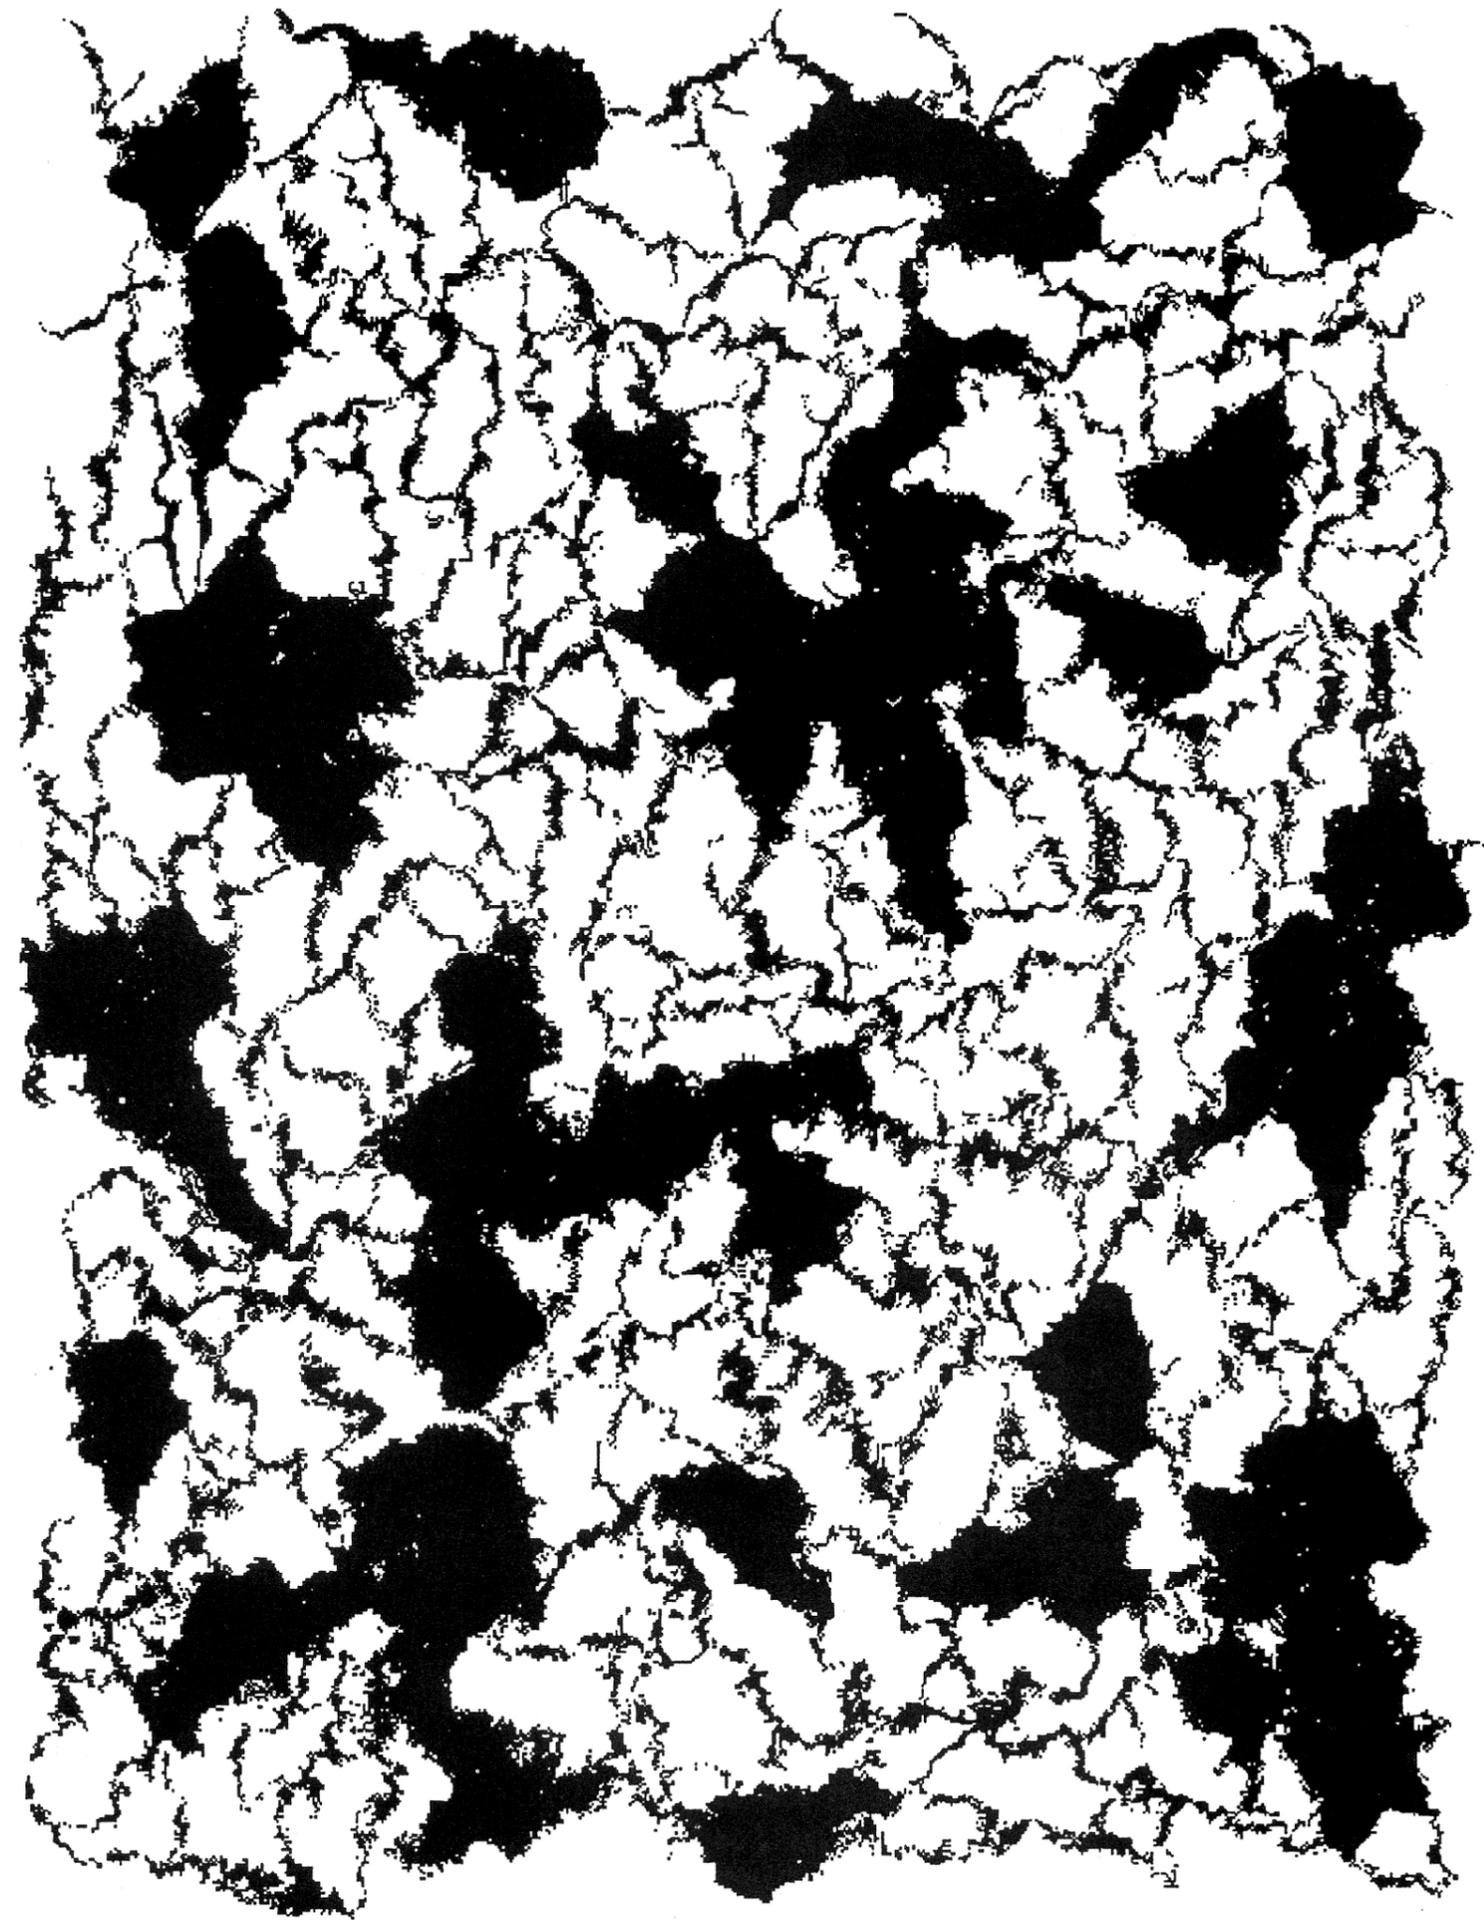

Les obsessions ne sont pas
des idées fixes.

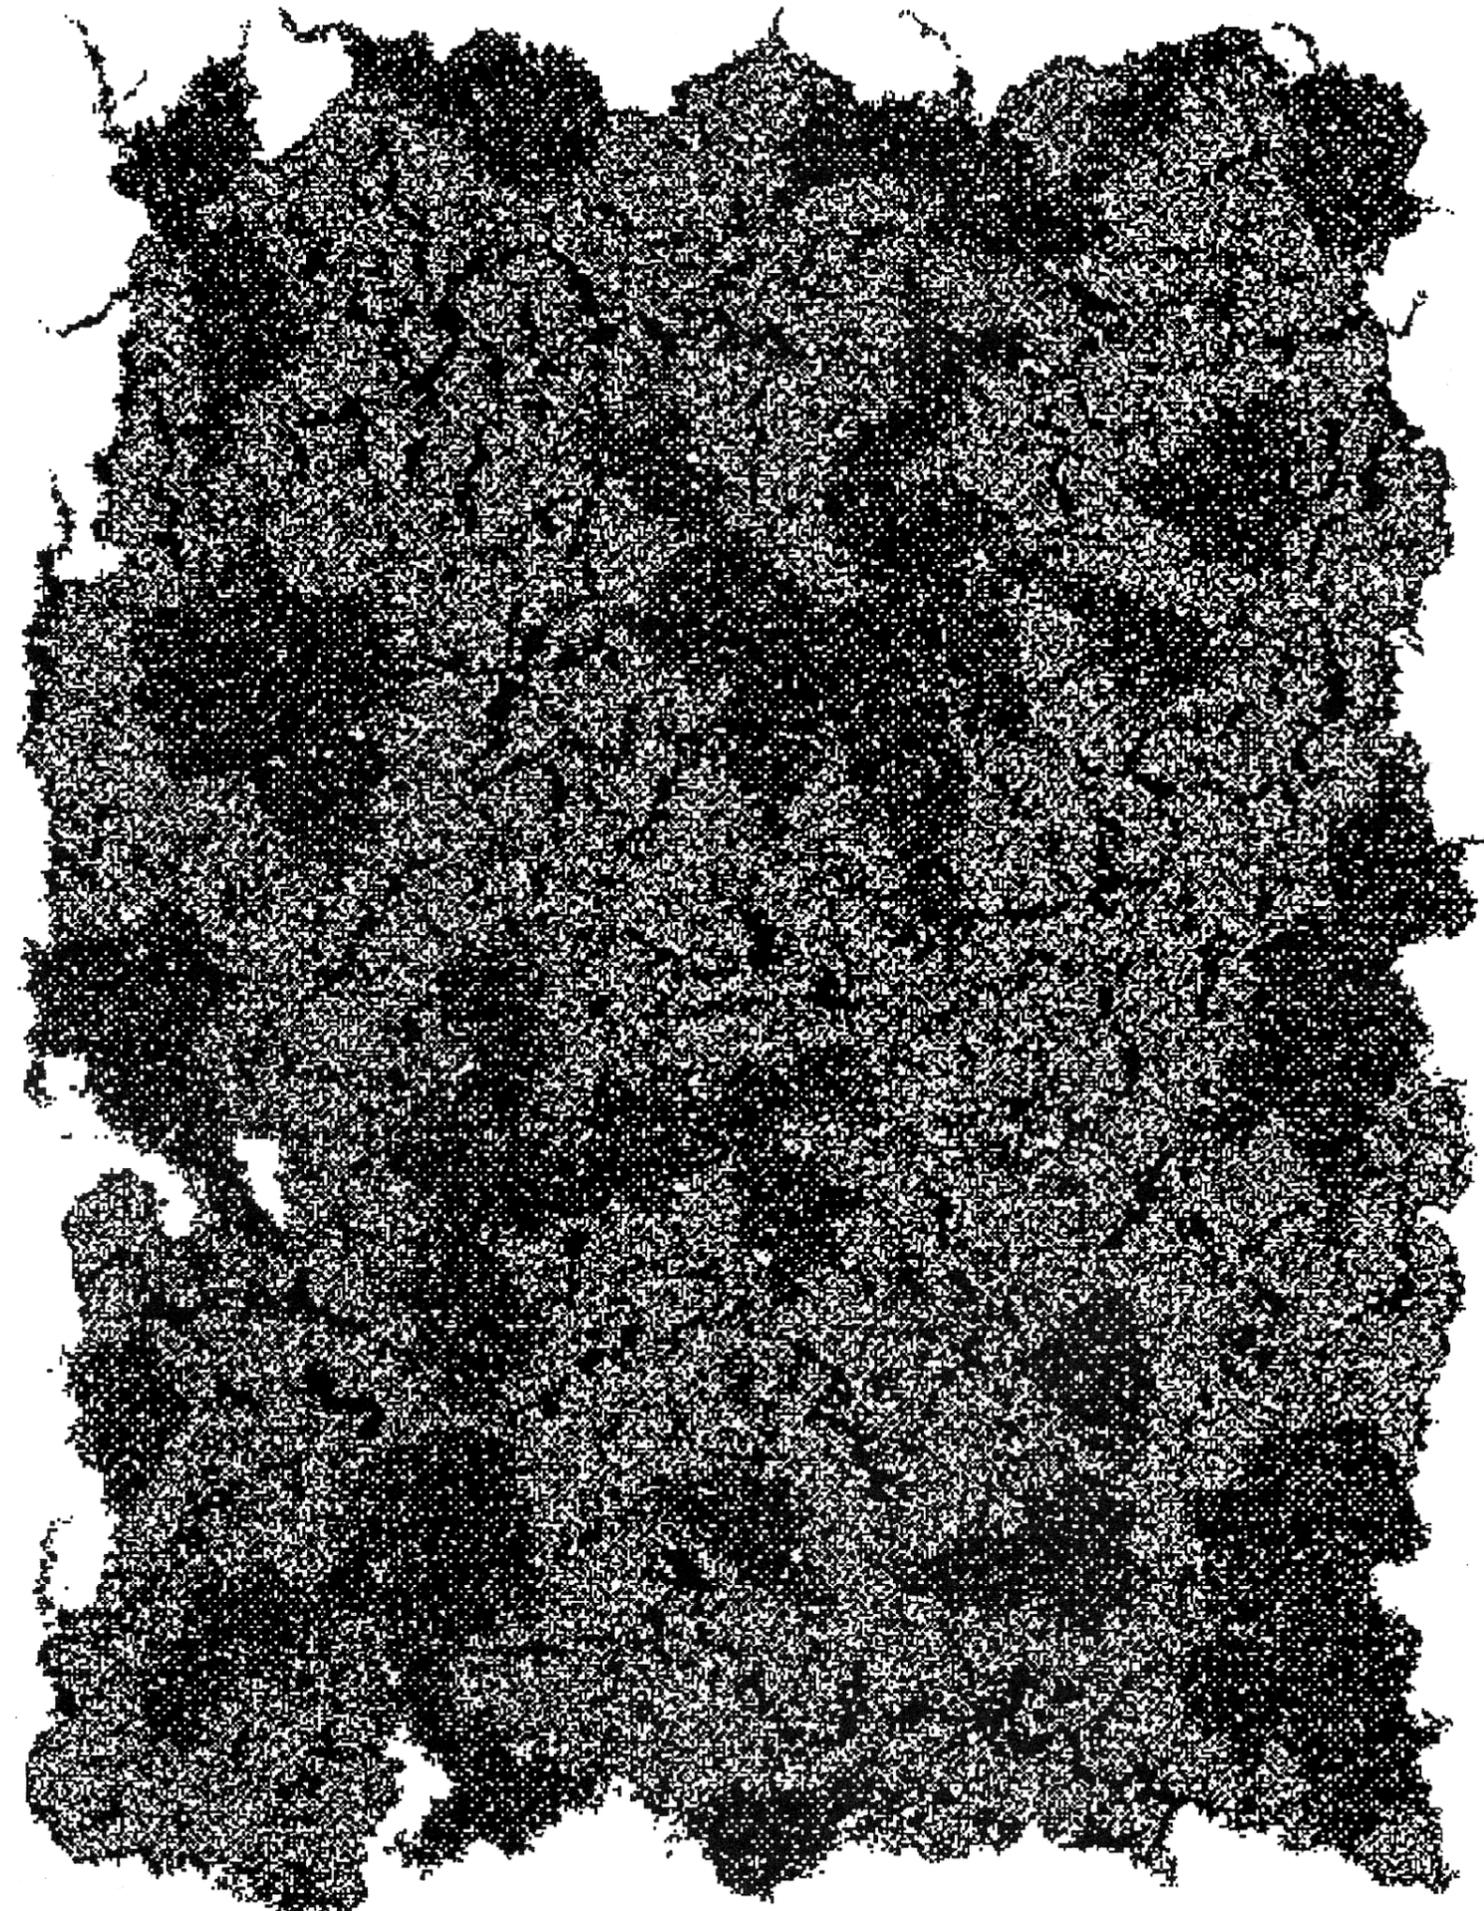

Mais elles troublent l'esprit.

Engendrent d'obscures
sentiments,

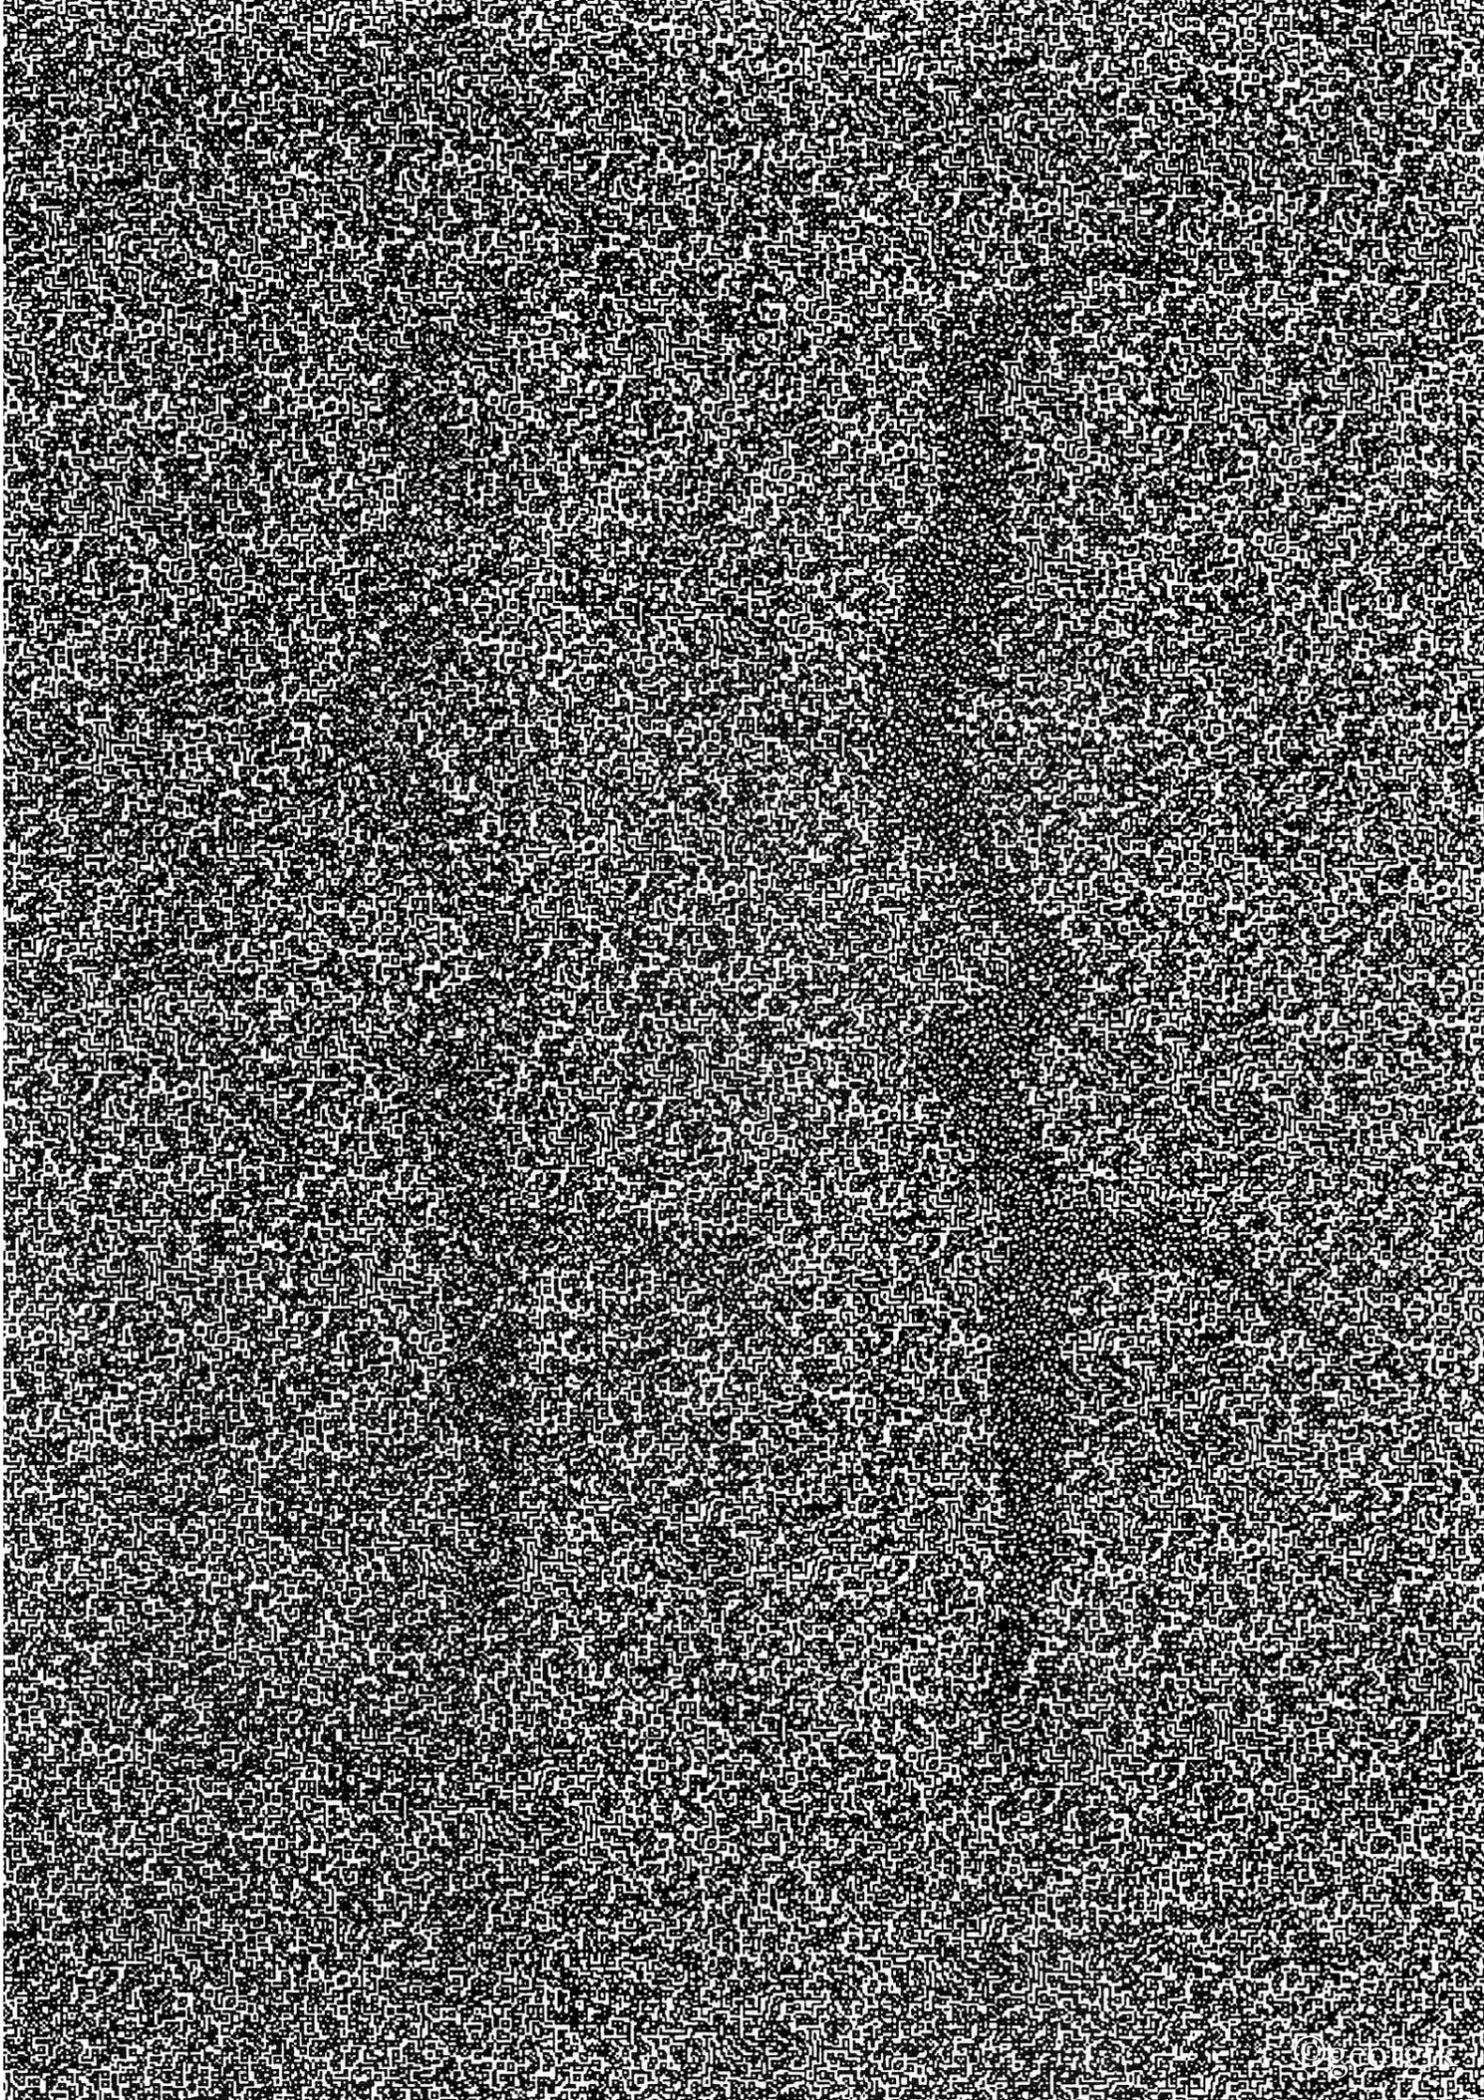

qui dissolvent la conscience.

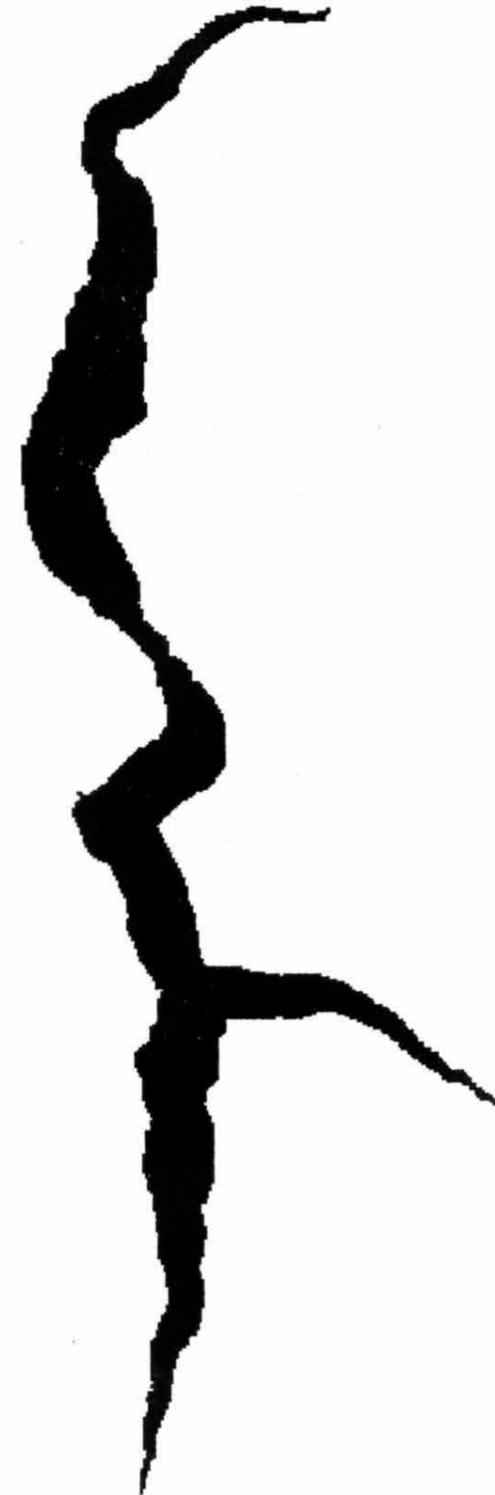

De l'inconscience.

émergent les idées.

Oh ! ...

Je déteste avoir des idées
